

# Australia Together

Updated for the term of the  
47th parliament of Australia

A plan by Australians  
for a better future  
2020 to 2050

# *Australia Together*

A plan for a better Australia by 2050

Australian Community Futures Planning

**Issue No. 8**

**Updated for the term of the 47<sup>th</sup> parliament**

**Starting draft – estimated 85% complete**

**August 2024**

## About Australian Community Futures Planning

ACFP was founded in March 2020 for the purpose of encouraging greater participation by Australians in planning their own future as a nation within a 21<sup>st</sup> century democracy. It is an independent centre of excellence in national community futures planning, providing an organising framework that can enable any and all Australians to increase the chances of improving our entire quality of life – our society, our environment, our economy and our democratic governance.

Australian Community Futures Planning has no affiliation with any political party inside or outside Australia. It receives neither political party nor other funding. All output from ACFP is produced by the in-kind contributions of volunteers. From 2020 until at least 2026 ACFP will be in start-up phase, pursuing a range of alliances with willing Australians.

ACFP is focused on helping Australians plan for the long term, for our safety, security, wellbeing and prosperity and for the preservation of the environment on which all of that depends. It fosters planning *by* the community *for* the community.

ACFP's Founder is Dr Bronwyn Kelly. **Dr Kelly is the Principal** in the process of drafting this version of ***Australia Together***.

**For more information on Australian Community Futures Planning visit**

Data and other commentary in this publication may not be reproduced without full attribution of ACFP and the Principal, Dr Bronwyn Kelly. All processes specified in this document, including but not limited to National Integrated Planning & Reporting and the *Australia Together* National Wellbeing Index, are proprietary to Australian Community Futures Planning and may not be reproduced or used for financial gain without the prior consent of ACFP's Founder Dr Bronwyn Kelly, except in the case of brief quotations embodied in critical articles or reviews. All such quotations must be attributed to the Principal, Dr Bronwyn Kelly.

### **Note – Disclaimer**

***Australia Together*** is a plan developed for the Australian community by any Australian willing to participate in good faith. It is not developed by any political party or elected government.

***Australia Together* has no statutory force  
and binds neither governments nor participants in any way.**

Participation in the national community futures planning process for development of and reporting on ***Australia Together*** is entirely voluntary.

### **Acknowledgement**

ACFP acknowledges the Traditional Owners of the lands on which we live and work across Australia and pays respect to Elders past, present and emerging. We acknowledge that sovereignty has never been ceded. ACFP recognises and celebrates the extraordinary contribution that Aboriginal and Torres Strait Islander peoples have made through millennia to all aspects of Australian life, culture and the environment. May all their songlines endure.

ACFP hopes that Strategies within ***Australia Together*** will assist First Nations to realise, in full, the aspirations of the Uluru Statement from the Heart.

## This Draft of *Australia Together* – Stage of Development

This is **Issue No. 8** of the starting draft of *Australia Together*.

**Issue No. 1** was released in May 2021 and contained over 180 Targets and Strategies for a better Australia by 2050. **Issue Nos. 2, 3 and 4** included an additional 50 Targets and Strategies. **Issue No. 3** was the first to add an extra element – on stewardship of ecology – to the first draft of the Vision for *Australia Together*, bringing the Vision to a total of 17 elements.

**Issue No. 5**, released in March 2022, was the last version of *Australia Together* before the 2022 federal election (after the closure of the 46<sup>th</sup> federal parliament). In **Issue No. 5**, amendments were made to the wording of three of the 57 Directions of the plan. These amendments were made on review by ACFP and do not represent any fundamental change in direction. They were applied to assist with the development of meaningful monitoring and more effective Strategies. **Issue No. 5** included 33 additional Targets and Strategies.

**Issue No. 6** was released in July 2022, just after the federal election of May 2022. It included four additional Targets and six new Strategies.

**Issue No. 7** was released in February 2024 and was the first Issue incorporating substantial updates **for the term of the 47<sup>th</sup> parliament**. It included eight minor amendments to the wording of the draft Vision for *Australia Together* and five minor amendments to the Directions, all arising from ongoing research by ACFP about Australian values and changes in those values as they have been expressed by Australians over the last twenty years. **Issue No. 7** also included 6 new Targets, 30 new Strategies, data updates and content amendments in 40 Targets/Strategies, and amended deadline dates in 86 Targets/Strategies.

**Issue No. 7** brought the total number of Indicators of the health of the nation that were being measured in *Australia Together* to 312, comprising:

- 174 Targets, and
- 138 Strategies, 95 of which were classed as “top priority”, meaning that these Strategies must be implemented in the current decade if longer term targets and aspirations are to be met.

Past drafts of *Australia Together* can be accessed at <https://www.austcfp.com.au/past-issues-of-australia-together>. A list of all changes and additions to each draft of *Australia Together* is always provided in each issue.

**Issue No. 8 is likely to be the last released before the 2025 election.** The performance of the 47<sup>th</sup> parliament in relation to the Vision and Directions of *Australia Together* will be assessed prior to the federal election due in 2025, based on the updated content of the draft plan.

*Australia Together* is still in starting draft phase. The starting draft is currently considered to be **85% complete**. ACFP is using the starting draft for purposes of pilot testing whether the structure of the plan is working well to enable Australians to engage with and amend it within the open and fully democratic process of National Integrated Planning & Reporting (National IP&R). For more information on how to participate in planning a better future for Australia together using National IP&R, visit <https://www.austcfp.com.au/national-integrated-planning-and-reporting>

## Amendments, new inclusions and updates in Issue No. 8

**Issue No. 8** contains:

- no new amendments to the Vision and Directions of the plan;
- 27 new Targets;
- 25 new Strategies; and
- data updates and content amendments to 9 Strategies.

This brings the total number of Indicators of the health of the nation that are being measured in *Australia Together* to 364, comprising:

- 200 Targets, 5 of which are classed as “top priority”, meaning that these Targets are critical to Australia (the critical targets are all related to climate change); and
- 164 Strategies, 111 of which are classed as “top priority”, meaning that these Strategies must be implemented in the current decade if longer term targets and aspirations are to be met.

No Targets or Strategies in Issue No. 7 have been deleted in Issue No. 8.

<b>Additional Targets in Issue No. 8 of Australia Together</b>	
<b>Soc01.02.01</b>	Safety online
<b>Soc04.01.02</b>	Life expectancy – health adjusted – males
<b>Soc04.01.03</b>	Life expectancy – health adjusted – females
<b>Soc04.05.06</b>	Physical health – chronic conditions
<b>Soc04.09.01</b>	Health services accessibility – cost barriers
<b>Soc04.09.02</b>	Health services accessibility – waiting times
<b>Soc04.10.01</b>	Health system sustainability and universality – trust in the health care system
<b>Soc05.01.05</b>	Tertiary education attainment – degree qualifications
<b>Soc05.01.06</b>	Tertiary education attainment – Certificate qualifications
<b>Soc05.02.04</b>	School education – educational attainment (Year 12)
<b>Soc12.02.02</b>	Aged care system performance monitoring – satisfaction with aged care assistance
<b>Soc12.05</b>	Disability services system performance monitoring – satisfaction with assistance to the disabled
<b>Soc12.05.01</b>	Disability services system performance monitoring – satisfaction with assistance to carers for people with a disability
<b>Soc15.03</b>	Justice in the incarceration system – target for reduction of the number of people in prison
<b>Soc15.04</b>	Access to justice – civil
<b>Soc15.04.01</b>	Access to justice – criminal
<b>Soc06.03</b>	Equality before the law
<b>Env06.01.06</b>	Renewable energy – buildings
<b>Env10.02</b>	Protection of threatened species
<b>Env12.01</b>	Proportion of land areas dedicated to long term conservation
<b>Env15.02</b>	Proportion of marine areas dedicated to long term conservation
<b>Env16.01</b>	Reduction of waste generation
<b>Env16.01.01</b>	Increased recovery of waste for reuse
<b>Econ01.06.02</b>	Economic composition and transformations – Comparative economic complexity
<b>Econ02.01.01</b>	Employment – Participation rate of 15-64 year-olds
<b>Econ02.03.02</b>	Permanence and casualisation of employment – access to paid leave entitlements
<b>Gov01.01.01</b>	Strength of democracy

<b>Additional Strategies in Issue No. 8 of <i>Australia Together</i></b>	
<b>Soc04.07.01</b>	Security of funding for health – Abolition of subsidies for private health insurance and reinstatement of universal health care in public and private hospitals funded by a single public fund based on a fair Medicare levy
<b>Soc04.07.02</b>	Security of funding for health – Development of plans to implement integrated funding for and delivery of all public and private hospital services
<b>Soc04.10</b>	Health system sustainability and universality – scholarships and bonds for medical students
<b>Soc05.04</b>	Lifelong education – Education as a right
<b>Soc07.04</b>	Australia’s multicultural framework – Implementation of the road map
<b>Soc 13.01</b>	Pilot scheme for a universal basic income – UBI for artists
<b>Soc15.03.01</b>	Justice in the incarceration system – strategies for reduction of the number of people in prison
<b>Env02.04.01</b>	Elimination of military greenhouse gas emissions
<b>Env04.01</b>	Overhaul of the Environment Protection and Biodiversity Conservation Act 1999
<b>Env06.04</b>	National Renewable Energy Storage Target
<b>Env08.01</b>	Sustainability of agriculture – transition to food security in the age of climate change
<b>Env10.03</b>	Legislation establishing a measurable baseline and target consistent with the global goal of reaching Nature Positive by 2030
<b>Env10.03.01</b>	Strengthening the Nature Positive Plan to ensure biodiversity loss is halted by 2030
<b>Env11.02</b>	Introduction of a Stewards of the Earth Fund and Program for rewilding farming and forestry systems to lock up carbon, conserve water, and restore biodiversity
<b>Env12.02</b>	Cessation of native forest logging – urgent legislation
<b>Econ01.06.01</b>	Economic composition and transformations – Transition away from export of both fossil fuels and the raw materials used in production of steel, aluminium, fertilisers, polysilicon, etc., and towards export of zero emissions goods
<b>Econ01.06.03</b>	Economic composition and transformations – Expansion of manufacturing as a share of Australia’s economy
<b>Econ04.03.01</b>	Fair & progressive taxation - Transformation of Australia’s taxation system consistent with transition to universal income security and universal services security under a National Accord on Wealth, Welfare and Wellbeing
<b>Econ04.06</b>	Fossil fuel taxes – gas exports
<b>Econ04.07</b>	Electronic financial transactions tax
<b>Econ07.01</b>	Research and Development Expenditure – Increasing public and private investment in R&D
<b>Gov01.03.03</b>	Participation in democracy – Legislation to lower the voting age to 16 years
<b>Gov09.05</b>	Regulation of corporate misconduct – Reform of the Australian Securities and Investments Commission (ASIC)
<b>Gov12.01.04</b>	Promotion of peace in a multipolar world – Championship of peace at home and abroad
<b>Gov12.01.05</b>	Promotion of peace and economic cooperation in a multipolar world – Planning for transition to peaceful cooperation for economic prosperity in a multipolar world

<b>Data, content or target date amendments – Issue No. 8 of <i>Australia Together</i></b>	
<b>Soc11.01</b>	Funding for childcare - Universal access to free Early Childhood Education and Care
<b>Env06.03</b>	National Renewable Energy Targets (RETs) – setting targets for economic sustainability and prevention of global heating
<b>Econ01.06</b>	Economic composition and transformations – Cessation of fossil fuel exports
<b>Econ02.04.01</b>	Employment planning - Increasing government sector participation in the economy by a program of expansion of public sector employment in health, aged care, disability services, employment and welfare services, education, housing, conservation and land care, renewable energy, buildings efficiency and transport
<b>Econ04.01</b>	Provisions for welfare - Federal budget
<b>Econ04.02.03</b>	National Accord on Wealth, Welfare and Wellbeing - Community Australia Bank

Data, content or target date amendments – Issue No. 8 of <i>Australia Together</i>	
Econ04.02.04	National Accord on Wealth, Welfare and Wellbeing - Community engagement on introduction of a universal basic income
Gov08.02.02	Electoral funding and expenditure reform – imposition of spending caps for political parties, candidates and associated entities (“third parties”) in elections
Gov12.04.03	National plan for safe withdrawal from activities, agreements and alliances inhibiting sovereign independence and peace

## Alignment of the *Australia Together* National Wellbeing Index with the Australian government’s Measuring What Matters wellbeing indicators framework

*Australia Together* houses data and information on over 360 indicators of Australia’s wellbeing and security. These indicators comprise the ***Australia Together* National Wellbeing Index**. Chapters 2 and 4 of this plan provide information on the how the *Australia Together* National Wellbeing Index has been formulated. Chapters 5, 6, 7, and 8 house the data and information on each of the indicators. More information is available at <https://www.austcfp.com.au/national-wellbeing-index>

Issue No. 8 of *Australia Together* includes 27 new Targets, 19 of which have been included to align the baseline and target data and information in the *Australia Together* National Wellbeing Index with the federal government’s Measuring What Matters wellbeing indicators framework released in 2023. The *Australia Together* National Wellbeing Index now incorporates in either an identical or very similar form all but 9 of the 70 measures used in the 50 indicators in the Measuring What Matters framework. Of the nine measures not included, seven may be included at a later date if they are relevant to achievement of the Vision for *Australia Together*. The remaining two indicators regarding wages and fiscal sustainability are not useful for national integrated planning and reporting purposes and are unlikely to be included in future. For more information on the indicators in both frameworks see the [ACFP Fact Sheet: Does \*Australia Together\* Measure What Matters?](#)

## Alignment of the Vision for *Australia Together* with Australian national values

As part of ACFP’s ongoing program to ensure the Vision for *Australia Together* is consistent with what Australians actually want for their future, an assessment has been undertaken of how the elements of the Vision align with the views of Australians about what they value for themselves and their nation. The results are provided in the [ACFP Fact Sheet: Does the Vision for \*Australia Together\* reflect what Australians have said they value and want?](#) In summary, the current draft Vision for *Australia Together* does reflect what we value and want for our future. It is the key to ensuring we can live our values and build the nation, country and future we want. Furthermore, ACFP found no evidence of a desire by Australians to depart from any element of the Vision. As a result, no changes have been made to the Vision in Issue No. 8, compared to Issue No. 7.

Additionally, following the defeat of the referendum on the constitutional reform to establish an Indigenous Voice, ACFP has undertaken two other assessments which have a bearing on the issue of whether the Vision might need to be amended. Results of these analyses are provided in:

[ACFP Fact Sheet: How is the Indigenous Voice consistent with the Vision for \*Australia Together\*?](#)  
[ACFP Fact Sheet: How is Australia’s Constitution inconsistent with the Vision for \*Australia Together\*?](#)

**Based on the findings of the above three assessments, the conclusion is that the Vision for *Australia Together* is aligned with what Australians want for their future but the Constitution is at odds with the Vision and therefore needs significant reform. Strategies have been included in *Australia Together* to achieve the necessary alignment between the Vision and the Constitution.**

## Introduction – Australia’s map to a better future

August 2024

The first ever draft of a long term, integrated, community-driven plan for the Australian nation’s society, environment, economy and democratic governance – ***Australia Together*** – was released in May 2021 at a time when the nation had reached some critical turning points in our country’s prospects for ongoing:

- prosperity, wellbeing, and security;
- environmental sustainability and biodiversity;
- open and healthy democracy;
- reconciliation with the first peoples of this land – Aboriginal and Torres Strait Islander peoples; and
- continuing respectability on the international stage as a land of free and fair people committed to cooperation with other nations for human advancement and peace.

It was also a time when the world still had some time to prevent climate catastrophe. The question was whether we would organise ourselves to overcome the critical challenges we were facing.

*Australia Together* was designed as road map to help Australians safely navigate their way through these foreseeable crises, some of which are existential in their dimensions. It was and is the nation’s first and only attempt to organise itself well enough to build a long term plan that will bring and hold all Australians together so that they might rescue the possibility of a decent future for the next generations.

It is fair to say that since the release of the first draft of the plan the people of Australia and the world have witnessed a deepening of the crises that prompted it, rather than progress towards a future of safety for us all. We have also witnessed the rise of additional challenges, most notably:

- an increase in the chance of world wars, including nuclear wars;
- a decrease in human rights; and
- an erosion of confidence in democratic institutions and democracy itself.

In 2024, it is not too late to avert these dangers but it will not be possible to do so unless Australians:

- specify the sort of future they want – their vision for the best Australia they can imagine;
- work together to build an integrated plan to make it a reality; and
- present that plan to those they elect as the surest and safest means of being able to bequeath a sustainable future to future generations.

Australian governments at the state and federal level have failed to plan for a better future. And until now the Australian people have not been able to organise themselves to express their preferences for that future. Governments and parliaments need Australians to be able to express those preferences in a clear and intelligent format if they are to be able to develop policies and laws that will help everyone pick up their pace in dealing with the looming social, environmental, economic and democratic crises we are facing. *Australia Together* is being designed to help everyone in this necessary endeavour. In particular it is designed to help electors and the elected speak to each other respectfully about the best way forward and to do so without excluding minorities and increasing inequality and disadvantage.

## Issues of *Australia Together* for the 47<sup>th</sup> parliament

Five issues of the starting draft of *Australia Together* were produced for the 46<sup>th</sup> parliament and a report on the performance of the parliament – [The State of Australia 2022](#) – was released in early 2022 which showed that the 46<sup>th</sup> parliament had failed on almost every indicator to help the country move towards the preferred vision for our future.

Issues of *Australia Together* for the 47<sup>th</sup> parliament will continue to include targets and strategies capable of helping Australia avert crises and build a safe path to the future we prefer. Australian Community Futures Planning (ACFP) will help the nation to do this by using **National Integrated Planning & Reporting (National IP&R)**. National IP&R is a fully democratic process for nation building that enables the voices of all Australians to be clearly heard. Find out about National IP&R and how to become involved at <https://www.austcfp.com.au/become-involved>

ACFP will also continue to provide Australians with the data they need for development of the best, evidenced-based, integrated plan for the future and a reporting process that helps the whole nation stay on track to avert foreseeable crises before they destroy our future.

**Using National IP&R, this plan – *Australia Together* – is to be developed and monitored over time by Australians together.**

Among other things that ACFP is doing to help Australians realise a better future, we have drafted a Vision of what that might look like as a guide. It's called the **Vision for *Australia Together***. This is based on comments made by Australians about their preferred future on the occasions they have been asked about it in the 21<sup>st</sup> century. Governments have not listened to those comments. They have not taken the aspirations of Australians seriously enough to design a plan that will make their preferred future a reality. Through time, the Vision and this plan – *Australia Together* – will be refined to increase our chances of making our preferred future a reality.

*Australia Together* is a plan with a 30-year timeframe starting in 2020. The aim is to ensure the Australian nation arrives safely at our preferred destination for the future by 2050 or sooner. Along the way, our movement towards that future will be monitored by watching how we have travelled from the baseline to Targets. As such, it's important to remember where we started from. For this reason, the Introduction to the first Issue of *Australia Together* has been retained in [Appendix A](#).

## The Vision for *Australia Together*

The **latest draft** of the **Vision for *Australia Together*** is set out on the following page. The draft is a work in progress but is necessary to enable ACFP to pilot test whether the structure of the plan is working well to inspire and accommodate the diverse Targets and Strategies necessary for the future Australians want for themselves, their children and their country. The draft is based on research on the views Australians have expressed for their preferred future whenever they have been asked about that in surveys, focus groups, community engagement or planning exercises over the past two decades and on new detailed research about Australian values.

- Read about the origins of the draft Vision for *Australia Together* [here](#) and [here](#).
- Read about the values of Australians in Chapter 5 of [The People's Constitution](#) by Bronwyn Kelly at <https://austcfp.com.au/publications#peoplesconstitution>.
- Click [here](#) or on the ACFP website at <https://www.austcfp.com.au/survey-forms> to become involved in commenting on the Vision and planning a better future for Australia.

# The Vision for Australia Together

**By 2050, we and our children and grandchildren will be living a fulfilling life in an Australia where**

We are all safe

We have achieved a lasting reconciliation between First Nations peoples and non-Indigenous Australians, based on our shared values of justice and self-determination

Everyone is welcome to participate positively in community life

We are inspired and able to renew our physical and spiritual wellbeing

We act together as a compassionate society

Equality is valued as enriching human community, cultural harmony and social progress

Diversity is positively appreciated as the basis for a successful Australian society

Everyone can realise their full potential in life, as individuals, members of a family and citizens through unlimited opportunities in education and employment of choice

Vital services are fully accessible for all

Scarce resources are conserved and fairly shared

National wealth is fairly raised and fairly shared

Our economy is sustainable and supports rewarding opportunities and continuous improvements in living standards, wellbeing and security for everyone

As a nation we have the courage to take a leading place in achieving the environmental aims of a global society

Stewardship of ecology is affirmed as fundamental to planetary and human survival

Democracy is assured by a well informed and engaged community of political equals

We can confidently trust our parliaments, governments, and courts to act fairly and justly in accordance with the rights and interests of the public and future generations

We take pride in Australia as a responsible international citizen, active in building a safe, peaceful and united world

**These are the aspirations of our hopeful generation. We commit to this Vision for Australia Together so that we can pass the gifts we have inherited to our children, and they to theirs.**

## Limits of this draft and guidance on navigation

**Readers are advised that this is Issue No. 8 of the starting draft of *Australia Together*.**

**The draft is incomplete. This is intentional.**

Because a long-term plan is an entirely new approach to the way Australian's have attempted to secure their future as a nation, ACFP has decided to release versions of ***Australia Together*** as they develop and grow through the acquisition of new data and the commentary of Australians. This is consistent with the fully transparent democratic form of planning that is **National Integrated Planning & Reporting**.

This draft of ***Australia Together*** is being released at the point where it is estimated to be about 85% complete. The release of successive drafts is intended to help Australians continue to familiarise themselves with how this new plan and planning process work. The National Integrated Planning & Reporting process and the plan itself have considerable potential to enable Australians to efficiently organise themselves to create their preferred agenda for the nation's future.

For further information on the next steps in development and publication of the plan see [Chapter 10 – Future additions and amendments to \*Australia Together\*](#).

For a brief introduction to what ***Australia Together*** is, [view this video introduction](#). For more details view ACFP's [Facts About \*Australia Together\* webpage](#).

## Guidance on navigating the plan

### **Guidance on navigating your way in** *Australia Together*

***Australia Together*** is a long term plan for a whole nation – a road map of safe routes to a future that Australians in the early 2020s prefer to imagine as the most desirable by 2050. Accordingly it will grow into a large plan with myriad linkages between Directions, Targets, Indicators and Strategies.

To help Australians navigate their way more efficiently through the plan, ACFP has organised the framework of the plan under 57 Directions. However, additional assistance in navigation has also been provided by assembling a list of key words for Indicators, Targets and Strategies in the plan. The key word list will also grow and change over time.

Readers can search the plan to see if it currently incorporates a Target, Indicator or Strategy of interest to them either by browsing through a Direction that may be relevant or by browsing the key word list to quickly find Targets, Indicators and Strategies. Click [here](#) to browse the key word list. Alternatively, readers can simply search on key words.

## An important note on the prospects for implementation of *Australia Together*

Australians who are aware of *Australia Together* are concerned that while they support its Vision, the Vision itself may never become a reality because governments may either ignore it or actively work against it. ACFP has to date received no feedback suggesting a rejection by Australians of the Vision for *Australia Together*. The question instead is:

### **How are we ever going to get governments to take notice of *Australia Together* and implement policies which will help make the Vision of the plan a reality?**

Australian Community Futures Planning is a centre of excellence in long term, integrated planning for the democratic nation of Australia. This entails deep research into matters that affect Australia's future but also development of practical approaches to institutional and policy reforms that will be necessary to ensure that the full potential of *Australia Together* comes to pass. Strategies for these institutional and policy reforms are incorporated into the plan itself as they emerge.

ACFP has identified that three of these Strategies for institutional and policy reform are likely to be critical in getting governments to take notice of *Australia Together* and, more importantly, to learn to collaborate with Australians to build the future we want. This form of collaboration is not a skill that can currently be claimed by major parties of government; nor have they exhibited a willingness to develop it. Top-down leadership and autocratic executive decision making is their preference and this is becoming more entrenched as governments persist with excluding Australians from even the most crucial decisions affecting their lives, such as decisions on entry into wars in other countries.

The three key Strategies which have the most potential to increase the chance of the necessary inclusive collaboration between governments and the Australian community are:

1. the **Collaborative Constitutional Convention** proposed under [Gov04.01](#), [Gov04.01.01](#) and other related Strategies;
2. the collaborative process for development of a **National Accord on Wealth, Welfare and Wellbeing** under [Econ04.02](#) and related Strategies, particularly those which have the potential to transition Australia **towards universal income security and universal services security**, namely those for establishment of:
  - a process of citizen-led design of a **universal basic income (UBI)** for all Australians under [Econ04.02.04](#) and related Strategies, and
  - a process of collaboration with the Australian community to select **fair reforms of taxation** sufficient to fund services vital to the wellbeing of all Australians as per [Econ04.03](#), [Econ04.03.01](#) and related Strategies; and
3. the **National People's Voice** under [Gov01.04](#) and the **Independent Commission for National Engagement and Integrated Planning** proposed under [Gov01.04.01](#) and related Strategies.

ACFP has been engaged in preparation of materials necessary for effective participation by Australians and governments in these high priority processes and we will keep everyone informed of developments. Australians wishing to assist may contact ACFP by emailing [info@austcfp.com.au](mailto:info@austcfp.com.au). For more information and updates see:

- the ACFP webpages on [National Collaborative Constitutional Convention](#) and [Implementing Australia Together](#); and
- the webpage entries for the [National Accord on Wealth, Welfare and Wellbeing](#) and [UBI](#).

## Chapter 1 – About the plan

**Australia Together** is a plan in draft. It is Australia's first national integrated community futures plan. "Community" is the operative word.

Because it is designed to provide an organised space in which any and all Australians can consider what we want to achieve in our future and contribute ideas for strategies which fit with that future, **Australia Together is always a live space** – a space of participation in the activity of shaping our future as we would prefer it to be in our democracy. It is where we can constantly converse in an open, organised way about:

- **what** we want to become as a nation,
- **what** we want to leave for future generations, and
- **how** we can travel to that preferred future safely, fairly and with as little pain as possible.

### In this live space:

- **what** we are trying to achieve as a nation will be clear and stable for a reasonable period of time (probably for at least two to three federal election cycles), but
- **how** we are trying to achieve it will be steadily improving and becoming more efficient.

Within the plan, **what** we want to achieve is expressed as a **Vision**. And all the things we want to become as a nation while we are on our way towards that Vision are expressed as **Directions**. The Directions set out the general routes we prefer to take to towards the Vision – the paths we consider to be safe. This also makes it clear which routes we wish to avoid.

**Australia Together** relies on open, inclusive, genuine and thoughtful community engagement. It is structured to give Australians freedom to contribute suggestions for **Strategies** on **how** we can improve our chances of making our Vision a reality. It also provides a space for public assessment of whether suggested Strategies are indeed consistent with the Vision and Directions or whether they will disable us in our movement towards the Vision.

With collective use of the intelligence and good will of Australians, **Australia Together** – and **Australians**, for that matter – will become more sure-footed over time, more capable of delivering a far better future for us all.

*Australia Together*  
is the space where  
Australians can record  
what we want for our future,  
share in its formation,  
improve it together, and  
hold ourselves and our  
governments to account for  
delivery.

### The time horizon of *Australia Together*

**Australia Together** is a plan designed to ensure future generations will be left with an improved and sustainable quality of life. Its function is to stimulate an imagination of an Australia in which *all* Australians can achieve their fullest potential and realise their aspirations, without causing any serious deterioration in our overall quality of life along the way, and preferably improving it. Accordingly, the plan takes a thirty-year view and looks out to the year 2050, recognising that some things will take decades to achieve but others can and must be set up to be achieved sooner.

## Assumptions underpinning the plan

**Australia Together** is built on an assumption that a plan which accommodates us **in all our diversity** is the strongest of all plans. Its purpose is to bring us together, and because we are all different **it is structured to ensure that we can succeed as a cohesive nation because of our diversity, not despite it.**

In **Australia Together** our diversity is not something to be lost, it is to be capitalised on.

This draft of **Australia Together** is the result of detailed research about how a plan for a nation can be effectively and validly structured, how it can be entirely accessible, and how it can change over time as we work together to refine it. This research has been published by the Founder of Australian Community Futures Planning, Bronwyn Kelly, in [By 2050: Planning a better future for our children in 21<sup>st</sup> century democratic Australia](#).

**By 2050** functioned as:

- as an issues paper for Australia at the outset of the 2020 decade, examining our capacity, strengths and weaknesses as a modern economy and a democratic nation;
- an examination of our preparedness for the future; and
- a practical guide on how Australians can organise themselves to plan to secure their preferred future.

For further background on the issues and assumptions underpinning the starting drafts of **Australia Together**:

- visit Australian Community Futures Planning at <https://www.austcfp.com.au/>, or
- read [By 2050](#) available on Amazon Kindle, or
- view the pictorial version of **By 2050** in the videocast series, [The State of Australia in 2020](#), on YouTube.

Research in **By 2050** also led in March 2020 to the establishment of **Australian Community Futures Planning – ACFP**. ACFP was founded for the purpose of encouraging greater participation by Australians in planning their own future as a nation within a 21<sup>st</sup> century democracy. It is an independent centre of excellence in national community futures planning, providing resources and an organising framework that can enable any and all Australians to increase the chances of improving our entire quality of life – our society, our environment, our economy and our governance. Australian Community Futures Planning operates as a centre of excellence by fostering the effective use of [National Integrated Planning & Reporting \(National IP&R\)](#). National IP&R is effectively democracy’s modern agora and is the process by which we can develop the plans most likely to deliver the future we want. **National IP&R operates in cycles aligned to the federal election cycle.** For more information visit <https://www.austcfp.com.au/national-integrated-planning-and-reporting>

## By 2050

### Epilogue

*What can bring us together – and into far happier circumstances – is a particular type of plan: a plan where each of us can see ourselves and through which our particular aspirations will have a better chance of being realised; a plan where we can see that we have not been excluded or forsaken, or asked to abnegate ourselves; a plan where we are not pitted against each other and against our own children; and a plan whereby we can achieve our own aspirations without needing to lessen someone else’s. Indeed, we work on the assumption that we can only realise our aspirations **because** of the diverse aspirations of others.*

## Chapter 2 – The structure of *Australia Together*

***Australia Together*** is being developed by Australians for Australians and is our country's first national community-driven futures plan. It **integrates** our Strategies for a better quality of life by 2050 and makes sure they will fit with the Directions we would prefer to take to reach our Vision. The plan is structured along what is known as the “**Quadruple Bottom Line**” or **QBL**. This simply means that it covers our aspirations for a better:

- *Society,*
- *Environment,*
- *Economy, and*
- *Governance.*

Integration is the key to success

**Integration** of Directions and diverse Strategies – via use of a simple, clear structure and a system of Targets and Indicators for monitoring ongoing wellbeing – is the key to success in delivering the Vision. The more we link our diverse efforts, the less we will suffer by working at cross-purposes to each other and the faster we will move towards our Vision.

This integrating approach is based on a form of community engagement and long term planning and reporting adopted prior to 2010 by local governments in some states of Australia for local community-driven planning. In developing ***Australia Together*** for community engagement, Australian Community Futures Planning has adapted local community “Integrated Planning & Reporting” – or “IP&R” – to devise Australia’s first *National* Integrated Planning & Reporting Framework. Within that framework, ***Australia Together*** is Australia’s first National Community Futures Plan.

**National IP&R brings democracy alive, efficiently.**  
It allows Australians in all their diversity to connect and build a coherent plan for safe arrival in a truly preferred future – a future which is yet to be realised but which is out there waiting to be seized.

**National IP&R**  
is effectively democracy’s modern agora.  
It is an open space in which we can work together to develop the plans most likely to deliver the future we want.

## How has the Vision for *Australia Together* been developed?

The **Vision for *Australia Together*** is a draft for purposes of discussion by Australians. It has been developed by analysing a range of long term Vision statements that have been put together already by Australians in an array of community engagement and survey programs conducted in various parts of Australia in the decades to 2020. These include:

- visions developed by local councils across Australia in consultation with their communities;
- visions (or approximations of visions) developed by some state governments for the future of their states;
- a vision for “Australia reMADE”, developed via a wide-ranging community engagement program in 2017 by a group of civil society and environmental organisations in association with the National Congress of Australia’s First Peoples;
- a vision of the aspirations of Australians developed by the Australian Bureau of Statistics in association with its Measures of Australia’s Progress program in 2013; and
- an “outlook vision” developed by member organisations of the Australian National Outlook 2019 (National Australia Bank, business leaders, universities, non-profits and the CSIRO).

The Vision for ***Australia Together*** takes elements of all these visions and puts them together, along with some others such as:

- the United Nations Sustainable Development Goals (to which Australia is a signatory);
- the Business Council of Australia’s “Vision for Australia”; and
- the Centre for Policy Development’s 2017 Discussion Paper, “What Do Australians Want?”.

There is a reasonable certainty that the resultant draft Vision will resonate with Australians, due to the fact that it has been sourced from very diverse communities of interest. Despite their diversity, these communities of interest have shown a staggeringly similar understanding of the hopes and dreams of Australians. Nevertheless, at the outset of every planning cycle (every three to four years) the support of Australians for the Vision for ***Australia Together*** should be assessed by statistically valid nation-wide surveys. This is subject to availability of resources. ACFP routinely scans research findings about changes in the values of Australians and their preferences for their future, and adjusts the draft Vision as changes are detected. Further information on how the Vision has been drafted can be found in **By 2050** or on the ACFP website at <https://www.austcfp.com.au/vision-and-directions-of-australia-together> and [Where did the Vision for Australia Together come from?](https://www.austcfp.com.au/blog) at <https://www.austcfp.com.au/blog>

For Issue No. 7 of *Australia Together*, the draft Vision was updated to reflect the findings of research about Australian Values, documented in [The People’s Constitution: the path to empowerment of Australians in a 21<sup>st</sup> century democracy](#) by ACFP’s Founder, Bronwyn Kelly.

No further changes have been made to the Vision for Issue No. 8.

## How have the Directions of *Australia Together* been developed?

Like the Vision, the Directions of *Australia Together* are a draft for purposes of discussion by Australians. They have been built first by taking the “topic areas” of policy, legislation, administration, institutions and services that we rely on when running our country and grouping them into the above mentioned four categories of **Society**, **Environment**, **Economy** and **Governance**.

Once these topic areas of policy and administration have been assembled into the QBL framework, we can describe a preferred Direction of travel in each topic area. Effectively, this functions to describe in more detail what we want to become as a nation, and we can reconcile this back to the Vision.

The Directions of the plan for *Australia Together* constitute the means of **safely** steering ourselves toward the preferred future described in our Vision. They are signposts that help us avoid the costly mistakes of taking paths in policy, legislation, administration, institutions and services that might drag us away from realising the Vision. Directions are essentially part of the Vision – creating a surer path for us for selection of the most effective and equitable set of Strategies.

For *Australia Together*, 57 topic areas have been isolated and grouped into the QBL framework as set out below. Each quadrant in the QBL has been assigned a colour, for ease of navigation through the plan. A numbering system has also been designed for tracking purposes and to assist people to see clearly how Indicators, Targets and Strategies are contributing to the fulfilment of various Directions. The 57 topic areas are distributed across the quadrants as shown here.

Quadrant	Topic areas for the Directions of <i>Australia Together</i>	
<p><b>Our Society</b></p>	Soc 1	Safety
	Soc 2	Indigenous heart
	Soc 3	Belonging & inclusion
	Soc 4	Health & wellbeing
	Soc 5	Education
	Soc 6	Equality
	Soc 7	Diversity
	Soc 8	Women & LGBTIQ+
	Soc 9	Housing
	Soc 10	Family cohesion & community services
	Soc 11	Early childhood care
	Soc 12	Aged care & disability services
	Soc 13	Arts & culture
	Soc 14	Police services
	Soc 15	Justice
	Soc 16	Emergency services

Quadrant	Topic areas for the Directions of Australia Together	
<p><b>Our Environment</b></p> 	Env 1	Environmental advocacy
	Env 2	Climate change prevention
	Env 3	Climate change adaptation
	Env 4	Environmental regulation & approvals
	Env 5	Environmental education
	Env 6	Energy
	Env 7	Transport
	Env 8	Agriculture & fisheries
	Env 9	Fresh water supply
	Env 10	Biodiversity
	Env 11	Vegetation
	Env 12	Land & resource conservation
	Env 13	Parks & open space
	Env 14	Air & water quality
	Env 15	Marine protection
	Env 16	Waste reduction & recycling
	Env 17	Architectural & cultural site heritage
	Env 18	Cities planning
	Env 19	Regional planning

Quadrant	Topic areas for the Directions of Australia Together	
<p><b>Our Economy</b></p> 	Econ 1	Economic planning, growth & transition
	Econ 2	Employment planning, industrial reform & economic transition
	Econ 3	Equitable improvement in living standards
	Econ 4	National wealth generation & sharing
	Econ 5	Market regulation & competition policy
	Econ 6	Government competitive business participation
	Econ 7	Science, research, innovation & collaboration
	Econ 8	Technology development & digitisation
	Econ 9	International economic engagement & trade

Quadrant	Topic areas for the Directions of Australia Together	
<p><b>Our Governance</b></p> 	Gov 1	Strength of democracy
	Gov 2	National values & identity
	Gov 3	Human & other rights
	Gov 4	Constitutional reform
	Gov 5	Transparency, openness & accountability
	Gov 6	Government ethics
	Gov 7	Public service independence & excellence
	Gov 8	Electoral system & funding reform
	Gov 9	Corporate & NGO responsibility
	Gov 10	Free communications policy & regulation
	Gov 11	International participation & global justice
	Gov 12	Peace & security
	Gov 13	Humanitarian effort

Direction statements for each topic area

Within each topic area a description has been applied about a Direction of travel. These Directions describe what Australia will become in accordance with the Vision if we travel via certain routes. They are our signposts for safe travel. As stated above, the Directions form part of the Vision but they also serve to guide progress away from routes we wish to avoid. For instance, in relation to the topic area of **Society 12 – Aged care & disability services**, a Direction statement has been selected suggesting that Australia will become “a sure provider of lifelong dignity”. This expression of a Direction is a safeguard against exclusion of a potentially disadvantaged group. **The 57 Direction Statements taken together could be said to describe the character of the nation, land and home that Australia will become if, as a collective, we pursue the Vision via these 57 routes.**

Australians can provide comments at any time on the Directions at <https://www.austcfp.com.au/survey-forms>. They can also make suggestions about Targets and Strategies that should be included in *Australia Together* at <https://www.austcfp.com.au/make-a-suggestion>

### How are Targets & Indicators being developed for *Australia Together*?

The quadruple bottom line planning framework provides a convenient way of organising Targets and Indicators that we can then use to monitor our progress towards or away from the Vision and whether we are still on course with the Directions. This QBL approach is not new. It is an approach that has been taken by agencies such as the Australian Bureau of Statistics in its Measures of Australia’s Progress (MAP) project. Due to withdrawal of government funding, MAP was closed down in 2014. In *Australia Together*, ACFP is re-starting the QBL method to organise a **National Wellbeing Index**. **This comprehensive Index is more detailed and integrated than the MAP project and will function not just as a register of baseline data but as a mechanism for connecting baselines to Targets. This is new. These connections will make it possible not just to transparently measure “progress” (as MAP did) but to gauge our movement towards or away from the specific Targets that have been deemed to be consistent with preferred Directions and the Vision.**

In *Australia Together*, Indicators of wellbeing in terms of society, the environment, the economy and governance are being collected from a variety of sources. As they are collected, they will be connected to Targets.

For a number of Targets, connections can also be made with the United Nations’ Sustainable Development Goals (SDGs). Australia is a signatory to the UNSDGs which means that as a nation we have already made commitments meet to seventeen SDGs by 2030. Targets in *Australia Together* are entirely consistent with the adopted SDGs but the QBL National Wellbeing Index in this plan provides a more comprehensive monitoring system for progress towards the SDGs and extends beyond 2030.

## How are Strategies being developed for *Australia Together*?

Strategies for ***Australia Together*** are being developed over time via two processes.

### Process 1 – Integrating existing Strategies:

This involves establishing a framework in which existing Strategies that have potential to deliver our Vision can be progressively gathered and integrated. At the outset of the 2020s, Australia had no central location which registers Strategies already in existence and no way of linking them to determine whether they overlap, double up, enhance each other or defeat each other. Because this central portal did not exist there was also no efficient way of determining where Strategies that we need do not yet exist. ***Australia Together*** is being built slowly to function as such a portal, a place to which anyone can go to search for Strategies that are consistent with the Vision for ***Australia Together*** and to create networks of cooperation for Strategy.

### Process 2 – Imagining new Strategies:

This involves examining each of the Directions, setting Targets for how far we wish to travel in that Direction and imagining new Strategies that will take us to the Target. Targets and Strategies emerging from this process will often contribute to the achievement of more than one Direction. This is the virtue of Integrated Planning & Reporting. Within the framework, imagination enhances the power of all the other Strategies.

## How are decisions made about inclusion of Targets and Strategies?

**National IP&R** is a community driven – bottom-up – planning process where the intention is that the community’s ownership of ***Australia Together*** can grow over time and we can reach a high degree of confidence that the plan does indeed present the best possible chance of delivering the future we want **in all our diversity**.

Accordingly, once a draft Vision and Directions have been assembled, suggestions can be made by anyone for inclusion of a Target or Strategy in the plan. Indeed, the IP&R process welcomes such creativity and participation. It is designed to inspire Australians to be expansive in their thinking about what can be achieved in social cohesion, environmental and economic sustainability, and fair and ethical governance. However, a case must be made each time as to whether and how a suggestion will contribute positively to particular Directions and to the Vision and will do so without unduly disabling other parts of the plan.

In ***Australia Together***, ACFP has incorporated over 360 Targets and Strategies which have been selected after detailed examination in **By 2050** of issues affecting Australia’s future and in subsequent research. They have been assembled to form “**a starting draft plan**”, and this is constantly being revised with the input of Australians.

Additional Targets and Strategies will be added and existing ones can be revised, replaced or deleted at any time within an orderly assessment framework. Targets and Strategies can be selected for inclusion in the ***Australia Together*** National Wellbeing Index if:

- they are of national strategic significance, and

- it can be demonstrated that they will contribute to achievement of the Vision (whatever it may be) via the safe routes described in the Directions (whatever they may be).

Any Australian can suggest a Target or Strategy. There is really only one central rule in this selection system and this rule is designed to:

- protect the people’s integrated planning system from a loss of its independence through political interference; and
- prevent exclusion of diverse communities from participating in development of Strategies that are necessary to ensure they can find a place of equality and safety in Australia in the future.

**The rule is that everyone must be able to find a place for their future and to that end no target or strategy can be included in the plan unless it can be demonstrated that it follows at least one of the 57 Directions of the plan and does not disable other Strategies which do follow the Directions.**

**In this arrangement, the Vision and Directions act as an independent, apolitical, non-partisan selection system for strategic initiatives that will reliably and efficiently drive the nation towards the Vision of we the people. It functions as an efficient quarrel solver about the best strategies.**

If, because of an expressed change of preference by the Australian people, the Vision or Directions change over time, this may admit different Targets and Strategies into the plan. But the Integrated Planning system itself will then work just as well to help Australians isolate the most reliable and efficient Targets and Strategies for the new Vision and Directions.

If Australians get the Vision and Directions right – so that they accurately reflect the aspirations of a diverse but cohesive community of Australians working together – then the Integrated Planning system will automatically ensure that selected Targets and Strategies will fit with that community’s Vision and Directions. Find out how to become involved in using this framework at <https://www.austcfp.com.au/become-involved>

## The efficient structure of *Australia Together*

ACFP has developed a structure for *Australia Together* so that it will function as an efficient way of selecting the best combination of Targets and Strategies to make the *Vision for Australia Together* a reality. We call this system a signpost system.

In *Australia Together* the Directions of travel in accordance with these signposts are **socially inclusive, equitable and intelligent, environmentally sustainable, economically fair and resilient, and democratically open and ethical.**

The structure of *Australia Together* makes it easy to use this signpost system to integrate Targets and Strategies with the preferred *Directions* of Australia. It provides an automatic safe selection system for policies.

### 57 Directions in the Vision for *Australia Together* function as sign posts of the safe routes to the future

**16 directions for our society**

Socially inclusive, equitable and intelligent  
Economically fair and resilient

**9 directions for our economy**

**19 directions for our environment**

Environmentally sustainable  
Democratically open and ethical

**13 directions for governance**

### Important Note

**Australia Together** begins the process of Strategy development and prioritisation by focussing in the first instance on twenty key issues that must be solved by 2030 if we are to arrive safely in 2050 with an acceptable degree of wellbeing and security.

These issues are identified in the videocast series:

[The State of Australia in 2020](#) and  
[The State of Australia 2022](#)

**Australia Together** links key Targets and Strategies.

The linked priority Targets and Strategies isolated thus far are set out in more detail in Chapter 9 under headings shown below for **Society**, **Environment**, **Economy** and **Governance**.

**This list will grow with each edition of**

*Australia Together.*

Top priority Targets and Strategies for our society

	<h3>Top priority Targets and Strategies in Our Society (Starting Draft)</h3>
<p>First Nations constitutional recognition, Makarrata, treaty, justice and reconciliation – Constitutional recognition of First Nations – Statement of Acceptance of the Principle of Coexistence of Sovereignties</p>	<p>Soc02.01</p>
<p>First Nations constitutional recognition, Makarrata, treaty, justice and reconciliation – Constitutional reform to establish a First Nations Voice in the Constitution</p>	<p>Soc02.01.01</p>
<p>First Nations constitutional recognition, Makarrata, treaty, justice and reconciliation – Makarrata Commission</p>	<p>Soc02.01.02</p>
<p>Security of funding for health</p>	<p>Soc04.07</p>
<p>Security of funding for health – Abolition of subsidies for private health insurance and reinstatement of universal health care in public and private hospitals funded by a single public fund based on a fair Medicare levy</p>	<p>Soc04.07.01</p>
<p>Security of funding for health – Development of plans to implement integrated funding for and delivery of all public and private hospital services</p>	<p>Soc04.07.02</p>
<p>Health accessibility – reform of universal health care (Medicare)</p>	<p>Soc04.09</p>

## Top priority Targets and Strategies in Our Society (Starting Draft)

Health system sustainability and universality – scholarships and bonds for medical students	Soc04.10
Tertiary education – Reintroduction of fee-free tertiary education	Soc05.01
Tertiary education – security of funding for universities	Soc05.01.02
Tertiary education – reform of governance in public universities	Soc05.01.04
School education funding equity - Reversal of public school underfunding and private school overfunding	Soc05.02.01
Lifelong education – Education as a right	Soc05.04
Constitutional reform – Elimination of racism in Australian law	Soc07.03
Women’s National Integrated Reform Program for Safety, Respect and Equity	Soc08.02
National Women’s Council for oversight of the Women’s National Integrated Reform Program for Safety, Respect and Equity	Soc08.02.01
Housing as a right	Soc09.03
Housing supply – Elimination of the social and public housing waiting list	Soc09.04.01
Housing supply – Establishment of a federal Department of Housing	Soc09.04.02
Housing supply – Creation of sufficient supply through adjusted taxation policy	Soc09.04.03
Housing supply – Creation of sufficient supply through control of immigration	Soc09.04.04
Housing supply – Creation of sufficient supply through market regulation	Soc09.04.05
Domestic abuse – Support and funding	Soc10.05
Funding for childcare – Universal access to free Early Childhood Education and Care	Soc11.01
Aged Care Royal Commission, implementation of recommendations – new independent and accountable institutional arrangements	Soc12.03.01
Aged care funding – Federal budget minimums	Soc12.04
Pilot scheme for a universal basic income – UBI for artists	Soc13.01
Preparedness for Global Crises – Sovereign Capability Strategy for National Resilience in Global Crises	Soc16.01

	<b>Top priority Targets and Strategies in Our Society (Starting Draft)</b>	
<b>Preparedness for and prevention of disasters in Australia – Statement of Adherence to and Performance on the National Disaster Risk Reduction Framework</b>	<b>Soc16.02</b>	
<b>Preparedness for and prevention of disasters in Australia – National Community Council for Risk Reduction Review</b>	<b>Soc16.02.01</b>	

Top priority Targets and Strategies for our environment

	<b>Top priority Targets and Strategies in Our Environment (Starting Draft)</b>	
<b>Reformation of Australia’s negotiating stance and conduct in Paris Agreement negotiations – Commitment to emitting no more than a fair share of a global carbon budget</b>	<b>Env01.01</b>	
<b>Achievement of net zero carbon emissions within a carbon budget that will maximise chances of limiting global heating as near as possible to 1.5° Celsius</b>	<b>Env02.01</b>	
<b>Carbon emissions reduction – Emissions reduction target for 2030</b>	<b>Env02.01.01</b>	
<b>Carbon emissions reduction – Achievement of net zero emissions by 2033 within the carbon budget</b>	<b>Env02.01.02</b>	
<b>Planetary heating – Limitation of global temperature rise</b>	<b>Env02.01.03</b>	
<b>Planetary heating – Limitation of annual mean temperature rises in Australia</b>	<b>Env02.01.04</b>	
<b>Elimination of fossil fuel subsidies</b>	<b>Env02.02</b>	
<b>Cessation of new coal, gas and oil investments – legislative program</b>	<b>Env02.03</b>	
<b>Phase out of existing investments in coal, oil and gas – legislative program</b>	<b>Env02.04</b>	
<b>Elimination of military greenhouse gas emissions</b>	<b>Env02.04.01</b>	
<b>Accountability for achievement of commitments to stop climate change – Sovereign and personal liability for ecocide or genocide through climate change</b>	<b>Env02.05.01</b>	
<b>National Climate Change Prevention, Mitigation and Adaptation Commission</b>	<b>Env03.01</b>	

## Top priority Targets and Strategies in Our Environment (Starting Draft)

Overhaul of the Environment Protection and Biodiversity Conservation Act 1999	Env04.01
National Electricity Market system investment and security	Env06.02
National Renewable Energy Targets (RETs) – setting targets for economic sustainability and prevention of global heating	Env06.03
National Renewable Energy Storage Target	Env06.04
Inter city-regional rapid public transport	Env07.01
Inter city-regional rapid public transport - federal funding	Env07.01.01
Sustainability of agriculture – Transition to food security in the age of climate change	Env08.01
Legislation establishing a measurable baseline and target consistent with the global goal of reaching Nature Positive by 2030	Env10.03
Strengthening the Nature Positive Plan to ensure biodiversity loss is halted by 2030	Env10.03.01
Forests and environmental plantings – Legislated program to increase GDP and returns to landholders and mitigate climate change by increasing native forestry cover and restoring degraded ecosystems	Env11.01
Cessation of native forest logging – Urgent legislation	Env12.02
Urban consolidation – Legislation to change urban planning to increase housing within major city ‘middle rings’	Env18.01.01

Top priority Targets and Strategies for our economy

## Top priority Targets and Strategies in Our Economy (Starting Draft)

Population growth – Strategic planning for population	Econ01.03.03
Economic composition and transformations – Transition away from export of both fossil fuels and the raw materials used in production of steel, aluminium, fertilisers, polysilicon, etc., and towards export of zero emissions goods	Econ01.06.01

## Top priority Targets and Strategies in Our Economy (Starting Draft)

Economic composition and transformations – Expansion of manufacturing as a share of Australia’s economy	Econ01.06.03
Economic composition and transformations – Carbon credits market development & a Carbon in the Land and Sea Finance and Trading Corporation	Econ01.07
Reintroduction of a price on carbon	Econ01.08
Integrated & Funded Program for Meeting Australia’s Commitments to the United Nations Sustainable Development Goals (UNSDGs)	Econ01.09
Employment planning – National plan for full employment supported by a social wage	Econ02.04
Employment planning – Increasing government sector participation in the economy by a program of expansion of public sector employment in health, aged care, disability services, employment and welfare services, education, housing, conservation and land care, renewable energy, buildings efficiency and transport	Econ02.04.01
Economic transition funding to drive sector-wide transformations with safety nets – National Economic Transitions Commission	Econ02.05
National Accord on Wealth, Welfare and Wellbeing – Establishment of a National Accord on Wealth, Welfare and Wellbeing	Econ04.02
National Accord on Wealth, Welfare and Wellbeing – Revocation of policies restricting government sector participation in Australia’s economy	Econ04.02.01
National Accord on Wealth, Welfare and Wellbeing – Community engagement on and justification of national budget priorities – participatory budgeting	Econ04.02.02
National Accord on Wealth, Welfare and Wellbeing – Community Australia Bank	Econ04.02.03
National Accord on Wealth, Welfare and Wellbeing – Community engagement on introduction of a universal basic income	Econ04.02.04
Fair & progressive taxation – Restoration of a fair and progressive taxation system	Econ04.03
Fair & progressive taxation – Transformation of Australia’s taxation system consistent with transition to universal income security and universal services security under a National Accord on Wealth, Welfare and Wellbeing	Econ04.03.01
Electronic financial transactions tax	Econ04.07

	<b>Top priority Targets and Strategies in Our Economy (Starting Draft)</b>
National Competition Policy review	Econ05.01
Government sector workforce plan and economic participation – Program for recovery of ownership and operation of government trading enterprises	Econ06.01
Program for recovery of ownership and operation of government trading enterprises – direct investment of public funds	Econ06.01.01
Program for recovery of ownership and operation of government trading enterprises – publication of plans	Econ06.01.02
Research and Development Expenditure – Increasing public and private investment in R&D	Econ07.01

Top priority Targets and Strategies for our governance

	<b>Top priority Targets and Strategies in Our Governance (Starting Draft)</b>
Participation in democracy – Legislation to lower the voting age to 16 years	Gov01.03.03
Constitutional reform – Establishment of The National People’s Voice – Legislation in lieu of the more preferable constitutional enshrinement	Gov01.04
Constitutional reform – Independent Commission for National Engagement and Integrated Planning	Gov01.04.01
Constitutional reform – A National Agreement on Human Rights and Obligations in the Australian Constitution	Gov03.01
Constitutional reform – Nation-wide community engagement for enshrinement of a National Agreement on Human Rights and Obligations in the Constitution	Gov03.01.01
Constitutional reform – A National Agreement on Human Rights and Obligations in the Constitution – Rights conferred under international treaties, conventions and covenants	Gov03.01.02
Legislated obligation for parliamentarians and members of the executive to swear a Statement of Commitment to the Rights of Future Generations of Australians	Gov03.01.03
Constitutional reform – Constitutional convention	Gov04.01

## Top priority Targets and Strategies in Our Governance (Starting Draft)

Constitutional reform – National Collaborative Process for Development of The Australian People’s Constitution	Gov04.01.01
Openness and accountability of governments – Royal Commission and community engagement to review national security legislation and its impact on key safeguards for Australia’s democracy, including free speech, freedom of the press and transparency in government conduct	Gov05.02
Openness and accountability of governments – Protection of whistleblowers making genuine public interest disclosures	Gov05.02.01
Establishment of a National Independent Whistleblower Protection Authority	Gov05.02.02
Legislation prohibiting failure to disclose findings of risk assessments and inquiries identifying security and safety threats to Australia and its people	Gov05.02.03
Security of funding for open and accountable governance	Gov05.03
Post-separation employment of politicians – Stopping the revolving door	Gov05.05
Binding code of ethics and conduct for federal parliamentarians	Gov06.03
Compulsory and satisfactory completion of training in ethics and proof of competency in permissible voting practice for parliamentarians	Gov06.03.01
Constitutional reform – Community engagement on electoral funding reform	Gov08.02
Electoral funding and expenditure reform – Prohibition and/or regulation of permissible donations to political parties and candidates	Gov08.02.01
Electoral funding and expenditure reform – Imposition of spending caps for political parties, candidates and associated entities (“third parties”) in elections	Gov08.02.02
Electoral funding and expenditure reform – Protection of democracy through introduction of equitable taxpayer funding for elections	Gov08.02.03
Prohibition of rent-seeking by for-profit companies in certain community services	Gov09.03
Prohibition of government contracts to private sector companies that do not have certified plans to achieve net zero carbon emissions by 2033	Gov09.04
Regulation of corporate misconduct – Reform of the Australian Securities and Investments Commission (ASIC)	Gov09.05

## Top priority Targets and Strategies in Our Governance (Starting Draft)

Regulation of an ethical, democratic information market – Development of a national regulatory framework for an ethical, democratic information market	Gov10.02
Regulation and codes of ethical conduct for news media and social media – Independent regulation of compliance with a code of ethical conduct by publishers and social media – development of a model Code	Gov10.03
Protection of refugees seeking asylum	Gov11.03
Strategic planning for humanitarian aid and global adaptation in response to climate change	Gov11.04
Earth Systems Treaty – Proposal for establishment in international law	Gov11.05
Earth Systems Treaty – Promotion in Australia	Gov11.05.01
Promotion of peace in a multipolar world – Championship of peace at home and abroad	Gov12.01.04
Promotion of peace and economic cooperation in a multipolar world – Planning for transition to peaceful cooperation for economic prosperity in a multipolar world	Gov12.01.05
Arms control – Prohibition of weapons exports	Gov12.02
Arms control – Ratification of and conformance with the Treaty on the Prohibition of Nuclear Weapons (TPNW)	Gov12.02.01
Prohibition of funding of public institutions and officials by foreign owned or domestically owned/operated arms dealers or manufacturers	Gov12.03
Defence, diplomacy and security policy – Integrated Strategy for Defence, Diplomacy and Security	Gov12.04
Defence, diplomacy and security policy – Green Paper and community engagement to define Australia’s Strategic Interests in Territorial Sovereign Defence	Gov12.04.01
Defence, diplomacy and security policy – Adoption of a legally binding commitment to neutrality for Australia in international confrontations between major powers (such as the USA, China and Russia)	Gov12.04.02
National plan for safe withdrawal from activities, agreements and alliances inhibiting sovereign independence and peace	Gov12.04.03
Constitutional reform – Parliamentary supremacy in decisions on entry into war	Gov12.06

## The final component of the cycle of IP&R – the End of Term Report

A key feature of Integrated Planning & Reporting is, of course, regular comprehensive reporting. The **End of Term Report** is a factual report on movement towards or away from Targets relative to the baselines established in the plan. Baselines are set out for every Target, Indicator and Strategy alongside a list of which Directions they contribute to. Many Targets and Strategies contribute not just to one but also to several Directions at once.

The baseline data form the basis of the QBL **National Wellbeing Index** but they are linked with Indicators, Targets and Strategies and Directions for measurement purposes. End of Term Reports roll up lots of data into easily viewed pictures of the truth about our changing wellbeing – both the perception of it and the physical reality. At election time, or throughout the period of the elected parliament, anyone can go to this one-stop-shop for non-partisan evidence about movement towards or away from our Vision for a better life.

An End of Term Report, based on the data in the National Wellbeing Index was completed for the inaugural cycle of National IP&R for the 46<sup>th</sup> Parliament of Australia. Readers may access the End of Term Report for the 46<sup>th</sup> Parliament at <https://www.austcfp.com.au/state-of-australia>.

The following diagram indicates how the National Wellbeing Index is laid out in **Australia Together** and how results are currently depicted in the End of Term Report. Rolled up results can be viewed in Chapter 2 of the Report by clicking on the image at right.

Australia Together National Wellbeing Index - Original			End of Term Report
Indicator, Target or Strategy	Direction	Baseline	Report on progress
<b>Indicators, Targets &amp; Strategies for the success of Our Society</b>			
<b>Society 1 – Safety</b>			
Indicators, Targets & Strategies for successful performance	In the Directions of becoming ...	Baseline data	Direction of movement from baseline
<b>Perceptions of safety and trust in the community</b> Soc01.07.01 The proportion of Australians reporting trust in “most people” increases continuously.	<b>Soc 1</b> A safe home.	In 2019, 55.2% of Australians on survey felt “most people could be trusted”, up slightly from 54.4% in 2014. Source: ABS General Social Survey 2020, Table 17.1	In 2020, 61.9% of Australians on survey felt “most people could be trusted”, up from 55.2% in 2019. <b>Safety in the context of world events and national security</b> Soc01.08 The percentage of people who report feeling safe or very safe when considering world events and/or national security exceeds 90% annually.	<b>Soc 1</b> A safe home.  <b>Gov 12</b> A nation assured of enduring peace.	In 2021, seven in ten Australians (70%) said that in view of world events they felt ‘very safe’ or ‘safe’, an improvement from 50% in 2020 but a decrease from 92% in 2010. Source: Lowy Institute Poll 2021	Updated data not yet available. The shorter term trend was positive. → The longer term trend is distinctly negative with 6% of Australians reporting that they feel very safe in 2021, down from 44% in 2009, and 70% feeling safe or very safe in 2021, down from 90% in 2009. Source: Lowy Institute Poll 2021 ←

## Chapter 3 – The Directions of *Australia Together*

In *Australia Together*, the Directions of travel are:

- **socially inclusive, equitable and intelligent**,
- **environmentally sustainable**,
- **economically fair and resilient**, and
- **democratically open and ethical**.

To describe the safe path in each topic area, a single Direction Statement has been drafted as the probable acceptable course towards the Vision, based on reviews of the preferences of Australians over the decade to 2020 about their aspirations, values, dreams, and concerns for their quality of life. The Targets and Indicators of the plan have been scoped to enable us to travel safely in these Directions.

If Australians, on survey, prefer to travel in Directions different to these, then amendments will need to be made to the Directions. However, in this event it is unlikely that amendments will need to be made to Indicators and baselines due to the fact that the Directions, Targets and Indicators are organised along the QBL and therefore cover all the topic areas of policy, legislation, administration, institutions and services that we need to monitor anyway if we are to be assured that our country is being run efficiently. These Indicators and baselines are just as likely to work well for modified Directions, and the work on the QBL National Wellbeing Index should not therefore be wasted.

**Both the Vision for *Australia Together* and the Direction Statements can be sanity checked by Australians via a simple method. This involves imagining them in reverse – imagining becoming the opposite of the way the Australia of the future is described in the Directions. Such an exercise is useful in two ways.**

Firstly, it helps us see that, when it comes to what we want for the future, we hold “staggeringly similar” sets of values and aspirations. This is a nation entirely capable of thinking and acting together for a shared long-term outcome.

Secondly, imagining the reverse of the Direction Statements helps us identify and steer ourselves away from what we want to avoid in our future. The Direction Statements are a way of organising our collective efforts to make our “staggeringly similar” dreams a reality. They give a practical boost to our chances of making our ideal future a reality.

Surveys about the values of Australians consistently indicate that we can envision and agree on what we want easily enough. But we are not organised to get there. The Directions Statements help us get organised. They help us work together, instead of tripping each other up. The next sections provide the starting draft of the Directions for *Australia Together*.

**“ By 2050  
Chapter 11**

*Some will believe that Australia cannot possibly become these things. But there is no reason not to want to be these things, and every reason to avoid becoming the reverse.*

**Directions for Our Society**

<b>In Our Society</b>		.....	<b>Australia becomes:</b>
Soc 1	Safety	.....	A safe home
Soc 2	Indigenous heart	.....	A land with an Indigenous heart
Soc 3	Belonging & inclusion	.....	Inclusive, welcoming & enabling
Soc 4	Health & wellbeing	.....	A place of optimal health & wellbeing
Soc 5	Education	.....	A model of lifelong educational opportunity
Soc 6	Equality	.....	A society of equals
Soc 7	Diversity	.....	A success because of its diversity
Soc 8	Women & LGBTIQ+	.....	A success because of gender equality
Soc 9	Housing	.....	A land without homelessness & with decent affordable housing for all
Soc 10	Family cohesion & community services	.....	A place of supportive familial & other connections & without domestic abuse
Soc 11	Early childhood care	.....	A land without child disadvantage
Soc 12	Aged care & disability services	.....	A sure provider of lifelong dignity
Soc 13	Arts & culture	.....	A wellspring of inspiration & creativity
Soc 14	Police services	.....	A model of community service & responsible exercise of authority in policing
Soc 15	Justice	.....	Confident of justice for all
Soc 16	Emergency services	.....	A society prepared & resilient in times of disaster

**Directions for our Environment**

<b>In Our Environment</b>		.....	<b>Australia becomes:</b>
Env 1	Environmental advocacy	.....	A leading global advocate for action on climate change
Env 2	Climate change prevention	.....	A net zero emissions nation
Env 3	Climate change adaptation	.....	A proactive planner of climate change adaptation
Env 4	Environmental regulation & approvals	.....	A nation that puts the environment before unsustainable consumption
Env 5	Environmental education	.....	An environmentally educated community
Env 6	Energy	.....	A renewable energy superpower
Env 7	Transport	.....	Efficiently connected with zero-emissions transport
Env 8	Agriculture & fisheries	.....	Environmentally & economically sustainable in agriculture & fisheries
Env 9	Fresh water supply	.....	Confident of the safety & security of its water supplies
Env 10	Biodiversity	.....	A biodiversity haven
Env 11	Vegetation	.....	A replanted & reforested land
Env 12	Land & resource conservation	.....	A protector of scarce resources
Env 13	Parks & open space	.....	A provider of accessible national & urban parkland
Env 14	Air & water quality	.....	A pollution free biosphere
Env 15	Marine protection	.....	A marine wildlife haven
Env 16	Waste reduction & recycling	.....	Regenerative by design in consumption & production
Env 17	Architectural & cultural site heritage	.....	A conservator of cultural & built heritage
Env 18	Cities planning	.....	Multi-central in its cities, efficiently connecting people with jobs, health, education & recreation
Env 19	Regional planning	.....	A land of thriving self-supporting regions

**Directions for Our Economy**

<b>In Our Economy</b>		.....	<b>Australia becomes:</b>
<b>Econ 1</b>	Economic planning, growth & transition	.....	A model of transition from excessive consumption to sustainability
<b>Econ 2</b>	Employment planning, industrial reform & economic transition	.....	A model of employment planning & justice in industrial reform & economic transitions
<b>Econ 3</b>	Equitable improvement in living standards	.....	A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all
<b>Econ 4</b>	National wealth generation & sharing	.....	A nation fairly raising & sharing its wealth
<b>Econ 5</b>	Market regulation & competition policy	.....	A strong regulator of fairness in markets, creating confidence for investors
<b>Econ 6</b>	Government competitive business participation	.....	An economy with competitive & profitable public sector participation
<b>Econ 7</b>	Science, research, innovation & collaboration	.....	A collaborative, intelligent nation
<b>Econ 8</b>	Technology development & digitisation	.....	Enabled in meeting the communication & information demands of the future
<b>Econ 9</b>	International economic engagement & trade	.....	Productive & prosperous through fair & ethical trade agreements, labour hire & procurement

**Directions for Our Governance**

<b>In Our Governance</b>		.....	<b>Australia becomes:</b>
<b>Gov 1</b>	Strength of democracy	.....	A proactive participatory democracy
<b>Gov 2</b>	National values & identity	.....	A nation knowing & affirming decency
<b>Gov 3</b>	Human & other rights	.....	A nation with avowed rights for all
<b>Gov 4</b>	Constitutional reform	.....	A free, self-governing, modern nation
<b>Gov 5</b>	Transparency, openness & accountability	.....	Open, transparent & accountable in its governments & institutions
<b>Gov 6</b>	Government ethics	.....	A world benchmark in leaders' conduct
<b>Gov 7</b>	Public service independence & excellence	.....	Committed to public service independence & excellence
<b>Gov 8</b>	Electoral system & funding reform	.....	Protected from undue sectional influence in elections
<b>Gov 9</b>	Corporate & NGO responsibility	.....	A nation outlawing corporate greed & where private sector business practice & ethics serve the public good
<b>Gov 10</b>	Free communications policy & regulation	.....	A guardian of freedom & accountability in political discourse, news media & the wider information market
<b>Gov 11</b>	International participation & global justice	.....	A just & cooperative participant on the global stage
<b>Gov 12</b>	Peace & security	.....	A nation assured of enduring peace
<b>Gov 13</b>	Humanitarian effort	.....	A nation leading in empathy & global cohesion

## Chapter 4 – The Indicators, Baselines, Targets & Strategies of *Australia Together* – the QBL National Wellbeing Index

With any strategic plan we need to know just how far we want to travel in the Directions we've set. We need to have our eye firmly on the preferred Targets and make sure we select the best available Indicators of progress towards those Targets.

Sometimes the Targets can be expressed in terms of tangible physical outcomes that we want or as Strategies we wish to implement. At other times, especially if we're trying to measure social wellbeing, it's not so easy to define a "hard edged" objective Target. In that case we need to rely on somewhat more subjective or qualitative impressions, and the consensus about those, to get an "indication" of progress rather than an objective or physically quantifiable measure of it.

**Australia Together** aims to measure progress:

- toward or away from the Vision, **and**
- toward or away from our Quadruple Bottom Line aspirations for the type of society, environment, economy and governance we want.

This comprehends that our wellbeing is a function of a web of multiple but interconnected factors. For the purpose of measuring this progress, **Australia Together** must build and rely on a mixture of:

- objective Targets and Strategies for physical outcomes, and
- more subjective indicators of improving quality of life as evidenced by surveys of community attitudes, perceptions and satisfaction.

Taken together these will give us a reliable holistic picture of wellbeing for ourselves and the environment, economy and democracy we live in – as the interdependent things that they are.

### The level of ambition in Targets & Strategies

The Targets and Strategies in **Australia Together** are being set at various levels of ambition.

- Sometimes the ambition will be simply to maintain the status quo and ensure that quality of life on those particular Indicators does not deteriorate – at least until Australians decide they want to strive for a significant improvement.
- At other times, the Targets and Strategies will be set to strive for significant improvement.

In early drafts of **Australia Together**, the level of ambition for each Target and Strategy will generally be set based on the research and findings set out in [By 2050, The State of Australia in 2020](#) and [The State of Australia 2022](#) about Australia's wellbeing and our capacity, strengths and

How far do we want to travel in each of the Directions of *Australia Together*?  
For something that is really important to us – we need to Aim High. Aim to fix it. That is what a long term plan is for.

“

**By 2050**  
Chapter 6

*When it comes to issues that we all know are important – but which we might tend to think are too difficult to solve or intractable – setting ambitious targets is not only vital to solving the problem, it is the cheapest thing to do over the longer term. Aiming high – aiming to fully fix the problem, not just fiddle at the edges – is the key to success, and to efficiency in success.*

”

weaknesses as a modern economy, democracy and environmental custodian. Baseline data for the Targets, Indicators and Strategies, taken together, will generally reflect the QBL health and wellbeing of Australia at the outset of the 2020s, as assessed in **By 2050** and in other relevant research as and when it may come to light. They translate the general and particular findings of **By 2050, The State of Australia in 2020** and **The State of Australia 2022** into observable data about Australia in the early 2020s and integrate those data points into a single space – the [Australia Together National Wellbeing Index](#). This work will be ongoing. The assessed health and wellbeing of Australia indicated by the individual baseline data points could be regarded as:

- poor in the areas where Targets and Strategies are ambitious, and
- reasonable or good in the areas where Targets are simply set to ensure no deterioration in that quality of life on that particular Indicator.

### The top twenty issues to solve by 2030

**By 2050** assembled research across a wide variety of quality of life issues and referenced hundreds of statistical data points and observations of researchers, journalists, historians, scientists, economists and policy commentators. As such, **By 2050** functioned as far as possible as a consolidated issues paper for Australia, marking a point in time – the beginning of the 2020s. The findings were that at the start of the planning period Australia was not in good shape in terms of its health and wellbeing and its preparedness for future challenges and was struggling particularly with twenty critical issues that must be solved by 2030, if possible, to ensure we arrive safely in 2050 with an acceptable degree of wellbeing and security.

These twenty issues were set out in Australian Community Futures Planning’s seven part videocast series, **The State of Australia in 2020**, accessible on [YouTube](#) and at <https://www.austcfp.com.au/state-of-australia>

The identified twenty critical issues were:

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Growing inequality</li> <li>2. Growing poverty, homelessness and hunger</li> <li>3. Loss of the fair go for all</li> <li>4. Growth in racial and religious conflict</li> <li>5. Indigenous exclusion</li> <li>6. An outmoded and failing Constitution</li> <li>7. Loss of rights, open governance and transparency</li> <li>8. Declining participation in democracy</li> <li>9. Unethical governance</li> <li>10. Fractious international relations</li> <li>11. Corporate irresponsibility</li> </ol> | <ol style="list-style-type: none"> <li>12. Economic decline</li> <li>13. Lost public ownership</li> <li>14. Inertia in transition to decarbonisation</li> <li>15. Environmental decline</li> <li>16. Climate policy failure and steps to avoid climate change</li> <li>17. Declining health and safety at home</li> <li>18. Declining educational attainment</li> <li>19. Declining quality of life and loss of social cohesion</li> <li>20. Declining wellbeing and happiness</li> </ol> |
|--|---|

Factual details and data presented in **The State of Australia in 2020** provided many of the starting points for **Australia Together** – i.e., they provided much of the baseline data which forms the QBL National Wellbeing Index. Because the datapoints on the twenty critical issues functioned to pinpoint some of our biggest weaknesses as a nation in 2020, they also functioned as the basis for some of the most ambitious Targets that were drafted into the first issue of **Australia Together** in 2021.

Targets have been and will continue to be selected on the basis of the minimum deemed necessary to meet the QBL aspirations of Australians and move as close as we might hope towards realisation of the **Vision for Australia Together** by 2050 or sooner.

For a deeper insight into the genesis of or background to the Targets in this draft of **Australia Together**, see [By 2050](#), particularly:

- Chapters 2, 8, 9 and 11 in relation to Targets on human rights and Constitutional reform,
- Chapters 6, 8, and 11 in relation to Targets for the environment and climate change;
- Chapter 7 and 8 in relation to Targets for the national economy, welfare, taxation, employment and industry transition;
- Chapter 9 in relation to Targets in the area of inequality;
- Chapters 4, 7, 9, 10 and 11 for education, health, domestic safety, poverty and homelessness;
- Chapters 4 and 11 in relation to Targets for reform of the state and federal public services.

As stated above, several of the Targets and Strategies also have their genesis in the **United Nations Sustainable Development Goals 2015**, to which Australia is a signatory.

It is regrettable that few if any of the explanations in **By 2050**, which provided context to the more *ambitious* Targets and Strategies in this draft, portrayed Australia's health and wellbeing in 2020 in a net positive light. Indeed, overall – and despite our relative wealth as a developed nation – Australia was not performing well compared to other developed nations. Part of the purpose of **Australia Together** is to turn this situation around and find the least cost most acceptable way to do it over the medium to longer term.

As a rule of thumb, readers should assume that if a Target or Strategy appears ambitious, this is because Australia has been found to be performing poorly in that area and that the future of our children and grandchildren is dependent on our taking on as much responsibility as we can in the 2020s to meet that Target at the lowest long run cost. The QBL National Wellbeing Index provides the data Australians need to know in the early 2020s so that they can understand the extent of effort needed to arrive safely home in 2050.

Over the 2020 decade Australians will have multiple opportunities to provide input and assistance on all aspects of **Australia Together**, including insight into relevant Targets and Strategies. For information about how and when to provide assistance and intelligence, visit **Australian Community Futures Planning** at [www.austcfp.com.au](http://www.austcfp.com.au)

**Important Note:** This draft of **Australia Together** does not yet include all the Indicators, Targets and Strategies that will be applicable. These omissions are intentional and will be corrected over time with the input of Australians. Indicators will grow in number. [View further information here.](#)

“

**By 2050**

Chapter 2

*We are not in a good place in terms of the capacity of our democracy to carry us through to any future we might prefer, unless we prefer a future where we suffer from stark inequality, economic decline, environmental catastrophe and powerlessness. The time has come for the development of a map to the future that we can see will take us to where we want to go. We need to work out where that place is and what it looks like if we expect our children to meet us there.*

”

Note regarding the layout of Indicators, Baselines, Targets & Strategies in Chapters 5 to 8

**Australia Together** is a plan designed to help Australians maximise their chances of making the Vision a reality. This is a very big undertaking, especially as it involves integrating a large number of Targets and Strategies so that they help us travel in the right Directions towards the Vision, instead of via routes we would wish to avoid.

Accordingly it is important to organise the plan so that actual progress towards or away from the Vision can be easily examined and reported on and so that the course of travel, if necessary, can be reset if something goes wrong, and before it is too late. For this purpose:

1. **Indicators** of and **Targets** for progress are being progressively built into the plan to facilitate reporting on real **outcomes** – for example, whether life expectancy or mental ill-health are increasing or decreasing; **and**
2. **Strategies** are being progressively built into the plan that function as the most effective **inputs** to increase the chance of meeting desired **outcomes** – for example:
  - a **Strategy** of increased funding for public health has been included to contribute to the achievement of a desired **outcome** such as increased life expectancy; and
  - several integrated **Strategies** to reduce inequality, homelessness and poverty have been included to contribute to achievement of multiple desired **outcomes** such as increased life expectancy and decreased mental ill-health.

Targets and Strategies are all:

- a) generated from a particular **baseline** (always shown in the right hand column of the following tables), and
- b) geared towards a particular Direction or multiple Directions of travel.

Most Strategies are geared to contribute to more than one Direction; but they too come with inbuilt Targets, such as a year by which they must be reached. Indicators, Baselines, Targets, Strategies and Directions are therefore all inter-related; this is an essential feature of Integrated Planning & Reporting. Integration is what speeds up progress towards the Vision and reduces the cost of reaching it over time.

Because the Indicators, Baselines, Targets, Strategies and Directions are all inter-related, ACFP has chosen to link each of them within and across Chapters 5 to 8, using the Directions as the central way of organising the linkages in the plan. Effectively, the Directions are the routes by which we move from each specific Baseline safely through to its relevant Target.

**Australia Together is a map through time of the safest routes to our preferred future.** To make it as easy as possible to follow the plan and to report on outcomes, the Indicators, Targets and Strategies have been listed under **keyword or phrase headings** (always shown in the left hand column of the following tables). Readers looking for Targets and Strategies in a topic area of particular concern to them can simply search on a keyword using the normal “Find” function on the PDF electronic reader or [use the keyword/phrase list in Chapter 10](#) to locate the map position of the topic they are seeking in the plan. That map position is represented by a unique number. If a topic of particular interest is not yet included in the plan, it is likely to be included in a subsequent edition. Suggestions for inclusions can be made at any time. For information of how to make suggestions, see the Become Involved webpage at ACFP at <https://www.austcfp.com.au/become-involved> or the Make a Suggestion webpage at <https://www.austcfp.com.au/make-a-suggestion>.

# Chapter 5 – Targets & Strategies for Success in Our Society

Brief context for the Indicators, Targets & Strategies for Our Society

The following information summarises how Australian society was travelling at the very start of the planning period.

At the outset of the 2020s the expectation of a fair go for all Australians was in decline. Income inequality had been growing slowly but steadily over the previous two decades and wealth inequality had markedly increased. Between 2014 and 2018:

- the wealthiest 25% of Australians increased their income by nearly double that of median household incomes, while the wealth holdings of the poorest 20% of households actually declined; and
- while the wealth of the *average* Australian household surged past \$1 million, low-income families had seen no increase in their net worth for more than a decade.

This resulted in Australia’s economy being smaller and growing more slowly than it would otherwise. But more than that – because in a developed country like Australia, improved wellbeing arises less from continued economic growth than it does from *fair sharing* of any growth in national income and wealth – **Australia had inevitably been slipping on all manner of other measures of social health and happiness as shown below.**

**Inequality growth Australia, in terms of both annual income and accumulated wealth for individuals.**

Income and wealth inequality as measured by the Australian Bureau of Statistics’ Gini Coefficient calculations is showing a continuous worsening trend.

Inequality in Australia	2003/04	2015/16	2017/18
Income inequality	0.306	0.323	0.328
Wealth inequality	0.573	0.605	0.621

The closer the coefficient moves towards 1.0, the more unequal we are becoming

Source: ABS 6523.0 acfp Australian Community Futures Planning

**Net worth of Australian households**

In 2021, the average net worth of the top 20 per cent of households was more than 93 times that of the lowest 20 per cent – some \$3.2 million compared to just \$35,200.

Group	Net Worth
Top 20% of households	\$3,200,000
Bottom 20% of households	\$35,200

Source: ABS 6523.0 acfp Australian Community Futures Planning

**International studies showed that, compared to other developed countries, Australia was performing poorly on almost every measure of social cohesion and wellbeing.**

Of 22 wealthy developed OECD countries	Overall social health & wellbeing	UNICEF Index of Child Wellbeing	Trust in the Community	Spending on foreign aid	Incidence of mental illness	Illegal drug use	Obesity	Teenage births	Homicides per million population	Prisoners per 100,000 population
<b>Best performer</b>	Japan	Sweden	Sweden	Norway	Italy	Japan	Japan	Japan	Japan	Greece
<b>Ranking of developed countries</b>	Australia 16th	Australia 18th	Australia 9th	Australia 19th	Australia 21st	Australia 16th	Australia 16th	Australia 14th	Australia 14th	
	USA	UK	Portugal	Portugal	USA	Australia Worst	USA	USA	USA	USA
<b>Worst performer</b>	USA	UK	Portugal	Portugal	USA	Australia Worst	USA	USA	USA	USA

Source: Richard Wilkinson & Kate Pickett, The Spirit Level, Why equality is better for everyone, 2009 acfp Australian Community Futures Planning

The above study by epidemiologists in 2009<sup>1</sup> provided evidence that **increasing inequality in wealthy countries is strongly correlated with decreasing health and wellbeing**. And regrettably, through the 21<sup>st</sup> century the picture worsened for Australia. For instance:

- a) The Scanlon Foundation’s Index of Social Cohesion had declined from its baseline of 100 in 2009 to 89.6 in 2019 and most notably along racial, religious and cultural lines. **More people were reporting a decline in their sense of belonging** and experience of rejection because of their skin colour, ethnic origin or religion.<sup>2</sup>
- b) **Australia’s First Nations, Aboriginal and Torres Strait Islanders, languished in entrenched disadvantage** compared to non-Indigenous Australians on every indicator of health and wellbeing.

- c) Australians were suffering **significant increases in diabetes, obesity, mental health and behavioural conditions**.

**The health of Australians was declining at alarming rates in some cases.**

Disease	Growth of disease		
Rate of obesity in adult Australians	18.7% in 1995	31.3% in 2018	66% increase since 1995
Rate of diabetes in adult Australians	3.3% in 2001	4.9% in 2018	50% increase since 2001
Number of adult Australians suffering mental health or behavioural conditions	4,000,000 in 2015	4,800,000 in 2018	20% increase in only 3 years

No reduction has been observed in the incidence of other diseases, including heart disease, asthma, cancer, arthritis, osteoporosis, high blood pressure, hypertension or kidney disease.

**Homeless in Australia on Census night**

Year	2006	2011	2016
Count	89,728	102,439	116,427

**A 30% increase**

Source: ABS 2049.0, a cfp Australian Community Futures Planning

f) Australia's claim to be "the best place in the world to raise a child"<sup>4</sup> was without basis, inasmuch as the latest comparative data from UNICEF showed that in terms of material wellbeing of children and their health and safety, Australia scored well below the average of OECD countries<sup>5</sup>. This was manifest in domestic abuse.

**Domestic violence in 2016/17**

- 4,600 women and 1,700 men hospitalised due to family violence
- 611 children hospitalised due to family violence
  - 218 domestic homicide victims including one woman a week killed by a current or former partner

Source: AIHW, Family & Domestic Violence 2019 & ABS, Personal Safety Survey 2016

g) Housing affordability had become a crisis: in 2017/18, the proportion of lower income households spending more than 30% of their gross weekly income on housing costs was 56.9% of those renting from a private landlord, and 41.3% of owners with a mortgage. And for those wishing to escape domestic abuse, crisis accommodation services were inadequate. In 2019, more than 1 in 2 women were turned away from crisis accommodation every night.

h) **Aged care was in crisis** and in 2021 over 100,000 Australians in need were unable to obtain home care packages.

i) **The equality of Australians was faltering on multiple fronts** including:

- gender equality,
- sharing of national income and wealth between rich and poor,
- equality before the law, and
- equality of Indigenous Australians under the Constitution.

**Australia's failures in Indigenous recognition and reconciliation were standing in the way of our ability to define ourselves as a nation and state what decency means for us.**

**Australia's global ranking on gender gaps had fallen substantially.**

Australia's global gender gap	Rank in 2006	Rank in 2021	Change
On educational attainment	No. 1	No. 1	No change
On economic participation and opportunity	12 <sup>th</sup> place	70 <sup>th</sup> place	↓ Fall of 58 places
On health and survival	57 <sup>th</sup> place	99 <sup>th</sup> place	↓ Fall of 42 places
On political empowerment	32 <sup>nd</sup> place	70 <sup>th</sup> place	↓ Fall of 38 places
<b>Overall ranking</b>	<b>15<sup>th</sup> place</b>	<b>50<sup>th</sup> place</b>	<b>↓ Fall of 35 places</b>

Source: World Economic Forum, Global Gender Gap Report 2021  
**Note: The lower the place, the bigger the gender gap**

acfp  
Australian Community Futures Planning

j) Finally, Australians were increasingly fearful for their own safety and unhappy with their own lives, their prospects for the future, and the direction of the country as a whole.

**ABC**

**57% of Australians were unhappy with the direction of the country**

Source: ABC Australia Talks survey 2019

This implied that If Australians want to see better report cards on the state of our society, it will be necessary to work towards **an inclusive society with a new emphasis on equality** including:

- achieving gender equality;
- closing the gap for Indigenous Australians and enshrining their equality in the Constitution;
- promoting racial equality and appreciation of difference, including difference in sexual preference – reversing the recent decline in tolerance and in appreciation of diversity and multiculturalism as the basis of Australia’s success;
- reducing income and wealth inequality and eliminating poverty; and
- providing equality before the law for all Australians, including restoration of rights to open trial and the pre-eminent rights of children in detention and in family court disputes.

**This inclusive society of equals is vital to Australia’s economic security** – a fact made plain by economists, scientists, universities and business leaders in the Australian National Outlook 2019<sup>6</sup> led by the National Australia Bank and the CSIRO. In their considered expertise, realisation of our most optimistic predictions for our economy depends heavily on our maintaining highly inclusive societies, economic institutions and markets. Conversely, a divided society that is unappreciative of diversity will make the most pessimistic economic scenario a reality. Excluding diverse talents will make for a fragile economy, not a resilient one capable of carrying more of us to prosperity.

For more information on the context for Targets and Strategies included in **Australia Together for Our Society**, [view The State of Australia in 2020 on YouTube](#).

**Further decline in tolerance of diversity will lead to a decline in inclusion and equality which will then lead to a loss of the full use of our human capital which will then result in slower economic growth or contraction.**

**The best economic future relies on ...**

“ *inclusive institutions which encourage people to participate in a choice of vocations that make best use of their skills, create opportunities for all, regardless of social and economic status at birth, and improve living standards while fairly sharing the benefits of increased prosperity.* ”

National Australia Bank & CSIRO

**Detailed context for the Targets, Indicators & Strategies in Our Society can be found in The State of Australia in 2020 – especially Episodes 2, 5 and 7.**

[Click here for The State of Australia video playlist](#)

The following Indicators, Targets and Strategies for **our society** are derived consistent with the primary objectives of building an Australian society that:

- is inclusive and appreciative of diversity;
- resolves racial and religious conflicts and creates equal rights for all, including First Nations;
- reinstates the fair go for all as a genuine possibility; and
- as per the **Vision for Australia Together**:
  - maximises the safety of all Australians in their homes, in their public spaces, in the workplace and in the international sphere;
  - provides for the physical and mental health and wellbeing of everyone throughout their lives; and

<sup>6</sup> CSIRO & National Australia Bank, “Australian National Outlook 2019”, <https://www.csiro.au/en/work-with-us/services/consultancy-strategic-advice-services/csiro-futures/innovation-business-growth/australian-national-outlook>

- provides each and every Australian with unlimited opportunity to realise their full potential in life through education and employment of choice.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our society  
Australia will  
become:**

- A safe home
- A land with an Indigenous heart
- Inclusive, welcoming & enabling
- A place of optimal health & wellbeing
- A model of lifelong educational opportunity
- A society of equals
- A success because of its diversity
- A success because of gender equality
- A land without homelessness & with decent affordable housing for all
- A place of supportive familial & other connections & without domestic abuse
- A land without child disadvantage
- A sure provider of lifelong dignity
- A wellspring of inspiration & creativity
- A model of community service & responsible exercise of authority in policing
- Confident of justice for all
- A society prepared & resilient in times of disaster

Targets and Strategies will also contribute positively to multiple other Directions in **Australia Together**, as displayed.

## Society 1 – Safety

## Society 2 – Indigenous Heart

<b>Indicators, Targets &amp; Strategies for the success of Our Society</b>		
<b>Society 2 – Indigenous Heart</b>		
<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>First Nations constitutional recognition, Makarrata, treaty, justice and reconciliation</b></p> <p><b>Top Priority Target/Strategy: Constitutional recognition of First Nations – Statement of Acceptance of the Principle of Coexistence of Sovereignties Soc02.01</b></p> <p>By 2025, as an essential and defining part of nation-wide community engagement for a new Constitution under <b>Gov04.01</b> and <b>Gov04.01.01</b> and in accordance with the spirit and letter of the Uluru Statement from the Heart, the federal parliament is to:</p> <p>a) establish a statement of acceptance of the principle that the sovereignty of Aboriginal and Torres Strait Islander peoples has never been ceded and coexists with the sovereignty of the Crown (or with state sovereignty if Australia becomes a republic);</p> <p>b) acknowledge and then celebrate this coexistence as a fuller expression of Australia’s nationhood; and</p> <p>c) ensure all other constitutional reforms, necessary to give effect to the statement are set in train to empower First Nations to take a rightful place in their own country.</p> <p><b>Important note:</b> Rationale for the need for a <b>Statement of Acceptance of the Principle of Coexistence of Sovereignties</b>.<sup>7</sup></p>	<p><b>Soc 2</b> A land with an Indigenous heart.</p>	<p>In 2017, 250 Aboriginal and Torres Strait Islander delegates to the National Constitutional Convention called for the establishment of a First Nations Voice in the Constitution. The Uluru Statement from the Heart recommended a constitutionally enshrined Voice to parliament, a Makarrata or truth-telling commission and an eventual treaty between Indigenous and non-Indigenous Australians. Source: Uluru Statement from the Heart</p> <p>In 2021, Australians supported the following as priorities for government:</p> <ul style="list-style-type: none"> <li>• Include Aboriginal recognition in the Constitution = 69%.</li> <li>• Establish an Indigenous ‘voice’ to advise the Parliament = 66%.</li> <li>• Agree a treaty with Indigenous Australia = 61%.</li> </ul> <p>Source: Essential Research, July 6 2021</p> <p>In 2021,</p> <ul style="list-style-type: none"> <li>• 90% of Australians on survey agreed or strongly agreed that the relationship between Aboriginal and Torres Strait Islanders and the wider Australian community is very important for Australia as a nation, and</li> <li>• 88% agreed it is important for Indigenous histories and cultures to be</li> </ul>
	<p><b>Soc 3</b> Inclusive, welcoming &amp; enabling.</p>	
	<p><b>Soc 4</b> A place of optimal health &amp; wellbeing.</p>	
	<p><b>Soc 6</b> A society of equals.</p>	
	<p><b>Soc 7</b> A success because of its diversity.</p>	
	<p><b>Soc 15</b> Confident of justice for all.</p>	
	<p><b>Gov 2</b> A nation knowing &amp; affirming decency.</p>	
	<p><b>Gov 3</b> A nation with avowed rights for all.</p>	

<sup>7</sup> **Rationale for the need for a Statement of Acceptance of the Principle of Coexistence of Sovereignties:** Despite the defeat of the Voice referendum in 2023, calls implicit in the Uluru Statement from the Heart for a recognition of the coexistence of Indigenous and state sovereignty remain outstanding. Bearing in mind that in the event of a referendum on

**Indicators, Targets & Strategies for the success of Our Society**

**Society 2 – Indigenous Heart**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>Top Priority Target/Strategy:</b>  <b>Constitutional reform to establish a First Nations Voice in the Constitution</b>  <b>Soc02.01.01</b>                      By 2025, notwithstanding the rejection by 9.5 million Australian voters of an Aboriginal and Torres Strait Islander Voice in the Constitution in the 2023 referendum but recognising that 6.3 million Australians voted for it, the federal government must as a minimum:</p> <p><b>a)</b> acknowledge that constitutional recognition of Australia’s First Peoples is still essential to fulfilment of the aspirations expressed by them in the Uluru Statement from the Heart and that failure to recognise the First Australians constitutes an undemocratic exclusion, a major political inequality, and a denial of their right to self-determination under the United Nations Declaration on the Rights of Indigenous Peoples; and</p> <p><b>b)</b> pursuant to the acknowledgement in <b>a)</b>,</p>	<p><b>Gov 4</b> A free, self-governing, modern nation.</p>	<p>included in the school curriculum.                      Source: Scanlon Foundation Mapping Social Cohesion 2021.</p> <p>In 2021, it was noted by historian Henry Reynolds that “the legal foundations of the colony were unsound and remain so to this day,” an authoritative conclusion which marked the recognition of a turning point on the contentious issue of sovereignty in Australia and unambiguously signalled a fundamental need to finally resolve foundational matters for the nation in justice.                      Source: Henry Reynolds, Truth-telling: History, Sovereignty and the Uluru Statement of the Heart, 2021, NewSouth Publishing, page 63.</p> <p>In 2022, the Australian government regarded itself as a “supporter” of the United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP) but had still done nothing in law to extend those rights to Aboriginal and Torres Strait Islanders.                      Source: Australian Human Rights Commission, <i>Implementing UNDRIP</i></p>

the republic questions may arise as to the nature and source of sovereignty in Australia, clarification of principles regarding Indigenous sovereignty will be essential for social cohesion and fair and just treaty-making. In the event that any referendum on a republic or other constitutional reform:

1. results in a formal transfer of the source of sovereignty away from the Crown and to the People of Australia (as opposed to the State – meaning the Executive/executive government); and
2. establishes a form of state where the People as sovereign are able, through the design of their own Constitution, to:
  - a. authorise and limit the rightful powers of the parliament, the executive government, the courts, the states and territories, and
  - b. define any other arrangements of democracy necessary for the rightful balance of power between those authorised to exercise its various types,

an agreement on the principle of Indigenous sovereignty and its co-existence with that of the State is a prerequisite for justice, fairness and stability in the new form of state and any treaties that may be made by that new state, including treaties which allow every Australian to exercise the right of self-determination and all other human rights as political equals.

Irrespective of whether Australians adopt constitutional reforms which vest sovereignty in the People, acceptance of the principle of a coexistence of Indigenous and non-indigenous sovereignties is fundamental to reconciliation. The terms and principles on which a rightful and peaceful of coexistence of sovereignties is based must be clear and acceptable to all – otherwise reconciliation is not possible. The Vision for *Australia Together* assumes reconciliation is essential if Australians are to create an inclusive democracy where everyone has political equality.

**Indicators, Targets & Strategies for the success of Our Society**

**Society 2 – Indigenous Heart**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p>support the federal parliament to commence and fund the process for independent constitutional reform as outlined in <b>Gov04.01.01 – the National Collaborative Process for Development of the Australian People’s Constitution</b>, recognising that the failure to achieve constitutional recognition for First Nations Peoples will deny them political equality as members of the Australian democratic state; and</p> <p>c) acknowledge the reality that until the rights of all Australians are safely secured in the Constitution as per processes under <b>Gov04.01.01</b> and <b>Gov03.01</b>, it will not be possible to establish a just and fair treaty with First Nations that will be necessary pursuant to a Makarrata Commission under <b>Soc 02.01.02</b>.</p> <p><b>Top Priority Target/Strategy: Makarrata Commission Soc02.01.02</b></p> <p>Preparatory to the Constitutional Convention under <b>Gov04.01</b>, establish a Makarrata Commission to supervise a process of agreement-making between governments and First Nations and truth-telling about our history. Ensure that the Commission is unconstrained (including by inadequate funding and/or restricted terms of reference) in the full and effective stewardship of:</p> <p>a) the truth-telling process about the effect of European invasion and colonisation on First Nations, their lives, their civilization, their ancient connection with the land and ancestors, and their</p>		<p>In 2023, 60.06% of Australian electors rejected the referendum question seeking an Aboriginal and Torres Strait Islander Voice in the Constitution, leaving the first Australians unrecognised in the Constitution and no closer to reconciliation as imagined in the Uluru Statement from Heart. Rejection of the Voice was notably inconsistent with the Vision for <i>Australia Together</i>.</p> <p>Source: Australian Community Futures Planning, Questions about <i>Australia Together</i> Fact Sheet: “<a href="#">How is the Indigenous Voice consistent with the Vision for Australia Together?</a>”</p> <p>In 2023, recognising that:</p> <ul style="list-style-type: none"> <li>• “the legal foundations of the colony of Australia are unsound”;</li> <li>• the issue of Australia’s arrangements of sovereignty as an independent self-governing nation of free equals has never been settled,</li> </ul> <p>Australian Community Futures Planning’s Founder asserted in testimony to the Parliamentary Joint Committee on Human Rights’ Inquiry into Australia’s Human Rights Framework that “A stable treaty with First Nations will not be possible unless human rights are first assured for all Australians equally.” Specifically: “A stable treaty between First Nations, non-Indigenous Australians and the Australian State can only be achieved in a democracy if it has been made freely by a nation where all people are first confident of their status as political equals. The people of a nation can only be confident that they are both</p>

<p>relationship with non-Indigenous Australians; and</p> <p><b>b)</b> the agreement-making process for:</p> <ol style="list-style-type: none"> <li>i. resolution of conflict, and</li> <li>ii. preparation of the terms of reconciliation and justice formalised in a treaty.</li> </ol> <p>By 2024:</p> <ul style="list-style-type: none"> <li>• reach agreement on establishment of the Makarrata Commission in terms considered fair and satisfactory to the members of the Referendum Council (reconvened if necessary); and</li> <li>• develop an agreed plan for the conduct of the truth-telling and agreement-making process, complete with objectives, timeframes, and rules of participation.</li> </ul> <p>By December 2024, open the truth-telling and agreement-making process in accordance with the pre-agreed plan.</p> <p>By June 2025, deliver a statement to the Australian people on the outcomes (even if these are preliminary), preparatory to commencement of the Constitutional Convention under <b>Gov04.01</b> and <b>Gov04.01.01</b>.</p>		<p>free and equal by declaring in law that rights are the equal property of all and that this cannot be negated by governments without the express permission of the people. Until they declare that, non-Indigenous Australians will not be confident that a treaty with First Nations people will not disadvantage them, relative to Indigenous. Nor will Indigenous be confident that the treaty is fair and that they have been acknowledged as equal. Enshrinement of all human rights in the Constitution as the property of all people equally is therefore a condition precedent to any treaty with First Nations that all will agree is just and fair and will not result in disadvantage to any of the parties. Development of a treaty without first enshrining all human rights in the Constitution will ensure no treaty is ever really viable. Human rights are the primordial treaty we must make with each other before we can make other treaties and laws that can be regarded as just and fair.”</p> <p>Source: ACFP, Bronwyn Kelly, <a href="#">Supplementary Submission to the PJCHR Inquiry into Australia’s Human Rights Framework</a>, September 2023.</p>

**Note regarding the following targets and Indicators for Society 2 – Indigenous Heart:**

The draft Targets and Indicators shown below derive from various “Closing the Gap” reports for Indigenous Australians and related sources of data such as the Australian Institute of Health and Welfare (AIHW).

While Australian Community Futures Planning does not dispute the baseline data derived from these sources, there is some concern with the Targets for elimination of Indigenous disadvantage that have been derived directly from the Closing the Gap in Partnership Agreement 2020<sup>8</sup> struck between

<sup>8</sup> Closing the Gap in Partnership website: <https://www.closingthegap.gov.au/targets> and “National Agreement on Closing the Gap, July 2020: [National Agreement on Closing the Gap](#), last accessed February 2021.

the Coalition of Aboriginal and Torres Strait Islander Peak Organisations and the various governments of Australia.

Taken at nominal value, some of the Targets adopted under the Closing the Gap in Partnership Agreement would not actually result in the gap being closed inside a century. Such targets have no utility in a long term plan like **Australia Together** and offer little or no advantage to Indigenous Australians. Accordingly in some cases, ACFP has suggested additional Targets which are more ambitious than those adopted in the Closing the Gap in Partnership Agreement. These additional Targets are denoted as “ACFP additional Target”.

Progress towards or away from both sets of Targets will be monitored and reported on.

<p><b>Top Priority Target/Strategy:</b>  <b>Security of funding for health – Abolition of subsidies for private health insurance and reinstatement of universal health care in public and private hospitals funded by a single public fund based on a fair Medicare levy</b>  <b>Soc04.07.01</b>                      By 2030, recognising that private health insurance (PHI) is highly detrimental to the financial sustainability and the universality of both public and private hospital services in Australia because PHI:</p> <ul style="list-style-type: none"> <li>• makes hospital costs and the fees charged by medical professionals in hospitals difficult if not impossible to control;</li> <li>• has administrative costs that are three times those of Medicare;</li> <li>• has imposed premium increases at double the rate of CPI for the last 20 years and at least 1.5 times the rate of wage increases;</li> <li>• has led to an increase in pressure on public hospital emergency departments (not a reduction);</li> <li>• has led to an inability of public hospitals to retain specialists due to dramatic increases in salaries offered by the private sector (salaries in private hospitals are three to five times higher than public hospitals);</li> </ul>	<b>Soc 4</b> A place of optimal health & wellbeing.	In 2024, funding for Australia’s health system was organised in two streams: <ul style="list-style-type: none"> <li>• government funding, and</li> <li>• private health insurance (PHI).</li> </ul> Government funding was through the Medicare scheme, which subsidised out-of-hospital medical treatment and funded free treatment in a public hospital. Private insurance was optional but in general covered most of the cost to patients of treatment in a private hospital. In effect, the majority of private hospital expenses or treatment as a private patient in a public hospital were funded by PHI companies but these in turn were funded by premiums paid by the Australians that could afford them and by substantial extra subsidies from taxpayers.  By 2024, it was known that the two-stream system of private and public funding for hospital care was incapable of supporting a reliable hospital system to which everyone could be confident of access, meaning it was wholly inconsistent with the Vision for <i>Australia Together</i> . In 2024, the sustainability of the system began to be seriously questioned, due to an increase in costs for private hospitals which was not being offset by the private health insurance funds. In the previous five

<p>a) developing a program for the staged integration of the current two-stream funding system for private and public hospital care into a single-stream funding system in which all hospitals (private and public) are funded directly by a single Medicare-administered fund;</p> <p>b) developing a plan for the staged opening of private hospitals to all patients (not just those who can afford to pay for their own treatment), thereby establishing a single, integrated hospital system with public and private components;</p> <p>c) developing a 10-year model to estimate the demand for and likely cost of hospital services to determine any necessary increase in the Medicare levy,<sup>11</sup> recognising the need to distribute burden for both</p>		<p>to progressively re-establish a truly universal, high-standard health care system in Australia. Such a system would ensure that private hospitals could still operate viably and be available for any patient who wished to access them.</p> <p>Source: Federal Budget Paper No. 1 2024/25. Source: Centre for Policy Development, Jennifer Doggett &amp; Ian McAuley, <i>Private Health Insurance Consultations</i>, 1 December 2015. Source: APRA, <i>Operations of Private Health Insurers Annual Report 2022/23</i>.</p> <p>In 2024, in response to the stress created by the two-stream funding system for hospital care, ACFP identified a consistent pattern of research findings suggesting a need for elimination of subsidies for PHI, but noted also that the impact of elimination of subsidies on the viability of private health insurance businesses is likely to be significant. However,</p>

<sup>11</sup> **Rationale for an increase in the Medicare levy in the event of abolition of subsidies for PHI:** Elimination of subsidies for private health insurance will require an increase in the Medicare levy. This is because the elimination of subsidies for PHI will result in many people abandoning their PHI cover, which will in turn result in a loss of funds to the health system. These funds will need to be replaced – i.e., they cannot disappear from the total pool of funds already used to finance our health. Instead they will need to be transferred into the single Medicare-administered fund by way of an increase in the Medicare levy. The quantum of funds that will need to be replaced to ensure sustainability of both public and private hospitals will depend on how many people drop their private health insurance. Based on the APRA’s 2022/23 annual report of the operations of PHI, ACFP has estimated that complete abandonment of PHI would deplete available funds for the hospital system by approximately \$17 billion in a year. ACFP has also estimated that a 1% increase in the Medicare levy (increasing it from 2% of taxable income to 3%) would recover \$17 billion of funding lost through abandonment of PHI. For a median earner this would result in an increase in the Medicare levy of \$676 for the year. However, abandonment of PHI may produce a saving in the private health rebate expense item in the budget (inasmuch as the rebate would not be payable if no-one is taking out PHI cover). Whether that saving is possible depends on the accounting treatment of the rebate but if the saving is present, it is likely to equate to over \$7 billion. This is funding that would not have to be replaced because it is funding that is not being used to finance health services. In that event, the amount of funds that will need replacement in the first year is likely to be only \$10 billion. If this is correct then the necessary increase in the Medicare levy is probably 0.5% rather than 1%. A 0.5% increase in the Medicare levy would cost a median earner in 2024/25 an extra \$338 for the year. Modelling shows that Medicare levy increases for all income earners sufficient to replace the full \$17 billion of assumed lost funds will result in net savings for anyone currently paying for private health insurance but likely increases for lower income earners if they do not currently have private cover. However, a uniform levy on taxable income is a transparently fair and efficient way to cover the cost of health throughout life, in contrast to the less transparent cross-subsidies which currently function to transfer national tax revenues from the poor to the rich in cash and/or in the form of lost health services. Were a higher Medicare levy to be introduced concurrently with a Universal Basic Income under the model proposed by ACFP [here](#), any negative impact on poor people would be well and truly negated.

<sup>14</sup> **Rationale for the Strategy for reform of governance in public universities:** Authors (James Guthrie and Adam Lucas) of the peer reviewed paper, [How we got here: The transformation of Australian public universities into for-profit corporations](#), have assembled detailed research which supports conclusions that the neoliberal business model for universities "is driving the Australian higher education system to a breaking point." Guthrie and Lucas observe that: "Public accountability with respect to these neoliberal changes has been rendered problematic as the result of legislative changes to the governance clauses of universities. We consider the broader economic and cultural focus of NPM [New Public Management] as calculative and commodifying practices that are constructed to be largely impervious to public evaluation. These regressive changes have legitimated [sic] by reducing the oversight of staff and student representatives on university governing bodies." The authors conclude that: "The legislated functions contained in university acts make clear that public universities should serve the public interest. However, the neoliberal policies that currently inform executive and senior managerial decision-making in Australia's public universities relegate those functions to virtual irrelevance. The widespread adoption of accounting methodologies explicitly developed to manage the finances of for-profit corporations is just one example of how those functions have been rendered irrelevant. An ethically grounded accounting discourse informed by the public interest principles of transparency and accountability would go a long way to restoring staff and student confidence in how our universities are run." The authors called for "a Royal Commission into the governance of public universities. The terms of reference should focus on their undemocratic structures, lack of transparency and accountability, profit-making activities, unhealthy relationships with senior management, and external consultancies and engagement with the Big Four accountancy firms." See "[James Guthrie and Adam Lucas: It's time for a Royal Commission into the governance of Australia's public universities](#)", Pearls and Irritations, 3 August 2022.

		<p>In 1901, Australia’s first Constitution contained clauses which enabled:</p> <ol style="list-style-type: none"> <li>laws to be made on the basis of race (Section 51 (xxvi)); and for</li> <li>Australian enfranchised voters to be disqualified from voting on the grounds of race (Section 25 – Provisions as to races disqualified from voting).</li> </ol> <p>In 2024, these clauses still pertained and Australia was “the only nation in the world with a Constitution that contains a clause that empowers a national Parliament to discriminate against a group on the basis of race.”</p> <p>Source: Australian Government Solicitor, Australia’s Constitution with Overview and Notes by the Australian Government</p>

## Indicators, Targets & Strategies for the success of Our Society

### Society 7 – Diversity

Indicators, Targets & Strategies for successful performance	In the Directions of becoming ...	Baseline data
<p>establish human rights for all Australians in the Constitution as per <b>Gov03.01</b>, <b>Gov03.01.01</b> and <b>Gov.03.01.02</b>, (as a condition precedent to <b>safe</b> removal of the races powers), ensure that the Australian Constitution is <b>safely</b> altered to delete any and all powers to make laws for groups of Australians on the basis of race.</p> <p><b>Note:</b> Constitutional experts and Indigenous law advocates have expressed concerns that removal of the races powers, while necessary, may result in adverse discrimination and disadvantage to Aborigines. However, these concerns can be resolved if a right of self-determination is conferred on all Australians – Indigenous and non-Indigenous. Safe removal of the racist clauses therefore requires prior conferral of the right to self-determination on all Australians as equals in Australian law. The equal right to self-determination is also a condition precedent to a fair and just treaty between First Nations, the Australian state (the Crown), and the people of Australia. For more information see Bronwyn Kelly, <i>The People's Constitution: the path to empowerment of Australians in a 21<sup>st</sup> century democracy</i>, ACFP Publishing, January 2023, Chapter 8, Essential No. 4d. <a href="https://www.austcfp.com.au/publications">https://www.austcfp.com.au/publications</a></p>	<p><b>Soc 13</b> A wellspring of inspiration &amp; creativity.</p>	<p>Solicitor, page v. foi-2021-017.pdf (pmc.gov.au) Source: Megan Davis and George Williams, <i>Everything You Need to Know About the Uluru Statement from the Heart</i>, UNSW Press, 2021.</p> <p>Between 1901 and 2024, Aboriginal and Torres Strait Islanders were the only group to have suffered discrimination in law under these provisions. Source: Megan Davis and George Williams, <i>Everything You Need to Know About the Uluru Statement from the Heart</i>, UNSW Press, 2021.</p> <p>In 2023, it was apparent that "No race, even a white one, is protected by the Australian Constitution from the possible loss of voting rights," and as such the rights of all Australians in democracy are insecure, including the right to self-determination and all other civil, political, economic, social and cultural rights for humans under international law. In particular, the lack of rights for every Australian to self-determination constituted a major threat to the nation's capacity to achieve stable democracy and the economic advancement necessary for the continuing wellbeing of all Australian citizens. Racist provisions in the Constitution also threatened social cohesion in Australia, particularly enabling ongoing discrimination and systemic disadvantage for Aboriginal and Torres Strait Islander People. Source: Bronwyn Kelly, <i>The People's Constitution: the path to empowerment of Australians in a 21<sup>st</sup> century democracy</i>, ACFP Publishing, January 2023, <a href="https://www.austcfp.com.au/publications">https://www.austcfp.com.au/publications</a></p> <p>In 2023 the following proportions of Australians believed that</p>

<sup>15</sup> **Rationale for the strategy of reducing tax breaks for property investors:** In his Quarterly Essay on “The Great Divide: Australia’s housing mess and how to fix it”, Alan Kohler posed numerous reasons for the need to address distortions in the tax system as a cause of housing unaffordability for young Australians: “The houses we live in, the places we call home and bring up our families in, have been turned into speculative investment assets by the 50 years of government policy failure, financialisation and greed that resulted in 25 years of exploding house prices. The doubling of prices as a proportion of both average income and GDP per capita has turned a house from somewhere to live while you get on with the rest of your life into the main thing, and for many people a terrible burden.” In general this indicates a need to reduce or eliminate tax breaks for property investors because it has driven property prices for owner-occupiers up to entirely unaffordable levels. While Kohler recommended reduction rather than elimination of tax breaks, Everybody’s Home in their 2024 report, “Written Off: The high cost of Australia’s unfair tax system,” observed that negative gearing and the capital gains discount “have a dual perverse effect of both reducing housing affordability and increasing wealth inequality” and made a very strong case for elimination of negative gearing, the capital gains tax discount and rental assistance (which is in effect a subsidy to landlords, not welfare for renters). In consideration of the competing arguments, a policy which reduces

	<p>creating confidence for investors.</p> <p><b>Econ 6</b> An economy with competitive &amp; profitable public participation.</p> <p><b>Gov 2</b> A nation knowing and affirming decency.</p> <p><b>Gov 3</b> A nation with avowed rights for all.</p> <p><b>Gov 9</b> A nation outlawing corporate greed &amp; where private sector business practice &amp; ethics serve the public good.</p>	<p>treatment of investors, governments have pushed up the cost of housing.” The study showed the federal budget will lose \$146 billion over the decade to 2023 in tax breaks for private housing. Up to 500,000 homes could be funded if tax breaks for property investors were axed. Source: Everybody’s Home, “Written Off: The high cost of Australia’s unfair tax system”, January 2024.</p>
<p><b>Top Priority Target/Strategy: Housing supply – creation of sufficient supply through control of immigration Soc09.04.04</b></p> <p>By 2025, link immigration to the capacity of the Australian construction industry – specifically, net overseas migration must be kept at 2 to 2.5 times the number of housing approvals, but up to a maximum of 60,000 persons a year.</p> <p>In any year, immigration must be capped to ensure total population does not exceed 35 million as per <b>Econ01.03.02</b>. In the absence of the task force in <b>Econ01.03.03</b> required to confirm the necessary caps on annual net migration, impose a ceiling of 60,000 per annum up to a maximum population of 35 million.<sup>16</sup></p>	<p><b>Soc 9</b> A land without homelessness &amp; with decent affordable housing for all.</p> <p><b>All All</b> All other directions as per <b>Soc09.04.02</b> and <b>Soc09.04.03</b>.</p>	<p>Between 2000 and 2023, immigration policy for Australia was driven by the demand for labour, particularly cheap labour preferred by businesses. This resulted in a growing shortage of housing for rent and purchase. By 2023 the capital city rental vacancy rate was 1% compared to a ten year average of 2.8%. Accordingly rents were rising at well above the inflation rate. Between 2003 and 2023 net migration averaged about 200,000 per year which saw Australia’s population grow by 7.2 million from 19.5 million to 26.7 million. However the total number of dwellings increased by only 3 million. “Assuming 2 people per dwelling on average, that leaves a shortfall of 1.2 million houses.” Alarmingly, Australia added 518,100 people through net</p>

negative gearing tax concessions but eliminates the capital gains tax discount entirely is necessary in line with the other objectives of the Vision for *Australia Together*.

<sup>16</sup> **Rationale for the target selected for immigration:** Immigration targets should be subject to considerations of the total population that would be sustainable in Australia, not just from a housing point of view but from an environmental and economic point of view. See population expert Jane O’Sullivan: “The main criterion for sustainability is that migration should be low enough to allow Australia’s population to stop growing. Nothing can grow for ever on a finite resource base, and the more we grow from now, the more we lose in terms of environmental health and quality of life.” Therefore the immigration target should float in relation to changes in the fertility rate of women in Australia. “If fertility stays below 1.7, sustainability would be found in the range of 60,000–80,000 NOM.” To be on the safe side and to allow for inflows of climate change refugees to be accommodated if need be, the target should be set at 60,000, net immigration up to a maximum population of 35 million as per **Econ01.03.02**. Employer needs for cheap labour should not be a consideration

for immigration levels. This is because "The proliferation of low-wage work in Australia, to absorb the many migrants whose skills are not really in demand, has contributed to sluggish productivity growth." It has also contributed to very high house prices. Overall, immigration in excess of 60,000 per annum negatively impacts wages, economic growth and inequality quite seriously. See Jane O'Sullivan, "[What is a sustainable immigration level anyway?](#)" John Menadue's Pearls and Irritations, 30 December 2023.

<sup>17</sup> **Rationale for proposals for entitlement to free Early Childhood Education and Care (ECEC):** Options for entitlement to free ECEC in **Society 11** differ from those proposed by CPD in its 2024 paper, “[Growing Together: A future universal early childhood education and care system for Australia](#),” mainly because the CPD proposals substantially retain elements of a

**Indicators, Targets & Strategies for the success of Our Society**

**Society 11 – Early childhood care**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
		<p>childcare and increased participation” June 2020.</p> <p>In 2024, the Centre for Policy Development (CPD), in response to the Australian government’s profession of commitment to “making access to high-quality, equitable and affordable early childhood education and care universal”, proposed “bold reform solutions” (legislative, funding and governance arrangements) to address issues in delivery of childcare including affordability, equity of access, market distortion (in the for-profit sector), and workforce shortages. CPD suggested a holistic approach including “a national entitlement for all young children to access a minimum of three days of early childhood education and care per week free or at a low set fee.”</p> <p>Source: Commonwealth Government, “Working Future, The Australian Government’s White Paper in Jobs and Opportunities,” September 2023.                      Source: Centre for Policy Development, “Growing Together, A future universal early childhood education and care system for Australia,” 2024.</p>

**Note:** Baseline data, Indicators, Targets and Strategies in this section will expand in future issues of *Australia Together*, based on availability of data and on the input of Australians.

targeted welfare system and are therefore not “universal”. The CPD proposals therefore fit less well with the Vision for *Australia Together* insofar as they still differentiate access to assistance on the basis of income and still imply the need for income tests. In other words, there is no equality of assistance or of rights to assistance. Assistance is provided differentially. CPD describes a “universal national entitlement” as one where “the system moves from one where a parent’s income and activity determines their access to a subsidy, to one where all young children have a universal national entitlement to access ECEC.” However, CPD has not recommended a set fee entitlement that is universal. Instead it has means tested the level of subsidy. This is still a system where a parent’s income determines access to the subsidy. CPD’s apparent intention is to give all children an equal start but the proposal is comparatively inefficient, discriminatory, and accepting of ongoing social stratification. Far greater efficiency and fairness can be achieved if a fully universal free ECEC system is introduced simultaneously with a UBI at the poverty level as per Option B in **Econ04.02.04**. The CPD proposal works on the premise that a person must be poor before they can get a benefit. *Australia Together* works towards stopping the poverty itself, whereupon the need for more costly, inefficient, differential benefits can be avoided. If the government chooses not to support a UBI at the poverty level, then the more expensive option of five free days for every child will be required to achieve universality and elimination of the effects of poverty. The government can avoid these unnecessary costs and inefficiencies by the fairer distributions of income and access to education and care that would arise from a UBI and three free days of ECEC plus two more days per week at \$10 a day.

## Chapter 6 – Targets & Strategies for Success in Our Environment

Brief context for the Indicators, Targets & Strategies for Our Environment

**The following information summarises how Australia’s natural environment was faring at the very start of the planning period. In 2020 Australia was heading towards climate and biodiversity catastrophe and was leading the world in the destruction of ecosystems.**

Australia’s scores in the independent international Climate Change Performance Index (CCPI)<sup>21</sup> indicated that **Australia, despite all its wealth, expertise and investment capacity, had played an uncooperative role compared to other nations**, particularly on development and implementation of a sustainable climate change policy.

This uncooperative stance on climate change, combined with a persistent failure to protect Australia’s unique biodiversity, was the single biggest threat to the nation’s future prosperity and economic strength, as the University of Melbourne had made clear in research about the cost of the world’s current trajectory of carbon emissions reduction<sup>22</sup>. In 2020, researchers were able to quantify these potential losses to Australia at \$584 billion by 2030 and \$762 billion by 2050 – amounts which dwarf (but add to) the debt taken on by Australia for Covid-19 of just over \$300 billion.

**For as long as Australia refuses to take a leadership role in climate change prevention on the international stage, Australia’s economy is poised for disaster.**

<sup>21</sup> The Climate Change Performance Index (CCPI) has been produced annually since 2005 by Germanwatch, the NewClimate Institute and the Climate Action Network and is supported by contributions from around 350 climate experts. The CCPI is an independent monitoring tool for tracking countries’ climate protection performance. <https://ccpi.org/download/the-climate-change-performance-index-2021/>

<sup>22</sup> University of Melbourne, Melbourne Sustainable Society Institute, “Australia’s Clean Economy Future: Costs and Benefits”, June 2019, [https://sgsep.com.au/assets/main/SGS-Economics-and-Planning\\_clean-economy.pdf](https://sgsep.com.au/assets/main/SGS-Economics-and-Planning_clean-economy.pdf)

A similar impact on Australia's economy was likely to result from ecosystem and biodiversity loss.

Since colonisation, Australia suffered extensive biodiversity loss<sup>23</sup>.

**Australian Bureau of Statistics**

**“Australia has experienced the largest documented decline in biodiversity of any continent over the past 200 years.”**

And the rate of decline in biodiversity was accelerating<sup>24</sup>.

**“Most jurisdictions consider the status of threatened species to be poor and the trend to be declining.”**

**Australia**  
State of the Environment 2016

In addition to recorded species loss, it was estimated by Queensland and La Trobe Universities that at least another 49 species should be listed as threatened due to the 2019/20 bushfires in south east Australia.

**“South east Australia's bushfires in 2019 and 2020 burnt out 97,000 square kilometres of vegetation – habitat for 832 species of native vertebrate fauna. 70 types had more than 30% of their habitat impacted. 21 of these were already listed as threatened with extinction.”**

Source: Queensland & La Trobe Universities, Michelle Ward, et al, Journal of Nature Ecology & Evolution, July 2020

**Species & ecosystem loss in Australia since colonisation**

- 75% of rainforests and nearly 50% of all forests
- Over 60% of coastal wetlands in southern and eastern Australia
- Nearly 90% of temperate woodlands and mallee
- More than 99% of south-eastern Australia's temperate lowland grasslands
- Over 83% of Tasmania's lowland grasslands and grassy woodlands
- About 95% of brigalow scrub that originally grew in Queensland
- Over 90% of Victoria's grasslands

**AUSTRALIAN MUSEUM**

**Listed threatened and extinct species Australia – 2019**

- Fauna threats & extinctions**
  - 463 fauna species listed as threatened
  - 54 fauna species listed as extinct
- Flora threats & extinctions**
  - 1,336 flora species listed as threatened
  - 37 flora species listed as extinct

Source: Australian Government, Species Profile & Threats Database  
acfp Australian Community Futures Planning

Despite the vital economic importance of attending to climate change and rescuing ecosystems, **policy settings in 2020 were on track to destroy the natural advantage that Australia's wide biodiversity provides for agricultural yields and returns on investment for farmers and landowners.** Australia was losing hundreds of billions of dollars because of its environmental policies.

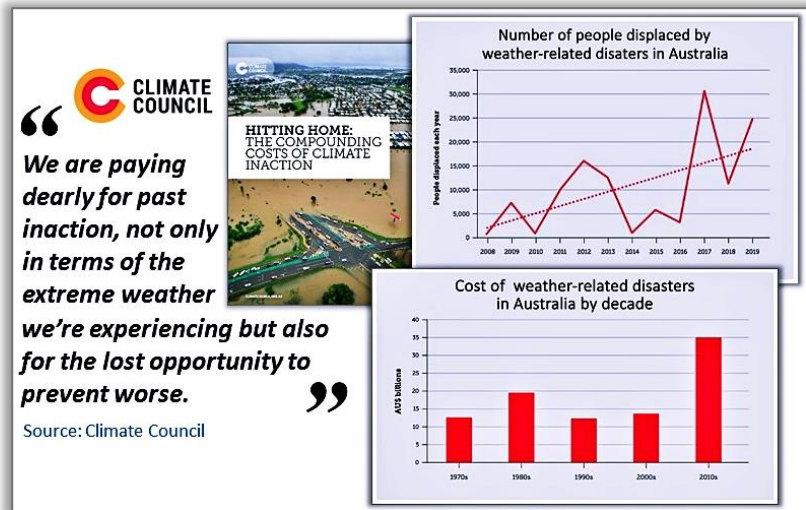

<sup>23</sup> See Australian Bureau of Statistics, “Australia's Biodiversity” web page, <https://www.abs.gov.au/ausstats/abs@.nsf/Previousproducts/1301.0Feature%20Article12009%E2%80%9310?opendocument&tabn>

<sup>24</sup> Commonwealth of Australia, [State of the Environment Report 2016 - Biodiversity](#).

Beyond mere economic considerations, Australia had also been exposed over the decade to 2020 to serious risk of loss of life and public safety due to its poor performance and lack of cooperation on both policies to prevent climate change and actions to reduce carbon emissions to levels sufficient to cap global heating at 1.5° Celsius above pre-industrial revolution levels.

- In policy, Australia had destroyed its carbon pricing system and this had prevented entry to the international carbon trading system, which had in turn prevented Australia from earning substantial national income – income necessary to make climate change adaptation affordable.

- In emissions reduction, despite having one of the world's higher uptakes of solar energy, nothing had been achieved in terms of net reduction of emissions, due to Australia's persistence in use and export of fossil fuels. Nor was it expected that with prevailing policies would Australia be likely to reduce emissions to anywhere near the level necessary to prevent heating. Australia had adopted targets for reduction of emissions by 2030 (26-28% below the tonnages emitted in 2005) which were wholly inadequate for stopping temperature increases and which the country was not on track to meet anyway.

Because Australia had left its run so late to begin reducing emissions, it was accepted that the annual reductions required to ensure that Australia might at least do the minimum necessary to help cap temperature increases at 1.5° Celsius would need to be much higher and faster than they would have been if we had started reducing emissions in 2000. At the outset of the 2020s, Australia had arrived at a point where failure to meet ambitious emissions reduction targets would make climate change adaptation unaffordable for future generations.

But unaffordable bills and lifestyle devastation could still be avoided if Australia were to reach net zero emissions before 2035.

The reality for Australia in the 2020s was that:

1. action to reduce carbon emissions,
2. biodiversity conservation, and
3. environmental renewal, particularly through re-forestation

were the biggest enablers of economic growth. But the necessary incentives were missing. The most effective incentive would have been the re-introduction of a price on carbon (although that was by no means the only necessary policy change). **If a carbon**

**price had been reintroduced it would have been possible for those Australians working on the land to make far more money from planting a tree than they could from cutting one down.** It was also known that Australia as a nation could make far more money from leaving coal and gas in the ground than from digging them up. This would not have suited the fossil fuel industry but it would have suited the nation financially. Moreover, transition plans for those working in dying industries such as coal mining could have been financed because excellent prices could have been commanded in international markets for credits traded for any carbon we might store instead of release to the atmosphere. Unfortunately, **for as long as Australian policy makers refuse to put a price on carbon, Australia will simply miss out on the income from this market and we will continue to deplete the resource renewal potential that our extraordinarily wide biodiversity provides for us.**

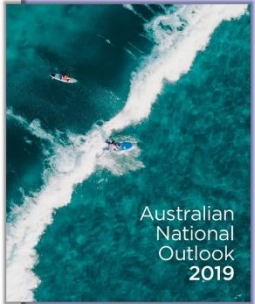

If Australians want to see a better report card on the state of our environment and economy in the next few years, it will be necessary to reverse the policy settings for regional planning and economic measures that have become entrenched in the decade to 2020.

**SELECTED OUTLOOK VISION MEASURES**

Returns to landholders could increase to as much as **\$114 billion** (more than doubling relative to Slow Decline). 

 Carbon plantings could offset up to **700 MtCO<sub>2</sub>e** of emissions by 2060.

Long-term conservation of Australia's valuable natural assets can be achieved through reforestation and land remediation. 

Australian National Outlook 2019

**In 2020 it was not too late for Australia to avoid economic disaster from climate change.**

**GDP losses are already built in.**

**The most reliable way to avoid more is to:**

↓

Reinstate carbon pricing, quickly.

Enter the international carbon trading market quickly.

Build an economy based on 100% renewables, quickly.

**Potential damages from climate change to Australia at current global emissions patterns**

\$ Billion 584	\$ Billion 762	\$ Billion 5,000
Cost by 2030 with current global emissions patterns	Cost by 2050 with current global emissions patterns	Cost by 2100 with current global emissions patterns

Source: University of Melbourne, Sustainable Society Institute

**And we can build a new economy with higher returns for more Australians than fossil fuels by:**

↓

Sustainable agriculture (subject to restoring the Murray-Darling).

Carbon farming, re-forestation, and biodiversity conservation.

Energy efficient buildings.

Electric vehicles.

Renewable energy and green hydrogen.

 Australian Community Futures Planning

For more information on the context for Targets and Strategies included in **Australia Together for Our Environment**, [view The State of Australia in 2020 on YouTube](#).

Detailed context for the Targets, Indicators & Strategies in **Our Environment** can be found in **The State of Australia in 2020 – Episode 6, Parts 1 and 2.**

[Click here for The State of Australia video playlist](#)

The following Indicators, Targets and Strategies for **our environment** are derived consistent with the primary objectives of building a nation that:

- is committed to securing the safety of both current and future generations of all Australians;
- is skilled in ethical fair sharing of intergenerational burdens for planetary protection;
- is appreciative of its connection with and dependence on Australia’s unique and magnificent biodiversity and climate; and
- as per the **Vision for Australia Together**:
  - has the courage to take a leading place in achieving the environmental aims of a global society, recognising that Australia’s success is dependent on being a decent international citizen; and
  - affirms that stewardship of ecology is fundamental to planetary and human survival.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our  
environment  
Australia will  
become:**

- A leading global advocate for action on climate change
- A net zero emissions nation
- A proactive planner of climate change adaptation
- A nation that puts the environment before unsustainable consumption
- An environmentally educated community
- A renewable energy superpower
- Efficiently connected with zero-emissions transport
- Environmentally & economically sustainable in agriculture & fisheries
- Confident of the safety & security of its water supplies
- A biodiversity haven
- A replanted & reforested land
- A protector of scarce resources
- A provider of accessible national & urban parkland
- A pollution free biosphere
- A marine wildlife haven
- Regenerative by design in consumption & production
- A conservator of cultural & built heritage
- Multi-central in its cities, efficiently connecting people with jobs, health, education & recreation
- A land of thriving self-supporting regions

Targets and Strategies will also contribute positively to multiple other Directions in **Australia Together**, as displayed.

## Environment 1 – Environmental advocacy

**Important Note:** From Issue No. 7 of *Australia Together* onwards, baseline data and targets for carbon emissions reduction may be adjusted periodically due to the failure of the world and Australia to take action to reduce carbon emissions sufficiently to prevent global heating above 1.5° Celsius – a failure which by 2023 had already resulted in a mean annual temperature on the Australian continent of 1.5° Celsius above the 1961–1990 average (at least for the 2023 year). Issues of *Australia Together* from 2024 take it as a given that global heating will exceed 1.5° Celsius but that it is still possible to keep global temperature increases close to 1.5° Celsius and below 2° Celsius and that governments should not be given permission to exempt themselves from Australia’s legal commitments under the Paris Agreement and set Australia on a path to 2° Celsius of heating or more, when it can still be avoided.

<sup>26</sup> University of Melbourne Sustainable Society Institute, “Australia’s Clean Economy Future: Costs and Benefits”, June 2019, page 3: “The potential damages from climate change to Australia at current global emissions patterns are quantified as: • \$584.5 billion in 2030 • \$762 billion in 2050 • more than \$5 trillion in cumulative damages from now until 2100. These costs are conservative – they exclude the bulk of costs of floods and bush fires, pollution, damage to environmental assets and biodiversity losses. Conversely, the national costs of effective emissions reduction – based on a carbon price or renewables target – are estimated at \$35.5 billion from 2019 to 2030, or 0.14% of cumulative GDP; a negligible impact. Overall, the costs of emissions reduction are far less than the damages of inaction – even with modelling underestimating damages from climate change and overestimating the costs of emissions reduction.”

**Note:** Baseline data, Indicators, Targets and Strategies in this section will expand in future issues of **Australia Together**, based on availability of data and on the input of Australians.

## Environment 2 – Climate change prevention

**Important Note:** Strategies and Targets in Environment 2 – Climate change prevention are formulated in response to the fact that in the 16 years between 2006 and 2022 the proportion of Australians who wanted the government to do something to prevent climate change never dropped below 80%. As early as 2006, over 90% wanted the issue to be addressed, with approximately 70% of that group wanting something done immediately “even if this involves significant costs”. This indicates strongly that the vast majority of Australians wanted the country to get started early on heading off the problem. And in the years since 2017, the same proportion – 90% on average – have responded that steps need to be taken to deal with the threat.<sup>27</sup>

<sup>27</sup> Natasha Kassam, [Lowy Institute Poll 2022](#), page 27. The tables on this page show that between 2006 and 2022, an average of 52% of Australians wanted immediate action on climate change even if it involved significant costs and another 35% on average wanted more gradual action at lower cost. Only 12% on average wanted no action.

**Indicators, Targets & Strategies for the success of Our Environment**

**Environment 2 – Climate change prevention**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p>emissions in 2019 were 532 million tonnes, later updated by DCCEEW to 503 million tonnes), to be achieved by annual tonnage emission load reductions of at least 48.4 million tonnes, year-on-year, in order to avoid exceeding the 3.53 billion tonne emissions budget. Annual reductions of 48.4 million tonnes from 2023 onwards should result in Australia reaching net zero by 2032 with 164 million tonnes to spare in the 3.53BT budget of safe and fair emissions by Australia necessary to ensure heating is capped as close as possible to 1.5 degrees Celsius.</p> <p><b>(Note:</b> In <i>Australia Together</i> Issue Nos. 1 to 6, this target was for a 79% reduction by 2030 on annual emissions in 2019. However, Australia failed to reduce emissions sufficiently. Therefore this target has necessarily been adjusted upwards to ensure Australia maximises its chances of meeting the temperature target of as close as possible to 1.5 degrees of global heating. For every year Australia fails to reduce emissions sufficiently, this target will need to be adjusted upwards again. <b>Every year of delay will make the task of stopping global heating more difficult. The safety of Australians requires the federal government to take action consistent with the strategies in this plan, or face the penalties that have been or should be legislated under Gov02.05 and Gov02.05.01.)</b></p> <p><b>Top Priority Target/Strategy: Achievement of net zero emissions by 2033 within the carbon budget</b></p>	<p><b>Econ 3</b> A country where economic opportunity, growth &amp; prosperity are equitably shared &amp; living standards improve continuously for all.</p>	<p>emissions to 43% below 2005 levels by 2030 and a multi-year emissions budget from 2021-2030. Based on a 43% reduction by 2030, our emissions budget for this period is 4,381 Mt CO<sub>2</sub>-e.” Source: DCCEEW, Department of Climate Change Energy, Environment &amp; Water Australia’s Emissions Projections 2022 webpage, 14 Feb 2023</p>
	<p><b>Econ 4</b> A nation fairly raising &amp; sharing its wealth.</p>	
	<p><b>Soc 1</b> A safe home.</p>	
	<p><b>Soc 4</b> A place of optimal health &amp; wellbeing.</p>	
	<p><b>Soc 6</b> A society of equals.</p>	<p>In 2005 total emissions (excluding exports) were 622 Mt CO<sub>2</sub>-e, which means the target annual emissions for 2030 with a 43% reduction is 355 Mt CO<sub>2</sub>-e. Assuming annual even tonnage reductions of 13.5 Mt CO<sub>2</sub>-e will be necessary to reduce emissions to 355 Mt CO<sub>2</sub>-e in 2030, this would result in consumption of only 3,678 Mt of the 4,381 Mt CO<sub>2</sub>-e adopted budget, leaving a couple of years spare in case of overruns. However, reductions of 13.5 million tonnes year on year will mean Australia won’t achieve net zero until 2056, by which time we will have emitted a total of 8,147 Mt (from 2022 to 2056). This equates to an assumption by the Albanese government that travel on a path to much greater than 1.8 degrees of heating is in Australia’s interests.</p> <p>Adoption of a 43% reduction of emissions by 2030 and a budget of 4,381 Mt CO<sub>2</sub>-e for 2022 to 2030 is fully contrary to the national interest. Hence the need to set a target for achievement of net zero emissions within a safe and fair budget of carbon emissions. As shown in Env01.01, that safe budget is 3,530 Mt CO<sub>2</sub>-e (3.5</p>

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
	<p><b>Soc 1</b> A safe home.</p>	<p>in 2030 is some 40% larger than today but uses 7% less energy.”</p>
	<p><b>Soc 4</b> A place of optimal health &amp; wellbeing.</p>	<p>In 2020, the Australia Institute survey, “Climate of the Nation” found that “65% of Australians think the Australian government should stop new coal mines.”</p>
	<p><b>Soc 6</b> A society of equals.</p>	<p>Sources: International Energy Agency, Net Zero by 2050 – A Roadmap for the Global Energy Sector 2021, Australia Institute, Climate of the Nation 2020</p>
<p><b>Top Priority Target/Strategy:</b>  <b>Phase out of existing investments in coal, oil and gas – legislative program</b>  <b>Env02.04</b>                  By 2024, consistent with carbon emissions reduction targets of net zero by 2033 as per <b>Env02.01, Env02.01.01</b> and <b>Env02.01.02</b>, legislate to:</p> <ul style="list-style-type: none"> <li>• phase out all existing coal operations (mining, power generation and export) completely by 2030;</li> <li>• reduce gas production to a maximum of the levels required for:                         <ul style="list-style-type: none"> <li>○ Australian grid security (after all other accessible supplies of renewable energy have been utilised) as determined by the Australian Energy Market Operator (AEMO) in their Integrated Systems Plans as amended from time to time, and for</li> <li>○ supply of domestic non-industrial customers; and</li> </ul> </li> <li>• prohibit sales of new internal combustion engine cars and heavy vehicles by 2026.</li> </ul>	<p><b>Env 2</b> A net zero emissions nation.</p> <p><b>Env 1</b> A leading global advocate for action on climate change.</p> <p><b>Env 3</b> A proactive planner of climate change adaptation.</p> <p><b>Env 4</b> A nation that puts the environment before unsustainable consumption.</p> <p><b>Env 6</b> A renewable energy superpower.</p> <p><b>Env 7</b> Efficiently connected with zero-emissions transport.</p> <p><b>Env 8</b> Environmentally &amp; economically sustainable in agriculture &amp; fisheries.</p> <p><b>Env 19</b> A land of thriving self-supporting regions.</p> <p><b>Econ 1</b> A model of transition from excessive consumption to sustainability.</p> <p><b>Econ 2</b> A model of employment planning &amp; justice in industrial reform &amp; economic transitions.</p> <p><b>Econ 5</b> A strong regulator of fairness in markets, creating confidence for investors.</p> <p><b>Gov 9</b> A nation outlawing corporate greed &amp; where private sector business practice &amp; ethics serve the public good.</p>	<p>In 2021, the International Energy Agency (IEA) reported that in order to reach net zero global carbon emissions by 2050, consistent with the Paris Agreement, existing unabated fossil fuel production would need to be phased out in developed countries by 2030 and in all countries by 2040. However, this modelling assumed a range of other actions vital to achieving carbon neutrality would be implemented in parallel, including Carbon Capture Utilisation and Storage.</p> <p>Given that CCUS is not viable for purposes of abatement of fossil fuels, it cannot be relied on for planning purposes. Moreover, strategies which seek to achieve net zero by 2050 are highly unreliable in capping global heating to 1.5° Celsius.</p> <p>Noting the IEA Report and the AEMO’s ISP 2020 (see <b>Env06.02</b>) it is apparent that in 2021, global energy policy and planning agencies were developing plans to phase out coal, gas, and oil before world emissions exceed limits required to keep temperature</p>

<sup>28</sup> UN Climate Change Conference UK 2021, *COP26 Explained*, page 47: “WHY DOES LIMITING TEMPERATURE RISE TO 1.5 DEGREES MATTER? At 2 degrees of global warming, there would be widespread and severe impacts on people and nature. A third of the world’s population would be regularly exposed to severe heat, leading to health problems and more heat-related deaths. Almost all warm water coral reefs would be destroyed, and the Arctic sea ice would melt entirely at least one summer per decade, with devastating impacts on the wildlife and communities they support. We cannot rule out the possibility that irreversible loss of ice sheets in Greenland and the Antarctic could be triggered, leading to several metres of sea level rise over centuries to come. At 1.5°C, the impacts would be serious, but less severe. There would be lower risks of food and water shortages, lower risks to economic growth and fewer species at risk of extinction. Threats to human health from air pollution, disease, malnutrition and exposure to extreme heat would also be lower. That is why every fraction of a degree of warming matters, and why we are dedicated to keeping the prospect of holding temperature rises to 1.5 degrees alive.”

## Environment 4 – Environmental regulation & approvals

<b>Indicators, Targets &amp; Strategies for the success of Our Environment</b>		
<b>Environment 4 – Environmental regulation &amp; approvals</b>		
<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>Top Priority Target/Strategy: Overhaul of the Environment Protection and Biodiversity Conservation Act 1999 Env04.01</b></p> <p>By 2024, recognising that the Environment Protection and Biodiversity Conservation (EPBC) Act 1999, as a regulatory framework, is incapable of meeting the needs of Australia in the biodiversity restoration required under the government’s own Nature Positive Plan and under <b>Env10.03</b> and <b>Env10.03.01</b>, legislate the full suite of reforms to the EPBC Act recommended by Professor Samuel in 2020, with the exception of those that contemplate continued use of offsets in circumstances where the stricter standards allow ecologically feasible offsets to balance habitat loss from a development. Instead, the use of offsets must be prohibited due to the fact that that biodiversity recovery is not possible with an offset system. An offset system will bake in further loss.</p>	<b>Env 4</b>	A nation that puts the environment before unsustainable consumption.
	<b>Env 1</b>	A leading global advocate for action on climate change.
	<b>Env 2</b>	A net zero emissions nation.
	<b>Env 3</b>	A proactive planner of climate change adaptation.
	<b>Env 8</b>	Environmentally and economically sustainable in agriculture and fisheries.
	<b>Env 9</b>	Confident of safety and security of its water supplies.
	<b>Env 10</b>	A biodiversity haven.
	<b>Env 11</b>	A replanted and reforested land.
	<b>Env 12</b>	A protector of scarce resources.
	<b>Env 13</b>	A provider of accessible national & urban parkland.
	<b>Env 14</b>	A pollution free biosphere.
	<b>Env 15</b>	A marine wildlife haven.
	<b>Env 16</b>	Regenerative by design in consumption & production.
	<b>Env 19</b>	A land of thriving self-supporting regions.
<b>Soc 1</b>	A safe home.	
<b>Soc 2</b>	A land with an Indigenous heart.	
<b>Soc 4</b>	A place of optimal health and wellbeing.	
		<p>In 2020, the Australian National Audit Office (ANAO) released an audit report on the government’s management of approvals of controlled activities under the federal Environment Protection and Biodiversity Conservation Act 1999. The report was scathing in its findings on the use of an “offset system”<sup>29</sup> for controlling the impact of development on biodiversity. Source: Auditor General Report No. 47, 2019-20, Referrals, Assessments and Approvals of Controlled Actions under the Environment Protection and Biodiversity Conservation Act 1999.</p> <p>Later in 2020, an independent review of the EPBC by Graeme Samuel AC found that “Australia’s natural environment and iconic places are in an overall state of decline and are under increasing threat. The current environmental trajectory is unsustainable.” Review recommendations included, among other things, that:</p> <ul style="list-style-type: none"> <li>the EPBC Act should be immediately amended to enable the development and implementation of legally enforceable National Environmental Standards;</li> <li>a comprehensive reworking of the EPBC Act should be undertaken;</li> <li>the EPBC Act should be amended to support more effective planning that</li> </ul>

<sup>29</sup> An environmental offset is supposed to compensate for unavoidable impacts on significant environmental matters, (e.g. valuable species and ecosystems) on one site, by securing land at another site, and managing that land over a period of time, to replace those significant environmental matters which were lost. However, this does not guarantee replacement habitat for threatened species or ecosystems; it simply provides that another area will not also be developed. The system allows developers to promise not to destroy an existing healthy ecosystem if they’re allowed to destroy another. This can only result in net loss of biodiversity.

	<p><b>Gov 11</b> A just &amp; cooperative participant on the global stage.</p>	
	<p><b>Soc 1</b> A safe home.</p>	
<p><b>Top Priority Target/Strategy:</b>  <b>National Renewable Energy Targets (RETs) – setting targets for economic sustainability and prevention of global heating</b>  <b>Env06.03</b></p> <p>By 2024, recognising that:</p> <ul style="list-style-type: none"> <li>job growth in fossil fuels is set to decline and that job growth in renewable energy requires policy settings that signal a future for renewables; and that</li> <li>targets for prevention of global heating under <b>Environment 1 and 2</b> will not be met unless all energy is generated from renewable sources,</li> </ul> <p>legislate to renew the Renewable Energy Target (RET), setting it at a minimum of 100% for the nation by 2030, and support the new RET by:</p> <ul style="list-style-type: none"> <li>re-introducing a price on carbon as per <b>Econ01.08</b>; and/or by</li> <li>introduction of a “Carbon Solutions Levy (CSL)” as per <b>Econ01.06.01</b>; and by</li> <li>introduction of a legislated Renewable Energy Storage Target as per <b>Env06.04</b>.</li> </ul>	<p><b>Env 6</b> A renewable energy superpower.</p>	<p>In 2001, Australia introduced a mandatory Renewable Energy Target (RET). The Target provided a financial incentive to encourage the additional generation of electricity from sustainable and renewable sources.</p> <p>In 2010, the mandatory RET was increased to 41,000 gigawatt-hours of renewable generation from power stations. This was subsequently reduced to 33,000 gigawatt-hours by the Abbott Government.</p> <p>In 2012, the RET and other policies incentivising renewables were supplemented by a carbon price and a \$10 billion-dollar fund to finance renewable energy projects. These initiatives were later withdrawn by the Abbott Federal Government.</p> <p>In 2019, Australia met its 2020 renewable energy target of 23.5% and 33,000 gigawatt-hours. The target was not renewed, which resulted in retailers withdrawing from the renewable energy market.</p> <p>In 2020, the Institute for Sustainable Futures at the University of Technology Sydney and the Clean Energy Council demonstrated that if policies are set to signal a future for renewables, the renewable energy industry could create 20,000 extra jobs in five years, increasing the total jobs from 25,000 to 45,000. But if no additional</p>

	<p><b>Gov 9</b> A nation outlawing corporate greed &amp; where private sector business practice &amp; ethics serve the public good.</p>	<p>As at 2021, several states and territories had set their own renewable energy targets.<sup>30</sup> Source: Clean Energy Council, Clean Energy Australia Report 2021; Wikipedia, Renewable energy in Australia webpage; and UTS Institute for Sustainable Futures, Renewable Energy Jobs in Australia, Stage One, June 2020.</p>
	<p><b>Gov 11</b> A just &amp; cooperative participant on the global stage.</p>	<p>In 2023, Prime Minister Albanese announced a “plan to boost renewables to 82 per cent of the grid by 2030”. This speech did not clarify that the ‘grid’ referred to only meant the National Electricity Market (NEM). It became known as a renewable energy target but was informal. Separately, the federal government established a new RET with a target to deliver an extra 33,000 gigawatt-hours (GWh) of electricity from renewable sources every year from 2020 to 2030. The relationship between the two “targets” is</p>

<sup>30</sup> Clean Energy Council, “Clean Energy Australia Report 2021”, <https://assets.cleanenergycouncil.org.au/documents/resources/reports/clean-energy-australia/clean-energy-australia-report-2021.pdf>. As at 2021:

- Tasmania: was the first Australian state to source 100 per cent of its electricity from renewable sources and set a 200 per cent renewable energy target by 2040.
- ACT: reached 100% renewable energy in 2019.
- South Australia: was expected to reach its 100% renewable energy target by 2025 and set a plan for renewable energy to account for more than 500 per cent of the state’s electricity demand.
- Northern Territory: had a target of 50 per cent renewables by 2030.
- Queensland: had a 50 per cent renewable energy target by 2030.
- Victoria: announced a renewable energy auction to procure 600 MW of new solar and wind energy and committed \$540 million to establish six renewable energy zones.
- Western Australia: had no target but expected Renewables expected to account for 70 per cent of generation by 2040.
- New South Wales: had no target but their Energy Infrastructure Roadmap to deliver 12 GW of new transmission capacity will increase NSW's renewable energy penetration to over 60 per cent by 2030.

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
development of rapid transport links between the capital cities of Sydney, Melbourne and Brisbane and their regional satellite cities as per <b>Env07.01</b> . <sup>31</sup>	<b>Econ 1</b> A model of transition from excessive consumption to sustainability.	the market was already completing at least 900,000 homes over 5 years without government assistance (although not in the well located areas). As such, the extra \$3 billion would offer councils a windfall for another 200,000 homes at \$15,000 each. However, councils are not stopping development, developers are. As such the extra \$15,000 makes councils nothing more than bounty hunters who will be incentivised to engage improperly with developers to release land or increase density. In effect the bounty is likely to be passed through to the developers, not be retained by the community, unless the council develops the housing itself. This is unlikely to result in extra homes in the middle rings of capital cities. In short, it's a waste of money. The \$3 billion should be diverted to funding radial transport links between the capital cities of Sydney, Melbourne and Brisbane and their regional satellite cities as per <b>Env07.01</b> . These links are essential to the supply of decent affordable housing connected to employment areas. <sup>31</sup> The combination of policies indicates that the integrated planning approach taken in *Australia Together* produces an entirely different strategic approach to housing than that favoured by the federal government. The federal government's approach relies on incentivising the private sector to deliver social programs and in effect subsidising them while allowing them to keep all profits and escalate price for homes. The strategic approach in *Australia Together* is to spend public funds on initiatives that will place downward pressure on housing prices and rents. The federal governments National Housing Accord will do the opposite.

<b>Environment 8 – Agriculture &amp; fisheries</b>		
<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>Top Priority Target/Strategy:</b>  <b>Sustainability of agriculture – transition to food security in the age of climate change</b>  <b>Env08.01</b>                      By 2025, the federal government is to commission the CSIRO to develop a plan for securing Australia’s food supplies in the age of climate change and maximising yields sufficient to allow for export of food to help avert world famines. The plan should include programs for:</p> <ol style="list-style-type: none"> <li>introduction of regenerative farming to restore ecosystem functioning on that proportion of land currently used for farming and grazing which already produces or will soon be likely to produce low or zero yields due to scarcity of water, fertilisers, natural pollination, etc.;</li> <li>establishment of multiple food production/cultivation facilities in urban areas that are mostly indoor and can take advantage of techniques from hydroponic, agritectural, and aquaponic to cellular agriculture systems such as synthetic meat, milk, fish and eggs;</li> <li>expansion of marine aquaculture in deep-water ocean culture and algae (seaweed) farming or water-cropping to help replace current forms of vegetable and protein cultivation;</li> <li>any other programs that will protect food production yields; and</li> </ol>	<p><b>Env 8</b> Environmentally and economically sustainable in agriculture and fisheries.</p>	<p>In the decades to 2024, scientists acknowledged that:</p> <ul style="list-style-type: none"> <li>farming had been made possible in human civilisations by the advent of the Holocene – an unusual period of climatic stability on earth that arose after the end of the last ice age – but that this period may be coming to an end due to human-induced climate change;</li> <li>“The future climate will not only be hotter, it will be more variable, violent, and far less suited to agriculture – with savage droughts, fires and heatwaves followed by raging floods, crop-wrecking storms, and pest and disease outbreaks. A warmer planet means greater evaporation from the oceans, which in turn leads to heavier local dumps of rain, hail, and snow, all of which ruin farm production”; and</li> <li>the havoc wreaked by climate will combine with continued loss of topsoil, dire shortages of water, growing scarcity of fertilisers, and widespread chemical poisoning and over-population to create large scale food shortages and famines.</li> </ul> <p>However, it was also acknowledged that solutions are at hand that require little or no new technology and are affordable and the Council for the Human Future proposed a “three pillar” solution. ## Environment 11 – Vegetation

<b>Indicators, Targets &amp; Strategies for the success of Our Environment</b>			
<b>Environment 11 – Vegetation</b>			
<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>		<b>Baseline data</b>
<p><b>Forests and environmental plantings</b></p> <p><b>Top Priority Target/Strategy:</b>  <b>Legislated program to increase GDP and returns to landholders and mitigate climate change by increasing native forestry cover and restoring degraded ecosystems</b>  <b>Env11.01</b>            By 2024, prohibit, by legislation, net losses of forest cover on a state by state (and territory) basis.            By 2025, preferably in parallel with legislation to establish a Carbon in the Land and Sea Finance and Trading Corporation under <b>Econ01.07</b>, adopt by legislation a goal of increasing forest cover and environmental plantings sufficient to sequester a minimum of 260MtCO<sub>2</sub>-e by 2033 (assisting Australia notionally to reach net zero emissions in that year).            By 2026, revise and adjust forest cover and environmental plantings targets upwards to any extent necessary to achieve net zero carbon emissions by 2033.            By 2025, report on the feasibility of increasing forest and plantings cover beyond that necessary to achieve net zero emissions by 2033 such that surplus credits can be sold to other countries.</p>	<b>Env 11</b>	A replanted & reforested land.	<p>In 2011, 16.22% of Australia's total land area was covered by forest.            Source: Australian Government, data.gov.au beta, Forest area as a proportion of total land area</p> <p>In 2015, Australia committed itself to the UN Sustainable Development Goals, including Goal 15 to "protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss".            Source: United Nations Sustainable Development Goals, No. 15.</p> <p>In 2019, the authors of the Australian National Outlook (National Australia Bank and the CSIRO) reported that, "Under the Outlook Vision, an optimal mix of carbon and environmental plantings could sequester as much as 260 MtCO<sub>2</sub>-e in 2050, allowing Australia to reach zero net emissions in that year. With more effective global action on climate change, plantings could sequester between 400 and 700 MtCO<sub>2</sub> e by 2060, with approximately half that sequestration being sold to other countries." The need to reach net zero by 2033 requires acceleration of this suggested program to be consistent with <b>Env02.01</b>.            Source: NAB &amp; CSIRO, Australian National Outlook, 2019.</p>

### Environment 12 – Land & resource conservation

Indicators, Targets & Strategies for successful performance	In the Directions of becoming ...	Baseline data
<p>By 2025, recognising that native forest logging:</p> <ul style="list-style-type: none"> <li>increases the intensity of bushfires;</li> <li>degrades and depletes freshwater resources;</li> <li>severely impacts tourism industries and jobs;</li> <li>provides very few jobs in Australia (less than 0.5%, compared to tourism which provides almost twelve times more jobs);</li> <li>generates very little material that is used in housing construction (the vast majority of production from logging old growth native forests is woodchips and paper pulp);</li> <li>loses vast amounts of money for taxpayers;</li> <li>adds significantly to carbon emissions; and</li> <li>makes it impossible to reach carbon emissions targets (even the easy ones),</li> </ul> <p>legislate to end all native forest logging (and other forms of native forest harvesting and tree removal) in Australia by 2026.</p>	<b>Env 3</b> A proactive planner of climate change adaptation.	<ul style="list-style-type: none"> <li>almost half the country is now used for grazing;</li> <li>more than 6.1m hectares of primary native forest (an area more than six times the size of suburban Melbourne) had been cleared since 1990; and</li> <li>over the five years to 2019 nearly 290,000 hectares of primary forest and 343,000 hectares of regrown forest was cleared.</li> </ul> <p>Source: State of the Environment Report 2021. Source: Adam Morton and Graham Readfearn, "State of the environment: shocking report shows how Australia's land and wildlife are being destroyed," The Guardian, 19 July 2022.</p> <p>In 2024, research assembled by one of the world's leading experts in forest and woodland ecology established that native forest logging offered absolutely no benefits to Australia's environment, biodiversity, economy, employment, tourism industries, freshwater security, or carbon emissions reduction aims. Formal economic evaluation indicated that the economic value of native forest logging in Australia (which is mainly for woodchips and paper pulp) is low or nil. Compared to the economic value of forests for production of woodchips and paper:</p> <ul style="list-style-type: none"> <li>the value of forests for water is up to 25.5 times greater,</li> <li>the value of forests for tourism is 20 times greater, and</li> <li>the value of forests, especially native old growth forests, for carbon (stored) is at least 4 to 5 times greater.</li> </ul>
	<b>Env 4</b> A nation that puts the environment before unsustainable consumption.	
	<b>Env 8</b> Environmentally and economically sustainable in agriculture and fisheries.	
	<b>Env 9</b> Confident of safety and security of its water supplies.	
	<b>Env 10</b> A biodiversity haven.	
	<b>Env 11</b> A replanted and reforested land.	
	<b>Env 13</b> A provider of accessible national & urban parkland.	
	<b>Env 14</b> A pollution free biosphere.	
	<b>Env 15</b> A marine wildlife haven.	
	<b>Env 16</b> Regenerative by design in consumption & production.	
	<b>Env 19</b> A land of thriving self-supporting regions.	
	<b>Soc 1</b> A safe home.	
	<b>Soc 2</b> A land with an Indigenous heart.	
	<b>Soc 4</b> A place of optimal health and wellbeing.	
	<b>Soc 13</b> A wellspring of inspiration & creativity.	
	<b>Soc 16</b> A society prepared and resilient in times of disaster.	
<b>Econ 1</b> A model of transition from excessive consumption to sustainability.		
<b>Econ 2</b> A model of employment planning & justice in industry transition.		
<b>Econ 3</b> A country where economic opportunity, growth & prosperity are equitably shared & living

**Note:** Baseline data, Indicators, Targets and Strategies in this section will expand in future issues of **Australia Together**, based on availability of data and on the input of Australians.

<b>Indicators, Targets &amp; Strategies for the success of Our Environment</b>		
<b>Environment 18 – Cities planning</b>		
<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>Urban consolidation in the largest capital cities – Sydney, Melbourne, Brisbane</b> <b>Env18.01</b></p> <p>By 2025, recognising that cities need to be well connected and affordable, require state governments to establish urban planning frameworks that:</p> <ul style="list-style-type: none"> <li>• create multicentre capital cities: denser capital cities that grow around multiple city ‘centres’, creating hubs that are well connected through comparably populated economic corridors;<sup>32</sup></li> <li>• diversify housing and land use: in both capital and satellite cities there is a greater variety of housing types located closer to jobs, services and amenities. (This is not just about increasing the supply of housing, but also the supply of high-quality places to live.); and</li> <li>• enhance transport infrastructure: density and diversity enable conditions where less travel is required and better ways to make journeys, including mass-transit, autonomous vehicles and active transport, like walking and cycling, are available.</li> </ul>	<p><b>Env 18</b> Multi-central in its cities, efficiently connecting people with jobs, health, education and recreation.</p>	<p>In 2019, the Australian National Outlook (National Australia Bank, CSIRO et al) identified urban sprawl as a key determinant of economic decline. The more cities sprawl outwards, the more difficult it is for people in the outer suburbs to access jobs, education and services and the more housing prices rise to unsustainable levels as do fuel, energy and transport costs. Impacts on greenspace, essential vegetation and biodiversity are likewise unsustainable. Urban sprawl would result in 2 million people having to live in outer suburbs with vastly reduced access to services and employment. This would amount to a very significant decline in quality of life. To avoid this, the Australian National Outlook 2019 concluded that there is a need for a robust program of capital city infill concurrent with land zoning changes sufficient to result in the average density of major cities increasing by 60–88%. It assumes a greater proportion of the urban population living at higher density (not just in city centres), with multiple high-density precincts. Source: NAB &amp; CSIRO, Australian National Outlook, 2019</p>
	<p><b>Soc 1</b> A safe home.</p>	
	<p><b>Soc 3</b> Inclusive, welcoming &amp; enabling.</p>	
	<p><b>Soc 4</b> A place of optimal health and wellbeing.</p>	
	<p><b>Soc 5</b> A model of lifelong educational opportunity.</p>	
	<p><b>Soc 6</b> A society of equals.</p>	
	<p><b>Soc 9</b> A land without homelessness and with decent affordable housing for all.</p>	
	<p><b>Soc 10</b> A place of supportive familial &amp; other connections &amp; without domestic abuse.</p>	
	<p><b>Soc 11</b> A land without child disadvantage.</p>	
	<p><b>Soc 12</b> A sure provider of lifelong dignity.</p>	
	<p><b>Soc 13</b> A wellspring of inspiration &amp; creativity.</p>	
	<p><b>Env 1</b> A leading global advocate for action on climate change.</p>

<b>Env 12</b>	A protector of scarce resources.	
<b>Env 17</b>	A conservator of cultural & built heritage.	
<b>Env 18</b>	Multi-central in its cities, efficiently connecting people with jobs, health, education and recreation.	
		<p>In 2023, housing in cities for generations born after 1980 had become basically unaffordable, but employment opportunities were not readily available in regions where housing is more affordable. It was acknowledged that “What’s needed is decentralisation of housing but not necessarily of employment” but this this would require “fast, efficient commuting trains that allow dormitory suburbs to be developed further from the CBD.” It was acknowledged that this “would dramatically increase the supply of ‘well-located’ land as the government’s housing policy describes it, without pushing against the natural barriers against medium-density housing closer to the city.”<sup>33</sup></p> <p>Source: Alan Kohler, Quarterly Essay, “The Great Divide: Australia’s Housing mess and how to fix it,” Issue 92, 2023.                      Source: NAB &amp; CSIRO, Australian National Outlook, 2019</p>

<sup>33</sup> It should be noted that this issue of *Australia Together* does not rule out a strategy of “pushing against the natural barriers against medium-density housing closer to the city” because it is equally important to maintain options for ensuring people can live close to their families. Hence the inclusion of **Env18.02 – Urban consolidation – increasing housing within major city ‘middle rings’**.

# Chapter 7 – Targets & Strategies for Success in Our Economy

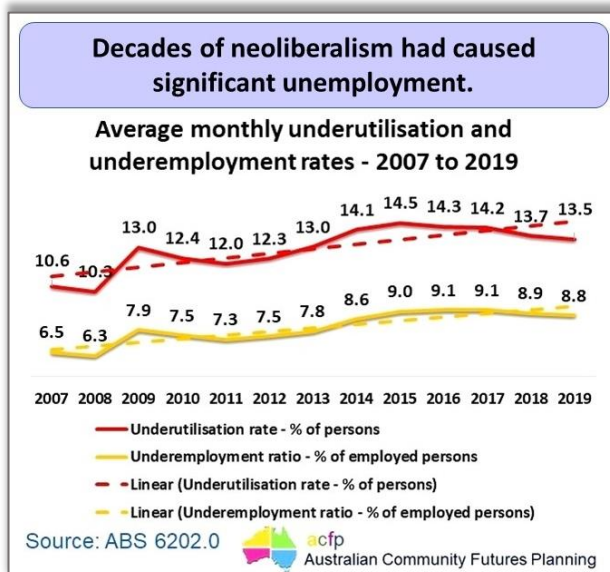

## Brief context for the Indicators, Targets & Strategies for Our Economy

The following information summarises how Australia’s economy was faring at the very start of the planning period. After at least two decades under the increasing influence of neoliberalism in Australian economic policy, the economy was in a state of decline. Neoliberal policy advocates had been asserting that our wellbeing arises exclusively from economic growth and that this growth can only arise from:

- less government,
- less taxation (especially for the rich and for corporations),
- less public ownership or operation of assets and services,
- less welfare, and
- less regulation of markets and the natural environment.

But from the end of the mining boom in 2012, growth in GDP, GDP per capita, productivity and private sector investment all slowed (or fell) in Australia, particularly from 2014 onwards with the election of a conservative federal government that intensified neoliberal policy implementation. This contractionary trend was accompanied by a growth in underemployment (employed persons seeking more hours) and underutilisation of the willing labour force, meaning the economy fell into

operating significantly below its productive capacity. **In December 2019, there were almost 400,000 more underemployed people in Australia than in December 2008 and unemployment was still 1% higher than it was in 2008.** This aggravated already embedded growth in inequality, poverty, hunger, homelessness, family insecurity and breakdown, other types of social disadvantage and environmental degradation such as species loss, water insecurity and climate change.

At the same time, **the Australian economy was verging towards the end of the period of usefulness of its current structure.** It was on the cusp of a transition away from being heavily dependent on mining commodities and toward increased dependency on services – particularly health, welfare, education and aged care – and renewable energy. The opportunities were enormous, but **the necessary transition had a long way to go and was being stalled by a range of neoliberal policy settings** including policies which:

**Neoliberal policies were restricting taxpayer involvement in and returns from their own economy and stalling the necessary transformation of the economy.**

- artificially cap taxpayer involvement in and direct returns from their own economy (through mechanisms such as the tax-to-GDP cap and other anti-competitive policies militating against public sector contributions to economic growth);
- cap wage growth and reduce workplace conditions, which in turn crushes consumer spending and lowers the standard of living for everyone, not just the most vulnerable;
- cap welfare which, in addition to crushing consumer spending, constrains circulation and growth in the area of the economy with the biggest capacity for jobs growth – the services sector (health, welfare, education, aged care);
- sell off public assets and services usually for less than their value which results in price rises and increased risk, particularly environmental risk, for taxpayers; and
- refuse to price carbon so that Australians can boost economic growth and cut the cost of climate change by trading in carbon permits.

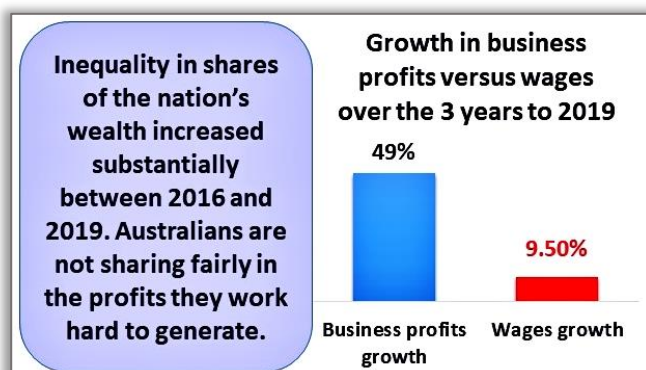

In summary, at the outset of the 2020s **the fundamentals of the economy were very weak and policy settings were running 180 degrees in the wrong direction** for an economy where:

- coal mining and other exports were in decline;
- productivity had stalled;
- private sector investment had stalled;
- poverty was on the rise;
- consumer demand and spending power were in decline;
- environmental resources were being consumed faster than they could be renewed;
- climate and energy policies were non-existent; and
- there was no capacity to reduce interest rates to help the economy along.

**The Australian economy has reached the end of the period of usefulness of its current structure. Heavy dependence on fossil fuels, taxpayer subsidies and private sector ownership and operation of services will no longer suffice as growth generators.**

The coronavirus pandemic had aggravated the situation. If Australians want to see a better report card on the state of our economy in the next few years, a complete reversal of prevailing neoliberal policies in multiple areas is required particularly in:

- taxation,
- distribution of shares of wealth,
- welfare,
- aged care,
- government investment,
- government employment,
- labour relations,
- carbon emissions and pricing,
- energy,

- land use,
- social housing,
- education,
- fair market regulation, and
- competition policy.

Effectively, in the early 2020s Australians had two main menus to choose from. We could choose to keep doing what we had been doing under neoliberalism – a strategy which had been proven to reduce GDP and increase inequality. Or we could shape strategies to increase GDP and reduce inequality. Further background about the menus that we could have chosen from (and still can) can be found in [Episode 5 of The State of Australia in 2020](#) and in Chapter 7 of [By 2050](#).

Detailed context for the Targets, Indicators & Strategies in **Our Economy** can be found in *The State of Australia in 2020* – especially Episode 5.

[Click here for The State of Australia video playlist](#)

The following Indicators, Targets and Strategies for **our economy** are derived consistent with the primary objectives of:

1. achieving steady economic growth but, more importantly, reducing inequality so that Australians share fairly in the wealth they work hard to create;
2. re-structuring Australia’s economy so that it is competitive in a 21<sup>st</sup> century globalised world; and
3. as per the **Vision for Australia Together** ensuring that:
  - everyone can realise their full potential in life, as individuals, members of a family and citizens through unlimited opportunities in education and employment of choice,
  - vital services are fully accessible for all,
  - scarce resources are conserved and fairly shared, and
  - our economy is sustainable and supports rewarding opportunities and continuous improvements in living standards for everyone.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our economy Australia will become:**

- A model of transition from excessive consumption to sustainability
- A model of employment planning & justice in industrial reform & economic transitions
- A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all
- A nation fairly raising & sharing its wealth
- A strong regulator of fairness in markets, creating confidence for investors
- An economy with competitive & profitable public sector participation
- A collaborative, intelligent nation
- Enabled in meeting the communication & information demands of the future
- Productive & prosperous through fair & ethical trade agreements, labour hire & procurement

Targets and Strategies will also contribute positively to multiple other Directions in **Australia Together**, as displayed.

measured over rolling 3-year periods. <sup>34</sup>		
<p><b>Growth measures/targets – GDP growth per capita</b>  <b>Econ01.03.01</b>                      Growth in GDP per capita returns to its pre GFC average of at least 2.2% over rolling 3-year periods.</p>	<p><b>Econ 1</b>                      A model of transition from excessive consumption to sustainability.</p>	<p>Between 1984 and 2008 (before the GFC) growth in GDP per capita averaged 2.2% per annum.                      Between 2009 and 2013 (post-GFC) growth in GDP per capita fell to an average of 0.9% per annum.                      Between 2014 and 2019, growth in GDP per capita averaged 0.9% per annum.                      Source: ABS 5204.0, Table 1 Column C</p>
<p><b>Growth measures/targets – Population growth</b>  <b>Econ01.03.02</b>                      By 2050, population growth in Australia stabilises at no more than 35 million.</p> <p><b>Top Priority Target/Strategy: Strategic planning for population</b>  <b>Econ01.03.03</b>                      By 2024/25, recognising that:</p> <ul style="list-style-type: none"> <li>high immigration (pre-Covid-19) levels of up to 230,000 per annum will exacerbate environmental and economic sustainability issues both in Australia and globally, and that</li> <li>immigration levels capped at 60,000 per annum are more likely to deliver populations of sustainable levels,</li> </ul>	<p><b>Econ 1</b>                      A model of transition from excessive consumption to sustainability.</p> <p><b>Econ 3</b>                      A country where economic opportunity, growth &amp; prosperity are equitably shared &amp; living standards improve continuously for all.</p> <p><b>Econ 9</b>                      Productive &amp; prosperous through fair &amp; ethical trade agreements, labour hire &amp; procurement.</p> <p><b>Soc 1</b>                      A safe home.</p> <p><b>Soc 3</b>                      Inclusive, welcoming &amp; enabling.</p> <p><b>Soc 4</b>                      A place of optimal health and wellbeing.</p> <p><b>Soc 7</b>                      A success because of its diversity.</p> <p><b>Soc 10</b>                      A place of supportive familial &amp; other connections &amp; without domestic abuse.</p>	<p>Prior to the onset of the Covid-19 pandemic in 2020, Australia’s annual immigration intakes were approximately 230,000.</p> <p>In 2022, research was released by Sustainable Population Australia providing significant evidence to support the need for and global benefit of:</p> <ul style="list-style-type: none"> <li>an Australian immigration target of no more than 60,000 per annum;</li> <li>a stabilisation of the Australian population at no more than 35 million by 2050;</li> <li>leadership by Australia in policy on reduction of global population and global population movements; and</li> <li>development of policy oriented to sustaining</li> </ul>

<sup>34</sup> **Rationale for the target selected for growth in Gross Domestic Product (GDP):** Growth in GDP is used as the typical expression of performance in meeting the desire of Australians for a strong economy. However, GDP growth is not a useful measure of socioeconomic strength and, of itself, is not especially useful for long term planning purposes when the preferable and more practical objective is not primarily GDP growth *per se* but improved distribution of the benefits of sustainable growth – in other words, how is the growth generated and who is it *for*? Nor does growth in GDP shed light as a measure on the harm caused to achieve growth, harm which may exceed the benefits of the growth. While GDP growth may be desirable, there is more chance of achieving that growth if targets are established for policies and activities likely to stimulate fairer sharing of the benefits of growth (such as reduction in inequality, increases in private and public sector new capital investment, increases in public sector services, increases in labour productivity, and reductions in underemployment and duration of unemployment). Nevertheless, monitoring growth in GDP does provide a useful benchmark for measurement of the shares of that growth that are returned to the community in wages growth. Targets and Indicators in this and other chapters have been selected on the premise that policies which combat inequality and stimulate investment by both the public and private sector will provide the surest path to higher growth in GDP. In short, it’s not the amount of GDP growth but how we achieve growth and share it that matters. For information on the rationale for this, see [By 2050: Planning a Better Future for Our Children in 21<sup>st</sup> century democratic Australia](#), Chapter 7.

## Indicators, Targets & Strategies for the success of Our Economy

### Economy 1 – Economic planning, growth & transition

Indicators, Targets & Strategies for successful performance	In the Directions of becoming ...		Baseline data	
<p>convene a task force to confirm the necessary caps on immigration and develop a plan for:</p> <ul style="list-style-type: none"> <li>capping immigration to levels that will ensure Australia’s economy, natural environment and ecosystems can be sustainably managed for future generations; and for</li> <li>integrating immigration and other population policies, including climate change adaptation policies under <a href="#">Gov11.04</a> and housing policies under <a href="#">Soc09.04.04</a>, so that future generations can be sustained locally and globally.</li> </ul>	Soc	11	A land without child disadvantage.	<p>populations in their respective countries of origin by means of such mechanisms as foreign aid and development, peace keeping, assistance in promotion of birth control, family planning and education, and collaboration on mitigation of climate change.<sup>35</sup></p> <p>Source: Ian Lowe, Jane O’Sullivan and Peter Cook, Population and Climate Change Discussion Paper, <a href="http://www.population.org.au">www.population.org.au</a></p>
	Soc	12	A sure provider of lifelong dignity.	
	Soc	16	A society prepared and resilient in times of disaster.	
	Env	1	A leading global advocate for action on climate change.	
	Env	2	A net zero emissions nation.	
	Env	3	A proactive planner of climate change adaptation.	
	Env	4	A nation that puts the environment before unsustainable consumption.	
	Env	8	Environmentally and economically sustainable in agriculture and fisheries.	
	Env	9	Confident of safety and security of its water supplies.	
	Env	10	A biodiversity haven.	
	Env	11	A replanted and reforested land.	
	Env	12	A protector of scarce resources.	
	Env	19	A land of thriving self-supporting regions.	
Gov	2	A nation knowing and affirming decency.		

<sup>35</sup> **Rationale for the target selected for population:** Authors of the [Population and Climate Change Discussion Paper](#) have assembled detailed research which supports conclusions that:

- population growth driven by excessive immigration will severely hamper Australia’s ability to meet its climate change mitigation commitments;
- ecosystem destruction arising from over-population will severely impact Australia’s grain harvest capacity (perhaps halving it) and at times when other countries which depend on Australian harvests will also be affected by food shortages;
- population growth in Australia beyond 30 million will mean that in years of low agricultural yield caused by climate change, Australia will have no excess food production available for export at times when global prices are likely to be highest (in short, the financial viability of agricultural industries will be at risk);
- economic theory which suggests that high levels of immigration are necessary to support the aging population of Australia are “misguided or insincere” (research by ACFP on long term economic planning aligns with this assertion);
- encouragement of lower rather than higher birth rates in Australia would significantly improve the lives of women and lead to significant savings in the health care system while preserving choices for women, teenagers and families;
- “reaching a global population peak at the earliest date and lowest level achievable will greatly enhance the feasibility of limiting global warming to less than 2°C, and simultaneously reduce the vulnerability of future people to the impacts of climate change”; and
- decreasing immigration to 60,000 per annum would allow for higher level of humanitarian immigration as the need will arise due to climate change – inasmuch as slowed immigration to Australia in the 2020 decade will increase Australia’s capacity absorb higher levels of immigration from 2030, if need be, while still stabilising the total population at 35 million.

## Indicators, Targets & Strategies for the success of Our Economy

### Economy 1 – Economic planning, growth & transition

Indicators, Targets & Strategies for successful performance	In the Directions of becoming ...		Baseline data
	Gov	6	A world benchmark in leaders' conduct.

	<b>Econ 2</b>	A model of employment planning & justice in industry transition.
	<b>Econ 3</b>	A country where economic opportunity, growth & prosperity are equitably shared & living

<sup>36</sup> The Superpower Institute considered that the Carbon Solutions Levy would offer a buffer against energy price increases: "The well over \$100bn pa proceeds in year 1, which then decline slowly, should be applied first to fund the significant CIS liability, the SIIS and the required Transmission and hydrogen transport and storage. There would remain more than adequate funding to more than fully compensate for any effect on electricity or fuel prices, and to facilitate any restructure of road user charging. An amount of the CSL proceeds should be kept for budget repair or funding structural reform, such as tax reform, with long term benefits for economic growth and the revenue as Australia must maintain its key advantage of a low cost of capital." Ross Garnaut, "Restoring Prosperity by Building the Superpower", Address to the National Press Club, 14 February 2024.

	<p><b>Econ 4</b></p> <p>A nation fairly raising &amp; sharing its wealth.</p>	
<p><b>Underutilisation of the labour force</b> <b>Econ02.02.01</b></p>	<p><b>Econ 2</b></p> <p>A model of employment planning &amp; justice in industrial reform &amp; economic transitions.</p>	<p>The rate of underutilisation of Australia's labour force<sup>39</sup> has trended (although not steadily) upward since 1978, from an</p>

<sup>38</sup> Targets for underemployment in **Econ02.02**, underutilisation in **Econ02.02.01** and duration of unemployment in **Econ02.03** may be subject to revision – up or down – if the Non Accelerating Inflation Rate of Unemployment (NAIRU), as assessed from time to time by the Reserve Bank, strongly suggests a revision is necessary. However, it is important to note that *Australia Together* does not assume that policy decisions on acceptable levels of unemployment should be driven primarily by Reserve Bank decisions on the NAIRU or other inflation-related targets. The primary policy responsibility is to ensure full employment and to manage any inflationary effects by a means of other policy levers such as changing the economic composition (eg., under **Econ01.05**, **Econ01.06**, **Econ01.07**, **Econ02.04**, **Econ02.04.01**, and **Econ02.05**) so that it controls inflation. In *Australia Together*, changes in targets for underemployment, underutilisation and duration of unemployment could therefore only be influenced by RBA decisions on the NAIRU in exceptional circumstances.

<sup>39</sup> The labour force underutilisation rate is defined by the Australian Bureau of Statistics as "the sum of the number of persons unemployed and underemployed, expressed as a percentage of the labour force". ABS 6102.0.55.001 - Labour Statistics: Concepts, Sources and Methods, Feb 2018.

## Indicators, Targets & Strategies for the success of Our Economy

### Economy 2 – Employment planning, industrial reform & economic transition

Indicators, Targets & Strategies for successful performance	In the Directions of becoming ...	Baseline data
<p>The rate of underutilisation of labour reduces to 8% and remains at or below that on a 12-month average, ensuring a fuller use of workforce capacity to expand the economy and sufficient labour scarcity to increase wages.</p>	<p><b>Econ 1</b> A model of transition from excessive consumption to sustainability.</p>	<p>average of 8.8% in the 3 years to December 1981 up to an average of 13.8% in the 3 years to December 2019.<sup>40</sup></p> <p>In 2019, the 12-month average for labour underutilisation was 13.5%. By</p>

<sup>40</sup> **Note:** *Australia Together* does not use the unemployment rate as an indicator, out of the context of the labour underutilisation rate, due to the fact that unemployment rates are derived with reference only to those workers who have, in a fortnightly survey by the ABS, responded that they are looking for work and are available to start (in effect full-time) work immediately. The fortnightly “survey” counts a relatively small section of the willing labour force seeking work and is not useful either for purposes of monitoring the performance of the economy as a provider of opportunities to work or for long term economic and labour force planning purposes.

**Indicators, Targets & Strategies for the success of Our Economy**

**Economy 2 – Employment planning, industrial reform & economic transition**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p>Average weekly hours worked by casual employees declines relative to non-casual employees and the length of time taken to transition from casual to permanent employment falls continuously.</p>	<p><b>Econ 3</b> A country where economic opportunity, growth &amp; prosperity are equitably shared &amp; living standards improve continuously for all.</p>	<p>contrast the average weekly hours worked by other (non-casual) employees was 38.6, down from 40.2 in 2001-2004. The trend was towards increasing casualisation of Australia’s workforce.</p> <p>The length of time in casual work before transitioning to permanent work has also increased. Between 2001 and 2004, 41.5% of casual workers would be in a permanent job within four years. Between 2015 and 2018, this dropped to 35.9%.</p> <p>Source: Household, Income and Labour Dynamics in Australia (HILDA) Survey 2021, Tables 4.7 and 4.10</p>

<p>services, employment and welfare services, education, housing, conservation and land care, renewable energy, buildings efficiency and transport, recognising these as the job growth areas of the future;</p> <ul style="list-style-type: none"> <li>reversing the growth in contracting out of public services; and</li> <li>reversing the growth in consultancies and re-establish in-house public policy services.</li> </ul> <p>By 2024, incorporate the new public sector workforce plan into the nation-wide community engagement on the draft national plan for full employment supported by a universal basic income (as per <b>Econ02.04</b>).</p>	<p><b>Soc 11</b> A land without child disadvantage</p>	<p>almost 12% of its workforce. As at 30 June 2019 the total employment headcount (not fulltime equivalent) of the APS was 146,782, down from 166,146 in June 2013. At the same time, annual spending by the federal government on consultants more than doubled from \$385 million in 2012/13 to \$808 million in 2017/18 before falling to \$650 million in 2018/19 and rising again to \$695 million in 2019/20. Also during the same period underemployment in Australia grew by 21% from an average of 7.4% between 2008 and 2013 to 8.9% between 2014 and 2019. In 2019, there was an average of 1,130,900 underemployed persons per month in Australia compared to 894,500 per month in 2013, meaning that while monthly underemployment rose by more than 200,000 the government aggravated the problem by reducing public sector employment by 20,000. The above corresponded with a period of slowed growth in the Australian economy. Between 1972 and 2014, growth in GDP averaged 3.1% per annum. Between 2015 and 2019, growth in GDP averaged only 2.4% per annum and dropped to 1.7% in 2018/19. **Indicators, Targets & Strategies for the success of Our Economy**

**Economy 2 – Employment planning, industrial reform & economic transition**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p>established under <b>Econ02.05</b> and utilising a small portion of the savings to taxpayers that can be anticipated from the elimination of fossil fuel subsidies under <b>Env02.03</b>, establish a one-off \$1 billion redundancy and redeployment fund for employees of thermal coal mining and coal-fired power companies who are facing displacement, accessible until 2026 (and no later). Payments from the fund should reflect years of service, plus transition costs associated with re-training and relocation, and be in addition to all other termination entitlements under agreements with private employers.</p> <p>Note: Payment from the fund would not be applicable to workers who take up employment in thermal coal mining or coal fired power stations after creation of the fund and no worker receiving payments for redundancy and redeployment could be permitted to work in the coal sector in the future, recognising that the taxpayer funded transition program is to support transition to a sustainable economy, not a revolving door and additional subsidy to the coal industry.</p> <p><b>Note:</b> This proposal for a \$1 billion fund may be subject to movement up or down, depending on need.</p>	<p><b>Econ 3</b> A country where economic opportunity, growth &amp; prosperity are equitably shared &amp; living standards improve continuously for all.</p>	<p>approximately per annum. This equates to setting aside the equivalent of \$730,000 of taxpayer funded subsidy each year for each person employed in coal mining and oil and gas exploration and production in Australia.</p> <p>The Australian taxpayer receives no share of the profits in return for its subsidisation of the fossil fuel industry. Profits are largely off-shored and royalties do not sufficiently offset subsidies to provide decent returns. Nor does the fossil fuel industry contribute to clean-up costs or climate change adaptation costs. Creation of a fund to make coal workers redundant and transfer them to sustainable industries (including other types of mining) would equate to a massive saving for Australia. If implemented in addition to a carbon price it would make transition to net zero and a new economy affordable for Australia.</p> <p>Source: International Monetary Fund "IMF Working Paper: Global Fossil Fuel Subsidies Remain Large: An Update Based on Country-Level Estimates, WP/19/89", 2019</p> <p>In 2019, approximately 38,400 people were employed in coal mining in Australia, a reduction from 47,500 in 2014. By 2030 it may be expected that the thermal coal industry will be non-existent due to multiple factors, including its high price compared to renewable energy. Schemes which incentivise early closure of the thermal coal industry will provide significantly higher returns to Australia than continued subsidies for coal.</p> <p>Source: ABS Stat.beta Labour account Australia</p>

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>																
		<p>In 2020, research by the Australia Institute found that: “A phase-out of thermal coal mining over ten years would imply a loss of between 500 and 1000 specialist mining jobs each year. Taking account of early retirement, natural attrition, and redeployment within the mining industry, the number requiring special assistance for transition, or a top up to offset the loss of premium wages, would probably be no more than 250 per year. An assistance package of \$100,000 per year, available for up to 2 years, would imply an outlay of no more than \$50 million per year.”</p> <p>Source: Australia Institute, Getting Off Coal 2020</p>

<sup>41</sup> \*Consistent with UNSDG – Indicates where targets/indicators have been selected consistent with commitments already made by Australia to the United Nations Sustainable Development Goals 2015-2030. It does not necessarily mean the selected target or indicator has been included in *Australia Together* in a form agreed by the Australian Government. For example, in relation to its commitment to “end poverty in all its forms everywhere”, Australian governments have not selected indicators which will enable them to report on poverty growth in total and as at 2024 have not chosen to select a definition of poverty. Instead the government has chosen indicators such as duration of poverty. For information on the Australian Government’s process of data collection for UNSDGs, visit <https://www.dfat.gov.au/aid/topics/development-issues/2030-agenda/australias-report-implementation-sustainable-development-goals>

	Soc 9	A land without homelessness & with decent affordable housing for all
	Soc 10	A place of supportive familial & other connections & without domestic abuse
	Soc 11	A land without child disadvantage
	Soc 12	A sure provider of lifelong dignity
Env 2	A net zero emissions nation.	
Env 6	A renewable energy superpower.	
		<p>Between 1991 and 1996 the Australian government fully privatised the Commonwealth Bank. Between 1994 and 2000 the Bank of New South Wales was also privatised. Sale of these assets has not resulted in cheaper or more reliable services for Australians.</p> <p>Withdrawal by the government sector from operation of profitable enterprises has resulted in Australia's economy being smaller and/or less competitive than it might otherwise be and smaller shares of return on investment for taxpayers. Nor is the banking system in 2021 structured to finance direct investment in publicly owned services and infrastructure that will provide returns to working Australians without profits being syphoned off to shareholders and private owners.</p> <p>In 2021, industry super funds provide an avenue for returns to Australians from investment in commercial sector and public sector projects and infrastructure. However a publicly owned bank established for the purpose of taking deposits and issuing bonds will complement the supply of funds for services owned and operated by Australians and significantly increase returns direct to all Australians both individual and in the wider economy.</p> <p>Source: Australian Community Futures Planning, <a href="#">The State of Australia in 2020, Episode 5.</a></p>

Indicators, Targets & Strategies for successful performance	In the Directions of becoming ...	Baseline data
<p>development of long term financial plans for federal revenues and spending as per <a href="#">Gov01.05</a>; and</p> <ul style="list-style-type: none"> <li>the pilot scheme for a universal basic income – a UBI for artists – under <a href="#">Soc13.01</a>, </li></ul> <p>require the federal government to:</p> <p>a) develop a draft set of options for introduction of a universal basic income (UBI) for all Australians using models of options for introduction of UBIs at various scales:</p> <ul style="list-style-type: none"> <li><b>Option A:</b> An option for a smaller scale UBI could be modelled based on the “Australian Income Security (AIS)” suggested by Professor Ross Garnaut.</li> <li><b>Option B:</b> The option of a full scale UBI for all Australians could be modelled on a basis similar to that suggested by Brian Donaghy and/or ACFP; and</li> </ul>	<p><b>Econ 3</b></p> <p>A country where economic opportunity, growth &amp; prosperity are equitably shared &amp; living standards improve continuously for all.</p>	<p>have supported the introduction of a social wage, otherwise variously called a “universal basic income”, a minimum income guarantee” or a “negative income tax”.<sup>43</sup></p> <p>In 2021, Professor Ross Garnaut provided substantial arguments in favour of the introduction of an “Australian Income Security (AIS)” – in effect, a social wage or limited form of a universal basic income in which all adult Australians (except those earning above \$250,000 or with net assets above \$2 million) would receive, unconditionally, \$15,000 per annum (non-taxable). This would be accompanied by a flatter taxation system (\$0.325 for all other income up to \$180,000).<sup>44</sup></p> <p>Source: For full details see Ross Garnaut, <i>Reset: Restoring Australia After the Pandemic</i>, Chapter 8.</p>
	<p><b>Econ 6</b></p> <p>An economy with competitive &amp; profitable public sector participation.</p>	<p>In 2021, Brian Donaghy provided substantial arguments in favour of the introduction of a Universal Basic Income (UBI) for all Australians (including a proportion for children). In this model the intention was to</p>
	<p><b>Soc 6</b></p> <p>A society of equals.</p>	

<sup>43</sup> Proponents of a universal basic income have spanned the full spectrum of politics, from left to right including Thomas Moore (of Moore’s *Utopia* fame), Thomas Paine, John Stuart Mill, H G Wells, George Bernard Shaw, John Kenneth Galbraith, Bertrand Russell, Martin Luther King, Friedrich Hayek, and Milton and Rose Friedman.

<sup>44</sup> Professor Garnaut’s rationale for an “Australian Income Security (AIS)” was that it would be an essential part of a wider set of strategies to support a return to full employment, which in turn is central to the restoration of the Australian economy. He argued that “Ways have to be found to raise the incomes of workers on low wages without increasing costs of labour to employers. This leads us to a minimum basic income, which can be augmented by earnings from employment which are taxed at a moderate rate.” (*Reset*, page 185). The logic of the strategy is that the cost to the federal budget of the fiscal stimulus from the AIS in the first few years would be offset after full employment was reached, providing an increase in total tax receipts from higher employment rates. The proposal, however, is built on a view that stimulus for the private sector and competitiveness in trade exposed industries is the best way to restore Australia’s economy after the Covid-19 pandemic. This potentially disregards the value of expanded government services in health, education and welfare to GDP growth and to the extent that an AIS modelled at the smaller scale envisaged by Professor Garnaut (which was well below the poverty line) may remove funds for essential services for a number of years, it may be self-defeating and significantly less beneficial than a full scale universal basic income set at the poverty level. Community engagement on a National Accord on Wealth, Welfare and Wellbeing as per [Econ04.02](#) is thus an essential prerequisite for introduction of a universal basic income. For more information on the advantages of setting a UBI at or above the poverty level see ACFP, [What is the strategy in Australia Together for a universal basic income?](#) June 2024.

<p><b>Fair &amp; progressive taxation</b></p> <p><b>Top Priority Target/Strategy:</b> <b>Restoration of a fair and progressive taxation system</b> <b>Econ04.03</b></p> <p>Australia’s taxation system is increasingly progressive and regressive income tax measures legislated since 2018 are reversed or suspended until an accord is agreed on wealth, welfare and wellbeing consistent with the principles indicated in <b>Econ04.02</b>.</p>	<p><b>Econ 4</b> A nation fairly raising &amp; sharing its wealth.</p>	<p>In 2018 and 2019, the Australian government legislated tax cuts which increased regression in the tax system via tax bracket changes in which people earning less than \$58,000 will see a significant <i>rise</i> in their average tax over the decade to 2030 and people earning above \$90,000 will actually see a <i>drop</i> in their average tax.</p> <p>In addition, the tax cuts will remove a total of \$302 billion from the tax revenue that would otherwise have been put aside for services over the decade to 2029. This is the equivalent of deleting the entirety of what Australians budgeted to spend on their own social security, welfare, health and education in 2019/20. The tax cuts are unsustainable unless they are funded by deletion of services equivalent to a full year of funding for pensions, Medicare the family tax benefit, disability support pension, pharmaceutical benefits, carer income support and the federal government’s contribution to schools and higher education.</p> <p>Source: Parliamentary Budget Office, 2019-20 Medium Term Fiscal Projections</p>

## Economy 5 – Market regulation & competition policy

<b>Indicators, Targets &amp; Strategies for the success of Our Economy</b>		
<b>Economy 5 – Market regulation &amp; competition policy</b>		
<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>Top Priority Target/Strategy:</b> <b>National Competition Policy review</b> <b>Econ05.01</b></p> <p>By 2024, establish an independent review of the benefits and failures of 30 years of National Competition Policy with terms of reference which place equitable and affordable access by consumers to services at the top of the list of objective measures of performance of the Policy (recognising that the Policy gives priority to businesses over consumers).</p> <p>By 2025, subject to the findings of the above review, revise National Competition Policy to any extent necessary to fairly adjust the negative impact of both the Hilmer and Harper recommendations, (recognising that the focus of both is on artificially advantaging the private sector to help it compete rather than on maximising returns to taxpayers on their investments in services and minimising the price they then pay for those services when they use them).</p>	<b>Econ 5</b>	A strong regulator of fairness in markets, creating confidence for investors.
	<b>Econ 1</b>	A model of transition from excessive consumption to sustainability.
	<b>Econ 2</b>	A model of employment planning & justice in industrial reform & economic transitions.
	<b>Econ 3</b>	A country where economic opportunity, growth & prosperity are equitably shared & living standards improve continuously for all.
	<b>Econ 4</b>	A nation fairly raising & sharing its wealth.
	<b>Econ 6</b>	An economy with competitive & profitable public sector participation.
	<b>Econ 9</b>	Productive & prosperous through fair & ethical trade agreements, labour hire & procurement.
	<b>Soc 3</b>	Inclusive, welcoming and enabling.
	<b>Soc 4</b>	A place of optimal health & wellbeing.
<b>Soc 5</b>	A model of lifelong educational opportunity.	
		<p>In 1995, pursuant to the “Hilmer Report”<sup>47</sup>, the federal government passed the Competition Policy Reform Act, adopted a “Competition Principles Agreement” and established the Australian Competition and Consumer Commission (ACCC).<sup>48</sup> The intent of the reforms was to promote efficiency in service delivery but the inevitable outcome was price rises for consumers of services where large GTE’s are competing with the private sector.<sup>49</sup></p> <p>In 2015, a Competition Policy Review (the “Harper Report”) recommended the policy be widened beyond GTEs to “encompass the provision of government services more generally”<sup>50</sup>, including not-for-profit human services. The government adopted the majority of Harper Report recommendations, paving the way for easier access by private companies to provide core services in education, health and social services, regardless of whether this</p>

<sup>47</sup> For a history of Competition Policy in Australia, see Parliament of Australia, Australia’s National Competition Policy at [https://www.aph.gov.au/About\\_Parliament/Parliamentary\\_Departments/Parliamentary\\_Library/Publications\\_Archive/archive/ncpebrief](https://www.aph.gov.au/About_Parliament/Parliamentary_Departments/Parliamentary_Library/Publications_Archive/archive/ncpebrief)

<sup>48</sup> The objective of the reforms was to: prevent anti-competitive conduct by any business, government or private; introduce competitive neutrality principles restricting governments from gaining business advantages (in business of a certain size) merely by being government owned (and eg., by not having to pay tax); prevent mergers and acquisitions that are contrary to the public interest; and provide access to monopoly infrastructure on fair and equitable terms.

<sup>49</sup> See Competition Policy Review Final Report March 2015 (the Harper Report), page 255: “The [competitive neutrality principles in national competition] policies require government business activities to charge prices that fully reflect costs and to compete on the same footing as private sector businesses in terms of taxation, debt, regulation and earning a commercial rate of return.” The implicit assumption was that fair price competition between public and private sector would result in price advantages for the consumer but the principle actually made price rises inevitable for consumers of services where large GTE’s are competing with the private sector. <p><b>Ethical regulation of carbon credits markets</b> <b>Econ05.02</b></p> <p>By 2024, recognising that in order to facilitate Australia’s entry into international carbon credits trading and markets (in line with initiatives under <b>Env11.01</b> and <b>Econ01.07</b>) Australia will need to establish a reputation as a producer of genuine carbon credits, ensure that the Australian Clean Energy Regulator:</p> <ul style="list-style-type: none"> <li>maintains its reputation as a credible agency for certifying carbon credits,</li> <li>is sufficiently funded to maintain its capacity for development of credible, low cost methodologies for certification of credits (including low cost methods for measuring carbon in the landscape), and</li> <li>is enabled to exercise its leadership role in international trade negotiations and market structure adjustments.</li> </ul>	<p><b>Econ 5</b> A strong regulator of fairness in markets, creating confidence for investors.</p> <p><b>Econ 9</b> Productive &amp; prosperous through fair &amp; ethical trade agreements, labour hire &amp; procurement.</p> <p><b>Env 1</b> A leading global advocate for action on climate change.</p> <p><b>Env 2</b> A net zero emissions nation.</p> <p><b>Env 4</b> A nation that puts the environment before unsustainable consumption.</p> <p><b>Env 6</b> A renewable energy superpower.</p> <p><b>Env 11</b> A replanted &amp; reforested land.</p> <p><b>Env 14</b> A pollution free biosphere.</p> <p><b>Env 19</b> A land of thriving self-supporting regions.</p> <p><b>Gov 7</b> Committed to public service independence &amp; excellence.</p> <p><b>Gov 9</b> A nation outlawing corporate greed &amp; where private sector business practice &amp; ethics serve the public good.</p>	<p>During the period of carbon pricing in Australia (2012 to 2014), a Clean Energy Regulator was established which among other things developed an international reputation for defining acceptable approaches to carbon sequestration which could be used to produce genuine, accredited carbon credit units (Australian Carbon Credit Units – ACCUs). The Australian Clean Energy Regulator survived the demise of the carbon price and has retained some status as a credible regulator. In 2021, this made the Australian Clean Energy Regulator a “valuable asset” in emerging markets for carbon and in establishing a foothold for Australian businesses in international carbon credits trade. ## Chapter 8 – Targets & Strategies for Success in Our Governance

### Brief context for the Indicators, Targets & Strategies for Our Governance

The following information summarises the health of Australia’s governance at the very start of the planning period. Australians were quite dissatisfied with their democracy and voter turnout at elections was dropping. Voter turnout, however, is not a great indicator of the strength of a democracy and the shares of power that individual Australians can assert. Better indicators include:

- our levels of political activism,
- freedom of expression and of access to information,
- our sense of justice and equity, and
- our perception of the ethical standards and conduct of leaders, both elected and corporate.

In 2020, Australia’s democracy could be deemed healthy only on the basis of the first of these indicators. Since 2009, according to the Scanlon Index of Social Cohesion<sup>51</sup>, political activism within our democracy had risen each time we perceived a drop in social justice and equity, indicating that, **among Australians, there was still a fairly healthy sense of the value of participation in democracy, including in political campaigns.**

On all the other indicators, however, particularly in perceptions of corruption, the health of Australia’s democracy had declined, as can be seen in the drop in scores for public sector/government corruption in Transparency International’s Corruption Perceptions Index<sup>52</sup>. Worldwide, only 22 out of 180 countries had made progress in decreasing corruption since 2012 and 137 countries had made no progress at all. **Australia was one of 21 countries that had shown significant declines in their scores on the Corruption Perceptions Index.** In fact, Australia’s score declined so significantly that it was 10 points lower than countries like New Zealand and Denmark. We used to be ranked in the “very clean” category, but in 2020 that no longer applied.

<sup>51</sup> See “Mapping Social Cohesion 2019, The Scanlon Foundation Surveys”, <https://scanloninstitute.org.au/sites/default/files/2019-11/Mapping%20Social%20Cohesion%202019.pdf>

<sup>52</sup> See Transparency International, Corruption Perceptions Index at <https://www.transparency.org/en/cpi/2019/index/nz> and on Wikipedia at [https://en.wikipedia.org/wiki/Corruption\\_Perceptions\\_Index](https://en.wikipedia.org/wiki/Corruption_Perceptions_Index)

After two decades of national security legislation that had had the effect of removing numerous civil, political and human rights for Australians<sup>53</sup> it was apparent that in the 2020s the fundamentals of Australia's democracy and governance were weak, not strong. Much of this weakness could be attributed to the fact that **our Constitution is outdated and is silent on what Australians value**. It is:

- silent on what we stand for as a nation,
- silent on the rights and even existence of First Nations, and
- silent on almost all our human rights, effectively conferring no rights on Australians other than freedom of religion.

**Australia's Constitution is the product of 19<sup>th</sup> century thinking for a distant land. It is singularly ill-suited for a 21<sup>st</sup> century Australian democracy.**

Being so silent, the Constitution also was exposing Australians to a heightened risk of being led into wars with countries that do not threaten Australia's sovereignty and which have had nothing at all to do with protecting what we genuinely value (such as the Iraq War). The combination of:

1. the Constitution's silence on national values;
2. the attenuation of rights for Australians under ever-tightening national security legislation (particularly rights to information vital to the public interest and the right to fair and open trial),
3. the rise of a poisonous discourse in government policy in favour of hawkishness and against international cooperation and humanitarian global citizenship, and
4. the failure to develop soft power through ethical diplomacy and sensible strategy

had made Australia much less secure and more exposed to economic sanctions than was ever necessary. It was a deadly combination and one which cannot assist Australia to deal with the geopolitical and economic shift that will surely dominate our 21<sup>st</sup> century evolution as a nation – the rise of China. For more information on Australia's unnecessary exposure to risk through the lack of a coherent strategy on China and a commitment to build an independent defence capability, see [The State of Australia in 2020 Episode 4 Part 2 on Fractious International Relations](#).

**Australia is unprepared for the inevitable geopolitical and economic shift that will dominate the 21<sup>st</sup> century. We have no plan for dealing with the rise of China.**

Most notably in terms of weaknesses, **the Australian Constitution acknowledges and provides for "the people" but only insofar as they may elect representatives, not insofar as they might play a more influential role in a participatory democracy**. It entrenches 21<sup>st</sup> century Australians in a reactive or passive role in their own democracy rather than the proactive role that is entirely necessary for achievement of an inclusive society of equals. In providing for a 19<sup>th</sup> century style representative government, the Constitution severely limits the shares of power for individual Australians and the right of self-determination, the realisation of which Australia is bound to promote under Article 1 of the International Covenant on Civil and Political Rights<sup>54</sup>.

In summary, Australia's Constitution does little more than transfer all power from the many to the few without specifying what such power may be used for and to what ends. **Australians have organised their democracy without providing guidance to any government about their preferred direction for our country.**

<sup>53</sup> For a detailed list of rights lost under various types of legislation since 2002, see [Chapter 8 of By 2050](#), Ibid.

<sup>54</sup> Australia is a signatory to the International Covenant on Civil and Political Rights, <https://www.ohchr.org/en/professionalinterest/pages/ccpr.aspx>

If Australians want to see a better report card on the state of our democracy and our faith in it in the next few years, it will be necessary to augment the more reactive and/or passive roles we have taken to date with more organised communications about what we want for the long term.

**Specifically it will be necessary to organise the introduction of an extra step in our democratic process.**

That extra step is open community engagement in the process of preparing a national integrated community futures plan. From there it will be necessary to monitor progress against the plan and report on movement towards or away from its Vision for the long term. For more information on this necessary extra step in democracy, view [The State of Australia in 2020, Episodes 3 and 7](#).

**Australians can increase their shares of power by inserting an extra step in their democratic process.**

**They can develop their own national integrated long term plan, with instructions on what they want to achieve and how.**

Detailed context for the Targets, Indicators & Strategies in **Our Governance** can be found in *The State of Australia in 2020* – especially Episodes 2, 3, 4 and 7.

[Click here for The State of Australia video playlist](#)

The following Indicators, Targets and Strategies for **our governance** are derived consistent with the primary objectives of building a governance system for Australia that:

- is fit for a 21<sup>st</sup> century open democracy;
- creates equal rights for all, including First Nations;
- strengthens protections against government and corporate corruption;
- builds the nation itself along the lines of clearly articulated shared values; and
- as per the **Vision for Australia Together**:
  - ensures that our democracy is assured by a well informed and engaged community of political equals,
  - assists leaders to listen to Australians, act in our best interests, and govern for all rather than a few, and
  - assists Australia to become a responsible international citizen, active in building a safe, peaceful and united world.

With the Targets and Strategies that are crafted here consistent with those primary objectives, the overarching intention or desired outcome is that Australia will move in the following Directions:

**In our governance Australia will become:**

- A proactive participatory democracy
- A nation knowing & affirming decency
- A nation with avowed rights for all
- A free, self-governing, modern nation
- Open, transparent & accountable in its governments & institutions
- A world benchmark in leaders' conduct
- Committed to public service independence & excellence
- Protected from undue sectional influence in elections
- A nation outlawing corporate greed & where private sector business practice & ethics serve the public good
- A guardian of freedom & accountability in political discourse, news media & the wider information market
- A just & cooperative participant on the global stage
- A nation assured of enduring peace
- A nation leading in empathy & global cohesion

Targets and Strategies will also contribute positively to multiple other Directions in **Australia Together**, as displayed.

## Governance 1 – Strength of democracy

	<b>Gov 7</b> Committed to public service independence & excellence.	

<sup>56</sup> In [The People’s Constitution](#), Chapter 7, the **design of the Independent Commission for National Engagement** was that:

“The Commission shall be accountable by annual reports to the People of Australia, and shall be charged as a minimum with responsibility to the People of Australia for development and maintenance of fully open forums and accessible processes by which all Australians may be enabled to:

- accurately assess the state of their health, wellbeing and security as a nation;
- participate at will in planning processes to articulate a vision for their preferred future and their preferred safe paths to that future; and
- receive independent reports on the progress of the nation towards or away from that future.

The Commission shall be established and maintained with sufficient funding and resources to support Australians in the orderly composition, review and revision of their National Voice, including as a minimum:

- all research resources necessary to ensure that The National People’s Voice can be formulated and monitored on the basis of credible and comprehensive data and information on all aspects of the performance of the Australian society, environment, economy and democracy; and
- all communications and facilitation resources necessary to enable best practice in inclusive community engagement and active citizen participation in building a cohesive nation.

The Commission shall also be entitled to access and rely on the financial and economic planning capacities of the Treasury and the Parliamentary Budget Office for any information necessary to conduct dialogues with Australians on options for sustainably financing their preferred future.”

It was also envisaged that:

“Statements and plans arising from the operation of the National People’s Voice shall be understood to be non-binding on the Executive Government and shall not constrain the Parliament in its power to make laws in accordance with this Constitution but shall constitute guidance to the Parliament as to the People’s Sovereign Will for the future

	Econ 9	Productive & prosperous through fair & ethical trade agreements, labour hire & procurement.

In 2021, Australians did not have explicitly conferred rights to:

- freedom of speech,
- peaceful assembly and protest,
- freedom of the press,
- trial in open court,
- justice itself and without delay, or
- freedom from unlawful detention.

Some human rights were being provided in state legislation but these could and were being actively extinguished because there was nothing in Australia’s Constitution which ensured that those rights could not be extinguished.

Source: *By 2050*, Chapter 8 and *The State of Australia in 2020*, Episode 3.

In 2023, Australian Community Futures Planning’s Founder asserted in testimony to the Parliamentary Joint Committee on Human Rights’ Inquiry into Australia’s Human Rights Framework that:

- human rights cannot be secured for Australians through legislation – they can only be secured in law if they are enshrined in the Constitution;
- failure by successive governments since World War II to provide in domestic law human rights that Australians are entitled to in international law has resulted in Australian governments having a dreadful track record of abuse of the rights of Australians and others: and that

**Indicators, Targets & Strategies for the success of Our Governance**

**Governance 3 – Human & other rights**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p>Australian People’s Constitution envisaged under <b>Gov04.01.01</b> includes a requirement for nation-wide engagement on development and adoption in the Constitution of a National Agreement on Human Rights and Obligations, such engagement as a minimum to secure for the people of Australia the prospect of conferring on themselves and each other in their Constitution ALL human rights and obligations already conferred in any treaty in international law or instruments signed by Australia.</p>		<ul style="list-style-type: none"> <li>it is fundamental that if human rights are inalienable (as they are acknowledged to be in official government policy) and if we are to be protected from the potential for injustice by an arbitrary sovereign (parliamentary or monarchical) then we need a system of law and law-making which will prevent parliaments and governments from overriding the rights that the government otherwise declares to be universal and inalienable.</li> </ul> <p>In accordance with this it was further submitted that “the government should consider working towards a human rights framework in which it is a key principle that the people of Australia (not the parliaments or the executive governments or the judicature) are to be accorded sovereignty in this particular area of law and that this sovereignty can only be protected by constitutional enshrinement of all rights and obligations in the human rights treaties and declarations to which Australia is already a State Party.”</p> <p>For this purpose, ACFP submitted that “the valid and safe way is to create a process by which Australians may freely grant all rights to themselves and each other as equals and impose all necessary obligations on themselves and their governments. This may be done efficiently and fairly through a referendum to enshrine in the Constitution a National Agreement on Human Rights and Obligations.” A starting draft of a possible</p>

## Governance 4 – Constitutional reform

**Important Note:** Strategies and Targets in **Governance 4 – Constitutional reform** are formulated recognising that Australia’s Constitution excludes Australians from any share of power in their own democracy and in particular makes it impossible to hold executive governments to account.

<b>Indicators, Targets &amp; Strategies for the success of Our Governance</b>		
<b>Governance 4 – Constitutional reform</b>		
<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>Top Priority Target/Strategy: Constitutional reform – Constitutional Convention Gov04.01</b></p> <p>By 2025, and in full coordination and accord with:</p> <p>a) any process for constitutional recognition of First Nations in <b>Soc02.01</b> and <b>Soc02.01.01</b>;</p> <p>b) any process for development of a National Agreement on Human Rights and Obligations under <b>Gov03.01</b> and <b>Gov03.01.01</b>;</p> <p>c) any national collaborative process for development of an Australian People’s Constitution, including a justiciable constitutional <b>Statement of Australian Values</b>, under <b>Gov04.01.01</b>;</p> <p>d) any process to establish a <b>National People’s Voice</b> as per <b>Gov01.04</b>;</p> <p>e) any process for establishing an <b>Independent Commission for National Engagement and Integrated Planning</b> as per <b>Gov01.04.01</b>;</p> <p>f) any referendum to establish Australia as a Republic under <b>Gov.04.02</b>;</p> <p>g) any process of constitutional (or legislative) reform to establish parliamentary supremacy in decisions on entry into war as per <b>Gov12.06</b>;</p>	<p><b>Gov 4</b> A free, self-governing, modern nation.</p>	<p>The last Constitutional Convention was held in 1998. A National Constitutional Convention attended by 250 Aboriginal and Torres Strait Islander delegates was also held in 2017.</p> <p>No Constitutional Convention has yet considered a bill, charter or agreement on human rights for Australians, although the Constitutional Convention of 1998 did result in a Communique calling for a preamble which may have articulated some national values (the Howard preamble). This was drafted without community engagement and was rejected by over 60% of voters. Source: Parliament of Australia, Research Paper 16, 1999/2000</p> <p>In 2023, ACFP’s Founder Bronwyn Kelly published <a href="#"><i>The People’s Constitution: the path to empowerment of Australians in a 21<sup>st</sup> century democracy</i></a>. This book invited all Australians to take up positions of rightful power within their democracy, calling on them to choose to exercise much greater influence in their own governance and control over their own future than they have been able to exercise to date. It also offered them a way to exercise that greater level of control, both as individuals and collectively as a nation, by establishing a place for themselves in the central, defining statement of the nation – the Australian Constitution. The book identified:</p>
	<p><b>Gov 1</b> A proactive participatory democracy.</p>	
	<p><b>Gov 2</b> A nation knowing &amp; affirming decency.</p>	
	<p><b>Gov 3</b> A nation with avowed rights for all.</p>	
	<p><b>Gov 6</b> A world benchmark in leaders' conduct.</p>	
	<p><b>Gov 12</b> A nation assured of enduring peace.</p>	
	<p><b>Soc 1</b> A safe home.</p>	
	<p><b>Soc 2</b> A land with an Indigenous heart.</p>	
	<p><b>Soc 3</b> Inclusive, welcoming and enabling.</p>	
	<p><b>Soc 6</b> A society of equals.</p>	
<p><b>Soc 7</b> A success because of its diversity.</p>		
<p><b>Soc 15</b> Confident of justice for all.</p>

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p><b>expected to take 5 years</b> to ensure genuine open engagement by Australians and is expected to be <b>led independently by the people</b>, not the parliament or government.</p>		
<p><b>Top Priority Target/Strategy: Constitutional reform – National Collaborative Process for Development of The Australian People’s Constitution Gov04.01.01</b></p> <p>By 2025, in preparation for constitutional renewal pursuant to the Constitutional Convention established under <b>Gov04.01</b>, require the federal parliament to:</p> <ol style="list-style-type: none"> <li>establish a Joint Parliamentary or Senate Committee (with representation from the government, the opposition, independents and all other parties on the cross-bench) to commission development of a National Collaborative Process for Development of a New Australian Constitution – The Australian People’s Constitution, noting that this Collaborative Process is to be led by the people of Australia, not by anyone already empowered under the current undemocratic Constitution which accords sovereignty to a foreign monarch and unaccountable executive rather than to the people of Australia;</li> <li>preferably adopt the principles for conduct of the Collaborative Process outlined in the draft</li> </ol>	<p><b>Gov 4</b> A free, self-governing, modern nation.</p>	<p>In 2022, Australians occupied no place in their own Constitution other than as people whose vote was necessary to establish who shall govern them. Constructing the nation as a constitutional monarchy, the Constitution offered them no voice in their democracy beyond voting in elections. The vote itself was not guaranteed for all Australians in the Constitution and the system offered no mechanism for input to or determination of policy beyond what elected parliaments may see fit to permit. Nor did the Constitution confer human rights on Australians that are standard in Western liberal democracies.</p> <p>The Constitution offered Australians no means of playing an influential role in a participatory democracy and no means of establishing a plan to deliver a sustainable future for themselves, their children or the natural environment.</p> <p>In 2020, ACFP’s Founder Bronwyn Kelly stated that, “120 years after we, or rather our distant Victorian-age sovereign, first defined how we were to govern ourselves, we still have not defined to what end we want to govern ourselves and how we might fairly make our nation together. The Constitution should go to the heart of our national identity. At present, it and we are silent on that topic.</p>

<p>political parties at all three levels of government) to:</p> <p>a) prohibit donations to any registered political party by corporations, non-profits, unions and any other incorporated body or commercial/industrial/for-profit entity – such ban to include a ban on individuals self-funding their own campaign or that of their party other than by the party membership fees for individuals permitted under b) below;</p> <p>b) prohibit donations to any political party by individuals other than by membership fees capped on an annual basis at \$1,000 per membership;</p> <p>c) prohibit corporations and any entity that is not an individual natural person from seeking and being granted membership of a political party and prohibit any transaction between such an entity and a political party that may amount to provision or acceptance of membership fees;</p> <p>d) permit donations by individuals to any and all approved independent candidates (i.e., any candidate unaffiliated with a registered party) but limited to \$6,000 per candidate over the three years prior to the election for which the candidate is seeking office<sup>57</sup>; and</p> <p>e) prohibit all other possible forms of donations to any</p>	<p><b>Gov 6</b> A world benchmark in leaders' conduct.</p>	<ul style="list-style-type: none"> <li>government contractors = \$14.4 million</li> <li>private health insurance and services = \$14.2 million</li> <li>media and communications = \$11.9 million</li> </ul> <p>Source: Guardian Australia Transparency Project, Citizens Hub for exploration of political transparency and open governance.</p> <p>In 2018, the Grattan Institute opined that, “Political donations provide resources for political activity and advertising, and therefore restrictions on donations indirectly impinge on the Constitution’s implied freedom of political communication. As a result, there are limits on how political donations can be regulated. The High Court has ruled that restrictions on political donations are valid only if they are compatible with representative democracy, and if they are reasonably appropriate and adapted to their stated purpose. To determine whether a law is valid under the Constitution, the High Court considers whether it is suitable, necessary and ‘adequate in its balance’. The Court would be likely to view full public funding – equivalent to a ban on political donations – as unnecessary to protect representative democracy. But other, less extreme, measures such as donations caps have been ruled as constitutionally valid.”</p> <p>Source: The Grattan Institute, “Who’s in the Room? – Access and Influence in Australian Politics”, September 2018.</p>

<sup>57</sup> Note that the suggested permissible donation by an individual to independent candidates is twice as high as the amount that might be amassed in donations from individuals for a political party in the form of membership fees in a three-year period. This recognises that independent candidates do not have access to economies of scale, cannot cross-subsidise between candidates and have capital start up costs that party candidates do not. It is intended to reduce barriers to entry by new independent candidates.

	<p><b>Gov 9</b> A nation outlawing corporate greed &amp; where private sector business practice &amp; ethics serve the public good.</p>	

<sup>58</sup> **Rationale for proposals for prohibition and/or regulation of permissible donations to political parties and candidates:**  
 The strategy suggested in [Gov08.02.01](#) limits donations to political parties and candidates to zero if the donations are coming from organised entities rather than individual natural persons. However, under [Gov08.02.01](#), as long as they come from individual natural persons, donations in the form of political party membership fees are permissible up to a point, as are donations direct to any individual approved independent candidates. In this system every natural person has the same right to make “donations”, a proposal which is intended to enhance representative democracy. ACFP is of the view that the strategy in [Gov08.02.01](#) does not infringe on the implied right of political communication inasmuch as no person is limited more than any other in their decisions on donations and no non-human entity (such as a corporation) is inhibited in political communication that can be achieved by other means (such as direct and transparent publication of preferred policies under their own company name in such a way as to communicate those preferences to political parties, candidates and the public). The process of political communication is not adversely impacted by banning donations from non-human entities, especially if they are so large as to enable those entities to buy elections. Corporate donations are not political communication – they are simply buying elections and bribing candidates. They attempt corruption. Donations from non-human entities are highly likely to be unconstitutional wherever they result in inequalities in the system of representative government as the High Court found in the case of [McCloy vs NSW, 2015](#). In any case it should be noted that the strategy suggested in [Gov08.02](#) established community engagement on electoral reform within a constitutional convention. If established this will give Australians the chance to consider the principles of legitimate political communication in a representative democracy and design funding arrangements for elections that are consistent with that.

	<p><b>Gov 1</b> A proactive participatory democracy.</p>	
	<p><b>Gov 3</b> A nation with avowed rights for all.</p>	

<sup>59</sup> **Rationale for proposals for expenditure caps during election periods:** As noted in relation to [Gov08.02.01](#), expenditure caps of the magnitude proposed for a limited period are not expected to run foul of the Constitution inasmuch as they do not inhibit political communication. Political parties, candidates and third parties can all still spend on advertising and political activities but in a pre-election period it is advisable to impose a uniform limit within each type of campaigning group. This protects freedom of political communication but also levels the electoral playing field because it reduces the potential for disproportionate influence in campaigns by the more well-heeled entities.

**Indicators, Targets & Strategies for the success of Our Governance**

**Governance 8 – Electoral system & funding reform**

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p>Recognising that, under parts a), b), c) and e) of <b>Gov08.02.01</b>, the ability of political parties and candidates to fund necessary research and community engagement for high quality policy development and communications will be significantly reduced, the federal parliament should acknowledge the need to transform the basis on which political parties and independent candidates may qualify for public funding and may do so in a manner that is consistent with the need in democracy to foster equity in elections and the principle of “one vote = one value”.</p> <p>Consistent with these principles and to enable payments to candidates who:</p> <ul style="list-style-type: none"> <li>• have satisfied the legal requirements for nomination and are seeking election to the lower or upper house of the federal parliament; and who</li> <li>• meet all other criteria for eligibility for access to public funds for election campaigns,</li> </ul> <p>the federal parliament should legislate to create the following sovereign funds:</p> <ul style="list-style-type: none"> <li>• the Parliamentary Candidate Research and Policy Development Fund – \$50 million per annum (thereafter indexed to CPI); and</li> <li>• the Parliamentary Candidate Community Engagement and Communications Fund –</li> </ul>	<p><b>Gov 4</b> A free, self-governing, modern nation.</p>	<p>specified percentage of variance (currently 10%). Source: Commonwealth Electoral Act (No. 2) 1973</p> <p>In 2019, the principle of one vote, one value was not applied in laws regarding funding of the campaigns of candidates and political parties seeking election.</p> <p>In 2019, in regard to fair and adequate funding for ethical campaigns by quality, competent political candidates, Australia’s electoral system was not positioned to protect its democracy from capture by wealthy donors motivated to act in their own sectional or vested interests against the wider public interest.</p> <p>In 2018, it was reported that between 2007/08 and 2015/16 “public funding makes 30 per cent of election campaign funding”, leaving the door wide open for private entities to buy elections. Dominance of corporate and large donors within the system left it open to corruption. Source: The Grattan Institute, “Who’s in the Room? – Access and Influence in Australian Politics”, September 2018.</p>

<b>Indicators, Targets &amp; Strategies for successful performance</b>	<b>In the Directions of becoming ...</b>	<b>Baseline data</b>
<p>\$50 million per annum (thereafter indexed to CPI). Parliament may stipulate a formula for use in assessing applications for these funds as long as the formula may be deemed consistent with the need in democracy to foster equity in elections and the principle of “one vote = one value”. The proposed legislation is not intended to replace or reduce existing funding for political candidates under Part XX of the Commonwealth Electoral Act 1918 (in 2021 = \$2.871 per eligible vote – estimated at approximately \$48 million.) Creation of the two new funds should be in addition to funds available under Part XX.</p> <p><b>For the policy rationale behind proposals for rearrangement of electoral funding and expenditure under Gov08.02, Gov08.02.01, Gov08.02.02 and Gov08.02.03, see Note<sup>60</sup></b></p>	<p align="center"><b>Econ 8</b></p> <p align="center">Enabled in meeting the communication &amp; information demands of the future.</p>	

**Note:** Baseline data, Indicators, Targets and Strategies in this section will expand in future issues of *Australia Together*, based on availability of data and on the input of Australians.

<sup>60</sup> **Rationale for proposals to transform arrangements for electoral funding and expenditure:** Operating on the principles that:

- in a democracy, no individual, corporate body or other entity should be able to buy an election; and that
- if democracy is worth having it is entirely in the public interest for the state to provide sufficient funds for quality candidates and ethical political campaigns,

the intention under the combined strategies of **Gov08.02, Gov08.02.01, Gov08.02.02 and Gov08.02.03** is:

- to transform Australia’s system of funding democratic elections from the current essentially undemocratic system heavily dominated by corporate funding and funding by the rich (70%), to a system with much greater taxpayer funding, accepting that this is more likely to enhance representative democracy and support political equality (one vote = one value);
- to cap spending for election purposes in the six weeks prior to any federal election but also to reduce or remove the distortions that can arise from the disproportionate influence of corporate or other large donors in periods prior to the announcement of an election;
- to transform election funding in such a way as to:
  - ensure security of adequate funding for all authorised candidacies in elections,
  - eliminate as far as possible undue or disproportionate influence and the potential for bribery and corruption, and
  - give taxpayers greater capacity to restrict unfair distribution of funds for candidates.

The proposals are designed to give Australians greater control of their elections, ensuring fairness according to principles of representative democracy. This will transfer more of the financial burden for elections to the public purse but is likely to result in substantial benefits in the quality of democracy per dollar spent by Australians.

<sup>61</sup> The [Australian Press Council’s General Statement of Principles](#) is a half-page statement which is the peak document to indicate what standards journalism businesses are willing to hold themselves to account for in Australia. Once revised in 2014, journalists were no longer being required to hold themselves to account for veracity in reporting. The post-2014 Press Council Statement: removes the need for fairness and balance in reporting; effectively authorises journalists to publish “alternative facts”; loosens the need for comprehensive reporting of all essential facts; imposes no requirement to verify facts by citing sources; introduces the possibility of using “public interest” as a defence for reporting that causes or contributes materially to prejudice and health and safety risks; introduces the possibility of using “public interest” as a defence for racism, gender bias and all other sorts of discrimination; removes the need to publish the adjudication of a complaint; and imposes no obligation to prevent advertising and other commercial considerations from undermining accuracy, fairness or independence.

## Governance 12 – Peace & security

**Important Note:** In 2022, the Independent and Peaceful Network Australia (IPAN) conducted a national Independent People’s Inquiry, “Exploring the Case for an Independent and Peaceful Australia”. 283 groups and individuals made submissions and a panel of experts provided the analysis and results, outlining the views of Australians who hold concerns about the US Alliance and making recommendations on steps to be taken to ensure a genuinely independent and peaceful foreign policy for Australia. The Independent People’s Inquiry was a groundbreaking community engagement and collaborative policy development process which dared to place citizens alongside the parliament and at the centre of Australia’s foreign policy and defence decisions. Strategies and Targets throughout *Australia Together* are consistent with the findings and recommendations of the Inquiry in its final report, “[Charting Our Own Course: Questioning Australia’s involvement in US-led wars and the Australia-United States Alliance – A People’s Inquiry](#)”, November 2022.

<p>for peace specified in the United Nations New Agenda for Peace 2023;<sup>63</sup> and</p> <p>c) develop and implement a national plan for the promotion of peace as an Australian value and for establishing a national commitment to peaceful resolution of conflict with other nations in preference to discourse which may be provocative of war or civil and international violence.</p>	<p><b>Econ 8</b></p> <p>Enabled in meeting the communication &amp; information demands of the future.</p>	<p>competition is governed and restrained by the UN Charter rather than by militarism and power politics;</p> <ul style="list-style-type: none"> <li>• humanity is past the era when any single country can or should aspire to primacy or hegemony; and</li> <li>• the major powers should live in peace and mutual respect under the UN Charter, without threatening each other’s security.</li> </ul> <p>In 2024, tensions between some “global north” (Western colonial) powers and the United Nations led to open conflict between the UN-led order of international law and an alternative US-led so-called “rules based order”, laying the foundations for escalation of a new world war, possibly to a level that will be catastrophic for the whole of humanity itself, and making it urgent to seek a new agenda for global multipolar peace, such as that suggested by the UN in 2023 in its report, “Our Common Agenda, Policy Brief 9, A New Agenda for Peace”.</p> <p>Source: United Nations, Our Common Agenda, Policy Brief 9, A New Agenda for Peace.</p> <p>Source: United Nations Summit of the Future (SOTF) website.</p>

<sup>63</sup> In the United Nations, “[Our Common Agenda, Policy Brief 9, A New Agenda for Peace](#)” the 12 multilateral action items for peace were:

- for prevention at the global level: addressing strategic risks and geopolitical divisions – Action 1: Eliminate nuclear weapons, Action 2: Boost preventive diplomacy in an era of divisions
- for preventing conflict and violence and sustaining peace – Action 3: Shift the prevention and sustaining peace paradigm within countries, Action 4: Accelerate implementation of the 2030 Agenda for Sustainable Development to address the underlying drivers of violence and insecurity, Action 5: Transform gendered power dynamics in peace and security, Action 6: Address the interlinkages between climate, peace and security, Action 7: Reduce the human cost of weapons
- for strengthening peace operations and addressing peace enforcement – Action 8: Strengthen peace operations and partnerships, Action 9: Address peace enforcement, Action 10: Support to African Union and subregional peace support operations,
- for novel approaches to peace and potential domains of conflict – Action 11: Prevent the weaponization of emerging domains and promote responsible innovation
- for strengthening international governance – Action 12: Build a stronger collective security machinery.

<p>Australia against China and/or Russia;</p> <ul style="list-style-type: none"> <li>that continuation of the post-WWII exclusive reliance on the USA alliance and the ANZUS Treaty now works against Australian security objectives wherever and whenever pursuit of the USA’s objectives and interests undermines stability in the Indo-Pacific region;</li> <li>that the only feasible strategy for Australia in armed conflict is to avoid it entirely and that soft power resources – built steadily on the basis of ethical and cooperative behaviour by Australia in trade, climate change, human rights, humanitarian aid, observance of international law, and just participation in global forums (particularly the United Nations and international courts of law) – are therefore the most reliable means (economically and strategically) by which</li> </ul>	<p><b>Econ 9</b> Productive &amp; prosperous through fair &amp; ethical trade agreements, labour hire &amp; procurement.</p>	<ul style="list-style-type: none"> <li>was under-reliant on diplomatic strategy and accumulation of “soft power” for prevention of war.</li> </ul> <p>Source: Australian Community Futures Planning, The State of Australia in 2020, Episode 4 Part 2.</p> <p>See <b>Note</b><sup>64</sup> for further baseline analysis and reference materials.</p>

<sup>64</sup> In early 2021, Australian attitudes to foreign policy and relations were mixed. While the Australian government promoted military build-up by reliance on “drums of war” rhetoric and claims that “[everyday Australians](#)” supported getting prepared for war (rather than getting prepared to avoid it), Australians themselves in the majority rejected confrontation, as evidenced by the fact that in the [Lowy Institute Poll 2021](#), “when asked about a military conflict between China and the United States, more than half the population (57%) said ‘Australia should remain neutral’” and the [Institute commented further that](#) “Australians do not want regional competition to slide into confrontation.” In the same Lowy Institute Poll, however, 75% of respondents said that “The United States would come to Australia’s defence if Australia was under threat,” implying a degree of complacency among Australians (in relation to pro-US foreign policy and its efficacy in the event of military threats) that was at odds with what several experienced diplomats, analysts and commentators saw as a necessary shift in strategic relationships in the Asia Pacific region, due to the rise of China. Recommended policy shifts included those of:

- experienced diplomat [Geoff Raby](#) who said, “Strategic cooperation [with China and Asia] rather than US-led strategic competition with China offers not only the most constructive means by which to protect and advance Australia’s interests in the region, it is also the most realistic in view of China’s regional weight and influence. ... Diplomacy, after all, is the only instrument realistically available to ensure Australia’s security. Australia itself can never fund the military defence of the continent, nor can Australia confidently rely on other states to protect us. In the new world order, the safest premise on which to build security policy is that we are on our own. Diplomacy therefore should not be seen as a cost but as an investment in Australia’s future security.”; and
- the Australia Institute’s [Allan Behm](#) who said, “However Australia decides to address its relationship with China, it must be seen to be acting clearly in its own interests, and not as a US franchise.”

## Chapter 9 – Top Priority Targets and Strategies for the 2020s

Now that we have articulated a draft Vision, the beginnings of a road map towards it, and just how far we wish to go in the next 10 to 30 years, it is important to make sure we maximise our chances of getting there. This will require development and integration of Targets/Strategies which focus on resolving the twenty most critical issues that have been identified as those that must be solved before 2030.

ACFP's seven-part videocast series on [The State of Australia in 2020](#) sets out those top twenty issues. All episodes are available on [YouTube](#). Use the Episode Guide below to examine data relevant to each issue:

[Episode 1](#) – an introduction to the top twenty issues affecting Australia in 2020.

[Episode 2](#) – on our growing inequality, poverty, hunger and homelessness, the loss of the fair go for all, racial and religious conflict and exclusion of Aboriginal and Torres Strait Islanders.

[Episode 3](#) – on our Constitution, loss of rights and saving our democracy. This episode sets out how long-term planning can save our democracy from short-sighted political platforms.

[Episode 4 Part 1](#) – on unethical governance.

[Episode 4 Part 2](#) – on fractious international relations.

[Episode 4 Part 3](#) – on corporate irresponsibility.

[Episode 5](#) – on our declining economy and how we might save it.

[Episode 6 Part 1](#) – on the loss of biodiversity.

[Episode 6 Part 2](#) – on climate policy failure and how to fix it by global leadership.

[Episode 7](#) – on the decline of our health, education, social cohesion and our increasing unhappiness with the direction of Australia. This last episode includes an introduction to how National Integrated Planning & Reporting can be used by time-poor Australians to increase the chances of making their preferred vision of the future a reality.

Because the datapoints that have been set out in *The State of Australia in 2020* on these twenty critical issues function to pinpoint some of our biggest weaknesses as a nation in 2020, they also function as the basis for some of the most ambitious Targets in *Australia Together* and they demand the most ambitious Strategies. These Strategies will be assembled over time and monitored for their effectiveness, their ongoing relevance, and the degree to which they may or may not have been implemented, amended or ignored by governments.

As each Strategy is isolated, it will be loaded into the list below which relates the Strategy to the issues it should address and to the Target or Targets it can help us meet. This is a work in progress, not a map cast in stone. Gradually, the blanks will be filled and confidence in Strategies will increase. As resources permit, community input will be sought. For more information visit ACFP's [Become Involved](#) webpage.

## Targets for and Strategies responding to the top twenty issues

### In our Society

<b>A focus on priority Targets/Strategies of ...</b>		<b>... will contribute to resolution of priority issues of ...</b>

## Chapter 10 – Future additions and amendments to *Australia Together*

***Australia Together*** is a work in progress. However, it will increase in surety as it is built.

The current plan is a “starting draft” on which future drafts can be based. In preparing starting drafts, and releasing successive Issues of the draft for comment, ACFP is testing that the structure of the plan is working well to facilitate integration of Strategies and is efficient in drawing out Strategies that are consistent with the Vision and Directions.

### Percent completion

As at August 2024 it is estimated that:

- approximately 85% of the starting draft of the plan has been completed;
- over 360 data points about the health and wellbeing of Australia in the early 2020s have been embedded in the plan with more to be incorporated in future drafts during the next parliamentary terms as necessary;
- a structure for the plan has been established that is:
  - capable of integrating Strategies with preferred Directions and Targets to speed Australia’s progress towards the Vision for ***Australia Together***, and therefore
  - capable of freeing Australians from the restrictions of short term-party political platforms; and
- a sound basis for monitoring progress towards or away from the Targets of the plan has been established and is backed up by records of sources of data.

Readers are advised that obvious blanks in the current draft are to be filled progressively as resources permit and/or as data become available.

As to anticipated future inclusions, ***Australia Together*** is structured with significant capacity for reporting and providing the community with insights into the changing health and wellbeing of Australia and its citizens. Within this structure it will be possible in future to provide reports on current political policies and whether they are consistent with the Vision and Directions for ***Australia Together***. Indeed the first of such reports was provided for the 2022 federal election. Click [here](#) or on the picture at right to download the report on how well the major parties’ policies will help Australians make the Vision for ***Australia Together*** a reality.

This report, [Election 2022, Australian Federal Parliament: Assessment of Major Policies](#), incorporates the inaugural [Australian Better Futures Commitment Index](#), a monitoring tool which assesses how well each of the major political parties is committed to Australia’s better future. Click [here for a video summary of Election 2022, Assessment of Major Party Policies](#) or visit ACFPs Better Futures Commitment Index page at <https://www.austcfp.com.au/better-futures-commitment-index>

End of Term Reports will also be produced at the end of each parliamentary term to shed light on the performance of executive governments and parliaments in relation to **Australia Together** in their most recent periods of office. [Click here or on the picture to view the first End of Term Report](#), produced to report on the performance of the 46<sup>th</sup> parliament of Australia (2019 to 2022). This report is a valuable resource for reviews and subsequent drafts of **Australia Together**. Or visit ACFP's State of Australia webpage at <https://www.austcfp.com.au/state-of-australia>

### Checking the cohesion of the plan

This plan also has capacity to provide other helpful checking mechanisms including simple tables which show how each Direction, Target and Strategy contributes to the Vision for **Australia Together**. This is the ultimate reconciliation of the plan – the check that ensures that things in the plan actually will help Australians move towards where they want to be by 2050 and to do so safely. For this draft of **Australia Together**, the initial assessment of how each Direction contributes to the Vision is provided in the following table.

Checking the Aim of <b>Australia Together</b> How do Directions contribute to the Vision?	
Vision element	Directions contributing
We are all safe	Soc 1 through to Soc 12, Soc 14 through to Soc 16 Env 1, 2, 3, 6, 7, 8, 9, 12, 13, 14, 18, 19 Econ 1, 2, 3, 4, 7, 8 Gov 1 through to Gov 13
We have achieved a lasting reconciliation between First Nations peoples and non-Indigenous Australians, based on our shared values of justice and self-determination	Soc 1 through to Soc 7, Soc 9 through to Soc 16 Env 4, 5, 8, 9, 10, 11, 12, 15, 17, 18, 19 Econ 1, 2, 3, 4, Gov 1, 2, 3, 4, 6, 7, 11, 13
Everyone is welcome to participate positively in community life	Soc 1 through to Soc 13 Env 5, 17, 18, 19 Econ 1, 2, 3, 4, 6 Gov 1 through to Gov 10
We are inspired and able to renew our physical and spiritual wellbeing	Soc 1 through to Soc 8, Soc 10 through to Soc 13 Env 1, 2, 3, 5, 7, 8, 9, 10, 13, 17, 18, 19 Econ 1, 2, 3, 4, 9 Gov 1, 2, 3, 4, 10
We act together as a compassionate society	Soc 1 through to Soc 16 Env 1, 3, 18, 19 Econ 1, 2, 3, 7, 8 Gov 1 through to Gov 13
Equality is valued as enriching human community, cultural harmony and social progress	Soc 1 through to Soc 8, Soc 10 through to Soc 13 Env 1, 2, 3, 5, 7, 8, 9, 10, 13, 17, 18, 19 Econ 1, 2, 3, 7, 8 Gov 1, 2, 3, 4, 10
Diversity is positively appreciated as the basis for a successful Australian society	Soc 2, 3, 5, 6, 7, 8, 13 Env 17, 18, 19 Econ 1 through to Econ 9 Gov 1 through to Gov 13

Checking the Aim of <i>Australia Together</i> How do Directions contribute to the Vision?	
Vision element	Directions contributing
Everyone can realise their full potential in life, as individuals, members of a family and citizens through unlimited opportunities in education and employment of choice	Soc 3, 5, 6, 7, 8, 10, 11, 13 Env 5, 17, 18, 19 Econ 1 through to Econ 8 Gov 2, 10
Vital services are fully accessible for all	Soc 1 through to Soc 16 Env 3, 4, 6, 7, 16, 18, 19 Econ 1, 2, 3, 4, 5, 6, 8 Gov 7, 9
Scarce resources are conserved and fairly shared	Soc 2, 6, 8 Env 1, 2 3, 4, Env 6 through to Env 19 Econ 1 through to Econ 6 Gov 2, 3, 5, 7, 8, 9, 13
National wealth is fairly raised and fairly shared	Soc 2 through to Soc 12, Soc 14 through to Soc 16 Env 1, 2 3, 4, 18, 19 Econ 1 through to Econ 6 Gov 1, 2, 3, 5, 6, 7, 8, 9, 13
Our economy is sustainable and supports rewarding opportunities and continuous improvements in living standards, wellbeing and security for everyone	Soc 1 through to Soc 16 Env 1, 2 3, 4, Env 6 through to Env 19 Econ 1 through to Econ 9 Gov 2, 3, 7, 9, 10
As a nation we have the courage to take a leading place in achieving the environmental aims of a global society	Soc 1, 4 Env 1 through to Env 19 Econ 1 through to Econ 9 Gov 1 through to Gov 13
Stewardship of ecology is affirmed as fundamental to planetary and human survival	Soc 1, 2, 4, 16 Env 1 through to Env 19 Econ 1, 7 Gov 3, 6
Democracy is assured by a well informed and engaged community of political equals	Soc 1, 2, 3, 5, 6, 7, 8, 15 Env 1, 5 Econ 7, 8 Gov 1 through to Gov 10
We can confidently trust our parliaments, governments, and courts to act fairly and justly in accordance with the rights and interests of the public and future generations	Soc 2, 3, 6, 7, 8, 15 Env 1, 2, 4 Econ 1 through to Econ 7 Gov 1 through to Gov 10
We take pride in Australia as a responsible international citizen, active in building a safe, peaceful and united world	Soc 1, 6 Env 1, 2, 5, 10 Econ 1, 7, 9 Gov 1 through to Gov 13

## Key word list for assistance in navigating the plan

**Australia Together** is organised to help Australians follow the safe paths – known here as “Directions” – to the future, and the Indicators, Targets and Strategies associated with the Directions. Currently there are 57 of these Directions. They correspond to the 57 areas of national, state and local administration, policy and services that need to be efficiently and fairly operated in order to run a modern, democratic country well.

Because *Australia Together* is a complex map of integrated Targets and Strategies, it can be difficult to find a particular Indicator, Target of Strategy and its connections with various Directions. ACFP has therefore provided a key word/phrase list for additional assistance in tracing and inquiries. This list will be routinely updated as the plan grows and changes.

When searching the plan for any content of interest, readers can simply search on any word they choose. But if they search on the following words/phrases, the plan is organised to take readers more swiftly to a landing point for their interest. From there, readers can track the connections between Indicators, Targets and Strategies and the Directions they follow in the map to the future.

<b>Key word/phrase finder for Indicators, Targets and Strategies in the Directions for <i>Australia Together</i></b>		
<b>Key words</b>	<b>Housed under Direction – topic area</b>	<b>Plan/map location</b>
<b>Access to justice – civil</b>	Justice	Soc15.04
<b>Access to justice – criminal</b>	Justice	Soc15.04.01
<b>Accountability for achievement of commitments to stop climate change</b>	Climate change prevention	Env02.05
<b>Accountability for achievement of commitments to stop climate change – sovereign and personal liability for ecocide or genocide through climate change</b>	Climate change prevention	Env02.05.01
<b>Achievement of net zero carbon emissions within a carbon budget that will maximise chances of limiting global heating as near as possible to 1.5o Celsius</b>	Climate change prevention	Env02.01
<b>Aged care funding – Accountability of service providers in return for public funding</b>	Aged care & disability services	Soc12.04.02
<b>Aged care funding – federal budget minimums</b>	Aged care & disability services	Soc12.04
<b>Aged care funding – levies</b>	Aged care & disability services	Soc12.04.01
<b>Aged care package waiting times</b>	Aged care & disability services	Soc12.01
<b>Aged Care Royal Commission, implementation of recommendations – a new Aged Care Act</b>	Aged care & disability services	Soc12.03
<b>Aged Care Royal Commission, implementation of recommendations – new independent and accountable institutional arrangements</b>	Aged care & disability services	Soc12.03.01
<b>Aged care system performance monitoring – confidence in the aged care system</b>	Aged care & disability services	Soc12.02
<b>Aged care system performance monitoring – safety, quality and user experience indicators</b>	Aged care & disability services	Soc12.02.01

<b>Key word/phrase finder for Indicators, Targets and Strategies in the Directions for <i>Australia Together</i></b>		
<b>Key words</b>	<b>Housed under Direction – topic area</b>	<b>Plan/map location</b>
<b>Aged care system performance monitoring – satisfaction with aged care assistance</b>	Aged care & disability services	Soc12.02.02
<b>Air quality</b>	Air & water quality	Env14.01
<b>Arms control – Prohibition of weapons exports</b>	Peace & security	Gov12.02
<b>Arms control – Ratification of and conformance with the Treaty on the Prohibition of Nuclear Weapons (TPNW)</b>	Peace & security	Gov12.02.01
<b>Attitudes to multiculturalism – as a strength for Australia</b>	Diversity	Soc07.01.01
<b>Attitudes to multiculturalism – experience of cultural and racial discrimination</b>	Diversity	Soc07.01.02
<b>Attitudes to multiculturalism – positive support by Australians</b>	Diversity	Soc07.01
<b>Australia’s multicultural framework – Implementation of the road map</b>	Diversity	Soc07.04
<b>Australia’s performance on observing and maintaining human rights – civil, political, economic and social</b>	Human & other rights	Gov03.03.01
<b>Australian involvement in military operations</b>	Peace & security	Gov12.01
<b>Australian preference and readiness for an independent defence capability versus dependence on the US alliance</b>	Peace & security	Gov12.01.02
<b>Australian preference for peace versus war</b>	Peace & security	Gov12.01.01
<b>Belonging and inclusion – sense of acceptance or rejection</b>	Belonging & Inclusion	Soc03.01.01
<b>Belonging and inclusion – sense of belonging</b>	Belonging & Inclusion	Soc03.01
<b>Binding code of ethics and conduct for federal parliamentarians</b>	Government ethics	Gov06.03
<b>Building an inclusive society by community volunteering</b>	Belonging & Inclusion	Soc03.02
<b>Burden of disease</b>	Health & wellbeing	Soc04.04
<b>Carbon emissions reduction – Achievement of net zero emissions by 2033 within the carbon budget</b>	Climate change prevention	Env02.01.02
<b>Carbon emissions reduction – Emissions reduction target for 2030</b>	Climate change prevention	Env02.01.01
<b>Cessation of native forest logging – urgent legislation</b>	Land & resource conservation	Env12.02
<b>Cessation of new coal, gas and oil investments – legislative program</b>	Climate change prevention	Env02.03
<b>Child assault</b>	Safety	Soc01.05
<b>Citizens’ oversight of progress towards the United Nations Sustainable Development Goals (UNSDGs)</b>	Economic planning, growth & transition	Econ01.09.01
<b>Climate change performance – action, international cooperation and policy</b>	Environmental advocacy	Env01.02
<b>Cohesion and stability of democracy</b>	Strength of democracy	Gov01.03.03
<b>Compulsory and satisfactory completion of training in ethics and proof of competency in</b>	Government ethics	Gov06.03.01

<b>Key word/phrase finder for Indicators, Targets and Strategies in the Directions for <i>Australia Together</i></b>		
<b>Key words</b>	<b>Housed under Direction – topic area</b>	<b>Plan/map location</b>
permissible voting practice for parliamentarians		
Consistency of legislative programs with the Vision for Australia Together	Strength of democracy	Gov01.01
Constitutional reform – a National Agreement on Human Rights and Obligations in the Constitution – Rights conferred under international treaties, conventions and covenants	Human & other rights	Gov03.01.02

## Appendix A – Introduction to the first Issues of *Australia Together* – 2021 to 2023

*Australia Together* was first launched in May 2021 during a period of great uncertainty about the nation's prospects for a safe future. As the years pass the Introduction to the plan will be revised to reflect changing circumstances.

However, if Australians are to be able to judge whether or not we are making progress as a community towards a better future, it is important in any long term plan to remember where we Australia started from. For this reason the Introduction to the first starting draft to *Australia Together* has been retained. ACFP hopes that in the future the memory of where we started from will show us how many of the original challenges we have overcome.

### Introduction – Australia now and in the future

May 2021 to December 2023

*We have it in our power to create the world anew.*

Thomas Paine, 1776

In Australia today, there is no road map showing the paths of safe travel towards the future. Nor is there a single space in which Australians have described the future they might prefer. No government has developed a plan by which we might set a course to a well-understood destination of safety, security and wellbeing. We have never taken the time to listen to each other and describe the country that we wish to live in in five years' time, let alone the one we wish to bequeath to our children in twenty or thirty years' time. In short, Australians are travelling blindly to an unknown place.

Travelling toward an unknown future without a map is at best unnecessary and at worst suicidal. In particular, it is unnecessarily expensive and economically contractionary. Moreover, at the outset of the 2020s, Australia has reached several critical turning points which make it imperative that we set out a plan for an affordable path to an acceptable quality of life. For instance:

- We have arrived at a major crossroads in our choices about energy and the environment. Do we prefer the path towards renewable energy and less global heating; or do we prefer the path towards more fossil fuels?
- We have also arrived at critical turning points about our identity as a nation. Do we wish to deal with problems arising from our violent origins as a colony and come to terms with who we want to be as a nation; or do we wish to continue with the dispossession and exclusion of First Nations peoples?
- Between 2000 and 2020 we have seen obvious growth in inequality with the rise of neoliberalism and corporate irresponsibility. Do we want to arrest that or do we want the national wealth that we all work hard to generate to be corralled by the few instead of the many?
- Between 2002 and 2020 we have seen the rise of the secret state, an increasing reluctance by governments to be held accountable, and a significant loss of rights for all Australians. Do

we want to cede all power in our democracy to unaccountable and increasingly unethical agencies and corporations; or do we want to increase our influence in our own governance and our share of power in democracy?

- Since 2014, we have seen a significant decline in our participation as a leader on the international stage and our relationship with our biggest trading partner – China. Do we wish to return to being a collaborative partner with other developed and developing nations to build a more fairly shared future for humanity; do we wish to build an independent defence capability; or do we wish to isolate ourselves in an increasingly fractious inevitably globalised world?

These are just some of the turning points that Australians have arrived at in the early 2020s which make a plan for the nation more urgent than ever before.

Australian Community Futures Planning (ACFP) has been established to make development of such a plan possible for any Australian that might wish to escape short term party-political platforms and look towards a safe, secure and prosperous future.

**This plan – *Australia Together* – is to be developed over time by Australians *together*.**

ACFP's contribution is research resources and expertise in particular in provision of an organising framework for the plan. That framework is called **National Integrated Planning & Reporting – or National IP&R**. This is an entirely democratic form of planning that can increase the shares of power held by Australians.

One of the first steps in National IP&R is to provide a picture of Australia's current overall wellbeing. This draft plan begins to paint that picture. The picture is not a very happy one; but if it is painted correctly, based on verifiable facts, and at the right time, it will be possible to detach ourselves from always having to react to crises when it is too late and to start getting ahead of them instead. While our current quality of life is declining – and declining to an extent that should not occur in such a wealthy nation – the prospects for the future are still good, as long as we do not miss the moment.

Australians are at the crossroads but by world comparisons they are wealthy, highly educated, and are blessed with some rare natural advantages such as the fact that they share no borders with other countries, have access to extraordinary renewable resources, and genuinely value the fair go for all. They value working together, social inclusion, equality of opportunity and hard work. These are all vital advantages that can be used to overcome the inertia that has led to the decline we have seen in the 21<sup>st</sup> century of Australia's society, environment, economy and democracy.

It only remains for us to harness these extraordinary natural advantages so that we can arrive safely in 2050 with an acceptable degree of wellbeing and security. The most efficient way to do that is to build a map. With our advantages and that map we have it in our power to create the world anew.

At ACFP we have drafted a **Vision** of what that new world might look like as a guide. This Vision is based on comments made by Australians about their preferred future on the rare occasions they have been asked about it in the 21<sup>st</sup> century. Governments have not listened to those comments. They have not taken the aspirations of Australians seriously enough to design a plan that will make their preferred future a reality. Through time, the Vision and this plan – ***Australia Together*** – will be refined to increase our chances of making our preferred future a reality.

## Appendix B – Acknowledgements

*Australia Together* is growing into a strong long term plan consolidating in one place, for the first time, baseline indicators of our current wellbeing as a nation and the Targets and Strategies we will need if we are to follow the safest routes to make the Vision and Directions for *Australia Together* a reality by 2050 or sooner. Hundreds of thoughtful agencies and individuals, through the research they have made freely available, have made it possible to establish this assembly of community intelligence. ACFP especially wishes to thank them for the work they have done. It's now up to we the people to engage with this research and work together to refine the plan.

Many of the sources of information cited below may not realise that their work has been vital to *Australia Together*. ACFP sincerely thanks them for their work.
